First, you need a Google account to use this service. Google Drive is free and can be set up in minutes. An account gives you access to all Google services, including Drive, Gmail, Photos, YouTube, Play Store, and more.

You can access Drive on the web by going to drive.google.com or via the free Android app. You can also view all your files via the Drive folder on your PC with Google Drive for desktop, but you'll need to download the software first.

Features of Google Drive

Thanks to Google Drive, you get direct access to the virtual drive from Windows, with the ability to sync files to the cloud whenever and wherever you want.

After you install the app on your computer, you'll see the app's icon appear in the left sidebar of any Windows folder, just below Desktop and Recent Places. Just one click will give you access to the files you have stored on your Google Drive account.

And if you want to upload something to your cloud account, all you need to do is drag and drop the file inside the folder.

The basic Google Drive storage is 15GB, which is more than enough to store documents, pictures, and videos. Of course, you can always pay to buy more storage if needed.

Google Drive is a giant cloud storage tool that, thanks to its integration with the rest of Google's products and ease of use, makes it quite useful for any user.
