

# Google invites a programmer to buy Glass

After announcing to allow all developers to approach Mirror API, Google recently invited app developers to buy their Google Glass glasses. Specifically, the search firm in Mountain View has sent developers to buy Glass's version of Explorer Edition, with the invitation content as we see in the picture below.

## Hi there

When you asked us how to get Glass on [this site](#), we told you there would be more chances to join the Explorer Program...someday. Well, today's the day.

The sneak peek of the [Glass Developer Kit \(GDK\)](#) is available now, making it possible to build new and innovative kinds of Glassware. We're now inviting you, as a developer, to purchase Glass, become an Explorer, and join us in taking the next step in developing for Glass.

Click on the purchase code below to begin your adventures with Glass.

With this new move by Google, developers will have the opportunity to access the actual product, thereby making it easier for them to test applications running on Glass. A little while ago, the company also invited a programmer to attend the *hackathon* conference in *San Francisco* on the occasion Google introduced a tool to program **Glassware Development Kit**.

Glass Glass has just been upgraded to the 2nd version by Google, most notably the glasses will be equipped with mobile mono headphones that can be removed and inserted. This is also the first time **Google Glass** is compatible with people wearing prescription glasses ( *glasses for eye problems* ). An accessory market for Glass is also introduced with items such as chargers, protective panels, headsets .
