

Google launched the duo Pixel 4 / Pixel 4 XL, 90Hz screen, Snapdragon 855, priced from 18.6 million

The latest pair of smartphones from Google, Pixel 4 and Pixel 4XL were unveiled at the Made By Google '19 event.

Today, the latest smartphone duo of Google, Pixel 4 and Pixel 4XL were unveiled at the Made By Google '19 event.

In terms of design, both the Pixel 4 / Pixel 4 XL have a 'thick forehead thin chin' design, similar design trend to Bphone 3. The upper thick bezel contains the selfie camera, speaker and support sensors. 3D face recognition support.

According to Google's statement, Pixel 4 has the fastest face unlocking speed and most security thanks to a new feature called Motion Sense.

Goole has completely removed the fingerprint sensor on its new product duo. The rear camera assembly of the device is housed in a black square module.

Pixel 4 and Pixel 4 XL own screen sizes of 5.7 inch Full HD + and 6.3 inch Quad HD +, respectively. Google claims that this screen has the best display quality. The screen on the duo also has a refresh rate that is upgraded to 90Hz, depending on the content displayed on the software screen on the device will automatically adjust between 60Hz and 90Hz to save battery.

Motion Sense feature is equipped with independent sensors that enable users to manually control content on the screen without touching the device and without connecting to the network. Users can turn this feature off in the machine settings. For details about this feature, you can follow in the article "The actual video of controlling Pixel 4 without touching".

The rear camera cluster of Pixel 4 includes a 12MP main camera, and a 2x telephoto camera with 16MP resolution.

The upgraded Night Sight feature (exposure mode) can expose up to 16 seconds to meet the astrophotography mode.

It is equipped with Pixel Neural Core which helps to process HDR photos in real time Live HDR +.

The front camera of the device has a resolution of 8MP.

In terms of hardware, the Pixel 4 duo is equipped with Snapdragon 855 chip, 6GB RAM, internal memory with 2 options of 64 and 128GB. Pixel 4 has a 2800mAh battery and Pixel 4XL has a 3700mAh battery. The duo are all equipped with 18W fast charging technology.

Double Pixel 4 running Android 10.

Pixel 4 and Pixel 4 XL are expected to hit shelves on October 22 in the US with three color options: Clearly White, Just Black and Oh So Orange. Pixel 4 with two versions of 64GB and 128GB memory is priced at \$ 799 and \$ 899 respectively, while the XL version costs \$ 899 and \$ 999.

Some actual photos of Google Pixel 4 XL, please take a look.

1. Xiaomi launched Haylou LS01 smartwatch, 14-day battery, priced at VND 330,000
