

Google Maps detects 8 strange bases of aliens?

Please join us to learn about 8 strange alien bases on Google Maps in this article!

1. Close up of the star is said to be a giant structure of aliens
2. Not a UFO, this is the cause of the mysterious black circle in the sky of America
3. UFO object disappears through mysterious light cells in the sky of Russia

Have any aliens visited our Earth before? Take a look at **8 strange bases found by UFO hunters** (*alien hunters*) on Google Maps and evaluate yourself!

Whether you believe in alien life or not, you cannot deny that the base areas found on this **Google Maps** look a bit strange.

The alien hunters constantly search, review free map sites to " *catch* " signs of aliens. Please check with us!

1. The object suspected of being an "alien ship" in Antarctica

In April this year, UFO hunters confirmed a strange, 500-meter-long object in the waters off Antarctica, believed to be a mysterious ship or an underwater base of aliens.

Antarctica is an empty desert wilderness with only ice and snow, but UFO hunters often assume that the continent contains many alien bases. It serves as a perfect place to hide spacecraft as well as build bases because there are no settlers.

According to **UFO Sightings, Hotspot** said: " Normally, icebergs come in many different shapes and sizes. But the object in this discovery does not match the popular icebergs classification. The two types of icebergs are basically flat and non-planar. The flat icebergs have flat slopes and peaks that resemble plains, while icebergs are not flat with many different shapes. " .

Although there are many opinions that this giant structure is actually an iceberg that is washed away from the Antarctic coast, the ' *UFO-savvy* ' community still maintains that it is a strange ship disguised as a city.

Even, some people suggest the 500m-long object that Google Image could capture is the ' *alien base under water* ' .

Previously, the **SecureTeam10** group once shared an image of a disk-shaped object halfway out of the cave when zooming in on a hilly area of ??Antarctica.

Google maps: 72 ° 43'13.53 "S 78 ° 40'21.56" W

2. The Mars structure is 'identical' to the Japanese tomb

There is a Kofun period tomb in Japan that looks exactly like a mound on Mars when viewed from above.

Alien hunters have discovered the couple on Google Maps, the Mars feature of Google Earth and believe it is evidence that Martians have settled on Earth for hundreds of years after a Terrifying events forced them to leave the Red Planet.

These two images look the same but maybe this is just a coincidence?

Google Earth: Select the planet icon, select Mars and search for 6 ° 3'57.07 "N 92 ° 4'13.22" E.

3. The underwater base of the aliens

Can this giant pyramid shape be observed below the Pacific surface as an underwater base of aliens?

That's what **Argentine** researcher **Marcelo Igazusta** believes and declares that the measured objects are 8.5 miles long.

Google Maps: 12 ° 8'1.49 "N 119 ° 35'26.39" W

4. Spacecraft in Romania

An eye user observed that something that looked like a spaceship was parked underneath - but not carefully guarded - in Romania.

After years of speculation, it eventually emerged that it was really a water tower built in the last century. There are no signs of alien life here, but it is also a sign of confusion when observed.

5. The entrance to the mysterious base of aliens thanks to Google Map

Daily search site **UFO Sightings** alien said it has found the entrance to a mysterious alien base in Argentina.

A well-known island is the entrance to the newly found **alien base** not far from Buenos Aires, Argentina on Google Map.

The name of this floating island is **Eye** - a circular area of ??about 120m in diameter surrounded by a small canal. Both inner and outer circles are perfect, with the center circle moving and rotating around its axis.

This makes many people question what led to the formation of this strange base? Why is it moving? How can it remain intact without distortion after a long time? Why don't aquatic plants grow around it?

The UFO research team decided to investigate and found that the water was very clear and cold, but something was not normal. They still have not learned anything but the island.

Meanwhile, **UFO Sightings Daily** collaborator - **Scott C. Waring** , who used to work for the US Air Force at SAC base, said: " *Argentina is a place where UFOs are more frequent than in other parts of the world and This is how aliens hide the entrance to their rescue, because this floating island has a round, large, enough shape for a 100m UFO to fly over .* "

Although it has yet to discover what the island is, it is undeniable that it is a strange phenomenon and is located in an inaccessible place.

Google Maps: 34 ° 15'07.8 "S 58 ° 49'47.4" W

6. UFO is found in restricted areas of Arizona

Is this a flying saucer? YouTube **Secureteam10** user account detects strange objects in restricted areas of Arizona - this makes people more curious.

Google Earth cameras have recorded an object that looks very similar to the " *flying saucer UFO* " in a mountainous area in Arizona, USA, according to a video **recently** posted by YouTube user **Secureteam10** . This video has attracted the attention of many people.

When zoomed in to look closely, this " *UFO* " appeared as a **giant circular object** , with a white SUV parked right next to it.

Of course, not everyone is convinced because there are some who say that it may be just a tent.

Joshua Youngblood users have comments:

' I tried searching for it on Google Earth and looked closely. There are some old discrete structures in the neighborhood and it is like a solar battery. I suppose this is a water tank. Moreover, it was also in the middle of Swaggart Spring. And this is not a no-fly zone '.

Besides, **Andrew Hennessey** wrote:

' It looks like a half-inflated tent, or even an overturned inflatable boat for use as a tent .'

If you want to observe this object on Google Maps or Google Earths yourself, enter the following coordinates: $31^{\circ} 26'43.0'' N 109^{\circ} 04'30.0'' W$ into Google Earth.

Google Maps: $31^{\circ} 26'43'' N 109^{\circ} 4'30'' W$

7. UFO invasion in Antarctica

Valentin Degterev , a man who cares about unidentified flying objects (*UFOs*) in Russia believes he has found the falling area of ??an alien aircraft flying in Antarctica.

A UFO hunter during a search of Antarctica via the Google Earth satellite suddenly discovered **a strange white object beneath the Antarctic surface** .

When enlarging the image, it can be seen that this strange object is 22km long, has an unusual white color, special shape. No previous artificial works have been published at the location of this identified location, so the expert said that this could be the mysterious operation base of alien civilization on Earth.

Or it's a strange spot visible on the snow - what do you think?

Google Maps: 80 ° 34'08.4 "S 30 ° 05'19.3" W

8. Antarctic flying saucer signs of Antarctica

Hunters of unidentified flying objects (UFOs) detect a suspected **alien spacecraft** in Antarctica via Google Earth satellite imagery.

UFO Secure Team hunters share a half-shaped image of the disc protruding out of the cave on YouTube when zooming in on a hilly South Pole. The discovery is seen as "*the latest evidence of secret technology*" on the ice continent.

" *This is an important discovery, one of the most unnatural and unusual works we've ever found in Antarctica,* " the **Secure Team team** said.

However, others are still skeptical when pointing out that an unidentified flying object does not cast shadows and this may be just a crack on the ice.
