

# Google Pixel 4a has a video on hand: Snapdragon 730, 6GB RAM, 3080mAh battery

In addition to the design, the newly leaked hand video also revealed both the specifications and price of Google Pixel 4a.

We have seen a lot of information about Pixel 4a - Google's upcoming mid-range smartphone, which has been leaked online. Recently, a YouTube channel called *TechnoLike Plus* has suddenly shared a video on the hand of this phone, which shows an overview of the design, and also reveals the specifications of the device before the date. launch.

## Design

The Pixel 4a in the recently leaked hand video is the black version. Like its predecessor, it also has a back made of polycarbonate plastic. The device uses a perforated screen design with a "mole" in the top left corner to accommodate the selfie camera, in addition to the bezel on all four sides is also much thinner than the Pixel 3a.

Moving to the back, the Pixel 4a is equipped with a single camera with LED flash, mounted in a rectangular module just like the Pixel 4 and 4 XL duo. It has a fingerprint sensor on the back, white power key and volume up and down keys on the left side. Meanwhile, the top edge has a 3.5mm headphone jack, while the bottom edge houses the USB Type-C port.

## Technical data

In terms of specifications, Pixel 4a will be equipped with a 5.81-inch screen, supporting Full HD + resolution (1080 x 2340 pixels). The phone will use Qualcomm's mid-range Snapdragon 730 processor, has 6GB of RAM (more than 2GB RAM on Pixel 3a and Pixel 3a XL) and only 64GB of internal memory.

In terms of imaging capabilities, the Pixel 4a will have a 12MP single camera on the back and support 4K video recording. Meanwhile, the selfie camera of the device has the same 8MP resolution as its predecessor, but is added with anti-shake feature when recording videos.

### A few key specs of the Pixel 4a

Surprisingly, the Pixel 4a will support 2 SIMs, unlike the Pixel 3a which only has a single SIM slot. The device comes with Android 10 pre-installed when it comes out, comes with a 3080mAh battery, a slight increase compared to the Pixel 3's 3000mAh battery.

## Price

According to the source sharing the video on hand, Google Pixel 4a will be sold in Cuba for 500 CUP (about 11.6 million). Since the 2020 I / O event has been officially canceled, Google may launch the Pixel 4a earlier than expected, through a special event reported live on the internet.
