

Google Play Store releases updated 'good' application suggestions for users

Google Play Store has been upgraded to version 3.10.9 with some 'friendly' improvements for users.

Google Play Store has been upgraded to version 3.10.9 with some 'friendly' improvements for users.

In recent times, the Google Play Store application store has been regularly updated by a giant searcher to improve the interface as well as necessary utilities for users. Google has just released version 3.10.9 for Google Play Store with quite practical tweaks.

First, after the user installs the application, Google Play Store will release other related applications that users may be interested in. In addition, for owners of non-English devices, Google Play Store can offer suggestions in their native language so that users can easily catch or add friends on Google+. Those are the new efforts of Google to bring the best experience to Android users and increase the quality of service of this operating system.
