

# Google Search failed to index new content

Google Search is encountering a rather troublesome problem in which new content is not automatically indexed in their search results.

Google Search is encountering a rather troublesome problem in which new content is not automatically indexed in their search results. The reason for saying this is a problem is because most users will not be able to recognize the error until it is actually remedied successfully.

This Google Search error was only discovered by chance. Not long ago, experts from the BleepingComputer technology news website suddenly discovered that some of their newly published articles were not displayed on Google search results pages at all. When looking at other websites, BleepingComputer also sees a similar situation, some of the new content of these sites also does not appear in Google's search results.

1. Google acknowledges storing user passwords in plain text for 14 years

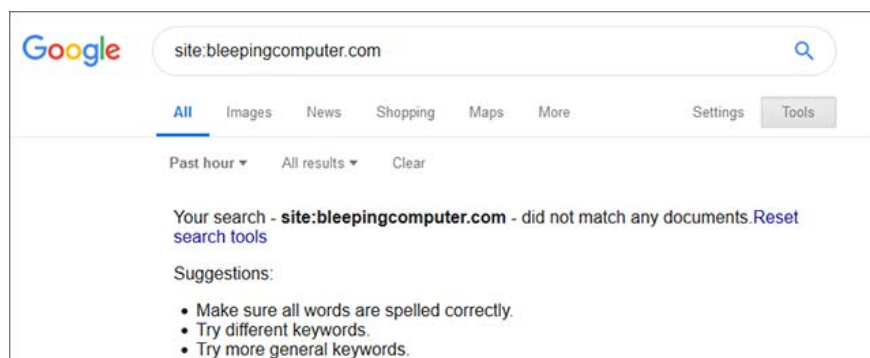

However, this error seems to appear only for new content. On the other hand, old and existing content is still displayed as usual.

According to a post on the Google Webmaster team Twitter account, this is a problem that has been recognized in Google's index, and this team is exploring the cause as well as considering the way to fix it soon .

1. Google Drive does not currently support the Microsoft Edge Chromium browser

Besides, BleepingComputer experts also found that this error tends to appear only after 6:36 am because it is the time of publication for their final article, which is already indexed.

1. 7 reasons you should try Microsoft Edge Chromium once instead of Google Chrome

At the moment, the only possible measure is to wait for Google to fix the problem and re-index the errors.

This is a small but particularly annoying problem, so Google will definitely not hesitate to fix the error.
