

# Google Translate already supports Vietnamese

Continuing to expand the Vietnamese language into its translation dictionary, Google Translate increasingly affirms its important position in the Internet world.

Continuing to expand the Vietnamese language into its translation dictionary, Google Translate increasingly affirms its important position in the Internet world in general and the Vietnamese Internet community in particular.

Using the **Google Translate** online dictionary, you can translate a piece of text or translate an entire site. Just go to the **Text and Web** tab, put the text you want to translate into **Original text**, select the source and language to switch to. Then click the **Translate** button, you will get results. If you need to translate a website, simply put the website address into **Translate a Web Page** and select the language. The result given by Google is a website that you can easily study.

Alternatively, you can use Google Translate to search for keywords in another language. For example, you need to search for " **security** " keywords but in language . Chinese, Google Translate is the most effective tool. Just select the **Translate Search** tab, enter the search word as " **security** " and select My language **Vietnamese** and Search page written in: **China** . Google Translate will return search results for both languages.
