

Google wants to improve the quality of Chrome browser

Currently, Google Chrome is considered to be the best mobile browser today, but this does not prevent developers from setting a determination to further improve quality.

Currently, Google Chrome is considered to be the best mobile browser today, but this does not prevent developers from setting a determination to further improve quality.

Specifically, the media reported that Google tried adding **Chromecast support** to the latest beta version of the Chrome mobile version.

As a result, Chrome can open not only YouTube videos but also work smoothly with other video sites using HTML5 technology, such as *Vimeo* .

The Chrome mobile browser '*Chromecast*' process on Android phones still has some bugs to fix.

Interested users can download the latest version of the Chrome beta mobile browser from the Google Play Store store.
