

Goose bumps with movements like fictional creatures of bloodworms

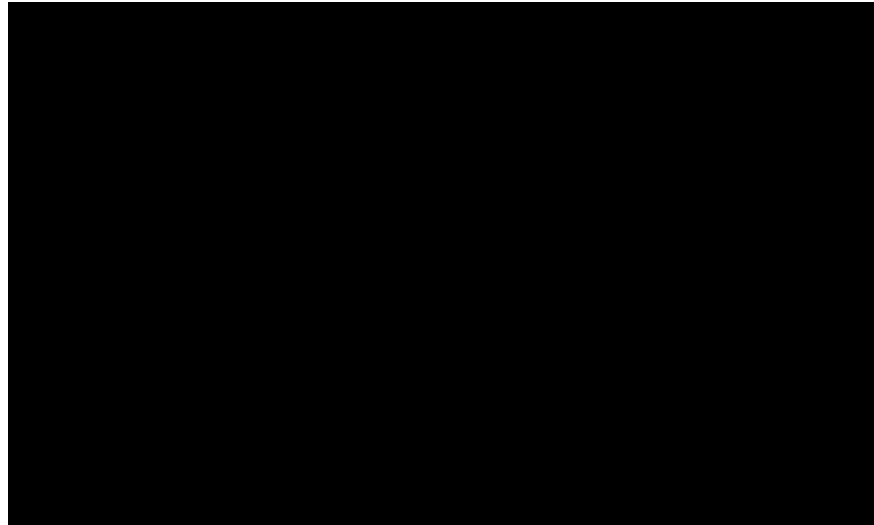

With a slender body, straining his metal canines, this strange creature made many people startled in terror.

With a slender body, straining his metal canines, this strange creature made many people startled in terror.

1. The mystery of a giant 1.5-meter-long worm eating both hydrogen sulfide and rotten gas
2. Shivered by the snail 6,000 teeth that eat deep in the earth like monsters in the movie

This terrifying creature is called a bloodworm or also called a blood worm or polychaete worm, its English name is bloodworms. They live in flooded areas near the coast.

Explorers and zoologist Coyote Peterson learn about this strange creature in a reality show called "Wilderness Brave". Coyote placed the worm in his hand and turned close to his scary movements.

This creature is usually creamy pink, pale skin makes the red liquid containing hemoglobin in their bodies easily visible to the naked eye.
