

# Great apps only available on Android

Google Play is slowly catching up with the huge number on the App Store that Apple has 'built up' to build. For Android believers, the new 'green robot' operating system is the most appropriate platform to push hardware and software to its limits.

Google Play is slowly catching up with the huge number on the App Store that Apple has "built up" to build. Undeniably the advantages that the 'Apples Apples' bring, are not without any reason that most software developers choose iOS as the first 'start-up' place for their applications.

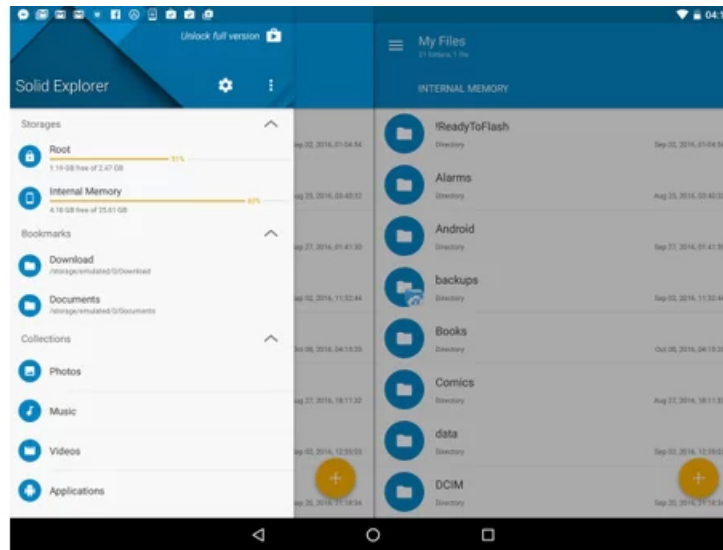

## 1. The best Android apps

However, for Android believers, the new 'green robot' operating system is the most appropriate platform to push hardware and software to its limits. A lot of great apps are available on Android and only Android.

## Top great apps only available on Android

1. Solid Explorer
2. ADV Screen Recorder
3. Greenify
4. Muzei
5. Helium Backup & Restore
6. AirDroid
7. Flud
8. Drupe
9. Unclouded
10. Light Flow Lite
11. Avast! Mobile Security & Antivirus
12. Nova Launcher
13. Ultimate Custom Widget

## 1. Solid Explorer

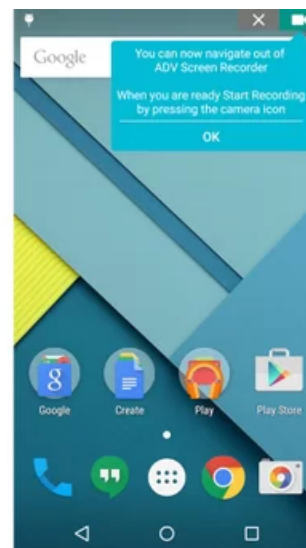

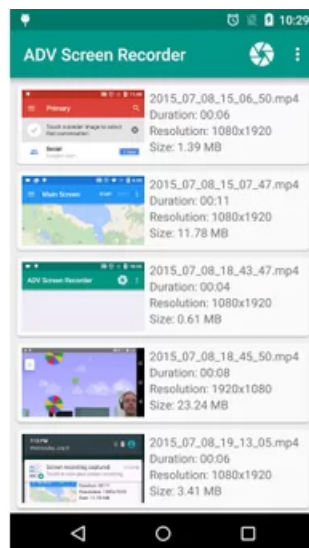

Android allows users to organize and manage file systems on their devices. One of the most well-implemented applications is Solid Explorer. This is an impressive Android file management application with a two-panel interface while keeping the Material design style. Designed with two independent control panels and supports drag and drop features to help users easily copy and move files. In addition, you can also set up a control panel to browse popular cloud storage services like Drive, Dropbox and SkyDrive. Solid Explorer also supports archives such as .ZIP, .TAR, .RAR, and some features for rooted devices. In addition to the impressive features it offers, this file manager application for Android also supports many plugins that add some new features such as USB OTG support, FTP server plugins, etc.

## 2. ADV Screen Recorder

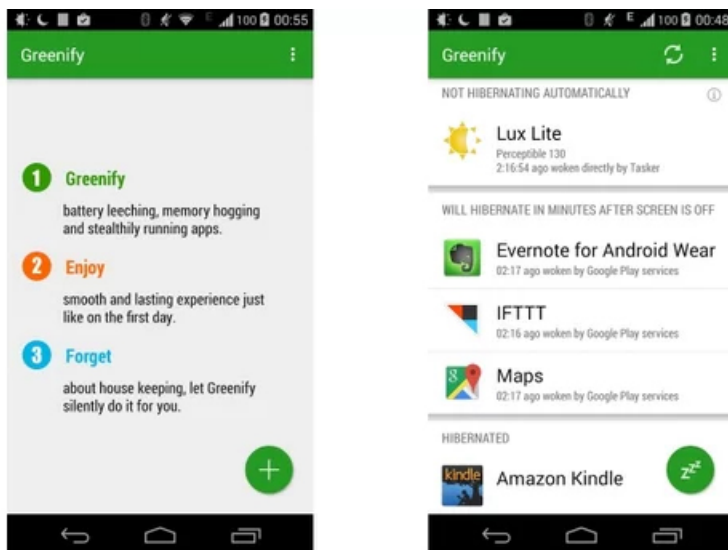

You may have noticed that the iOS app ecosystem is often 'absent' from screen movie applications but on the other Google operating system, it has a lot of applications that provide screen-recording features. And in so many options, ADV Screen Recorder is more prominent. It offers many features such as screen capture video resolution, orientation, audio recording, overlay for logos, text or notes and video cutting.

1. Top 6 quality Android phone screen video recording applications

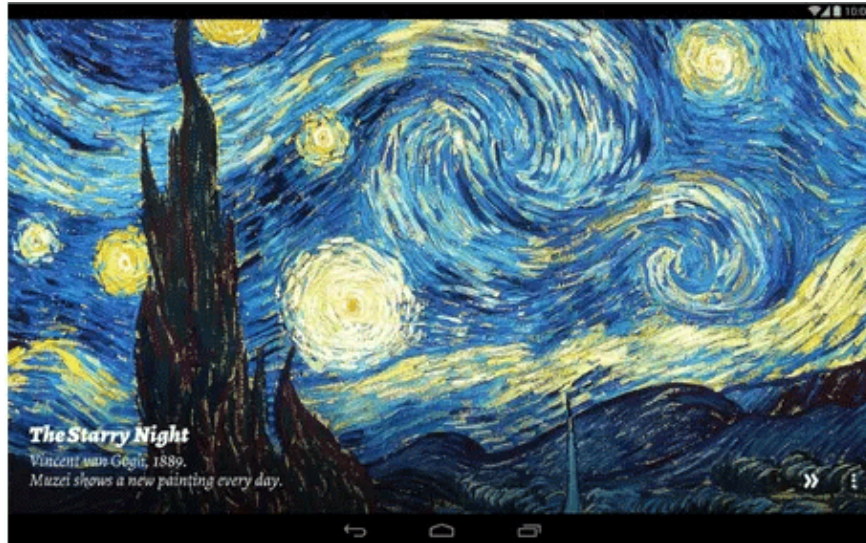

### 3. Greenify

Are you having problems with applications running in the background that drain the battery quickly? Use Greenify, it will freeze the application in a state of "hibernation", cannot access system resources, bandwidth or run background processes. If the app continues to drain the battery in the background, don't hesitate to "kill" it. However, you should not do this with an alarm clock, message, email application or any other important notice.

### 4. Muzei

Live wallpaper is a unique feature for Android, bringing vivid images to your lock screen. Muzei Live Wallpaper turns Android's main screen into a lively museum library with art masterpieces around the world. This wallpaper is a bit fuzzy to make your icons and widgets look better, but when you touch the screen twice, you can enjoy these artworks.

## 5. Helium Backup & Restore

Although Android has many backup applications like Titanium Backup, many applications require root access to perform its functions, but Helium synchronizes and backs up this data completely differently. Like other best backup applications, Helium allows users to back up apps, data, contacts, SMS and call logs, but a feature that makes it stand out from other competitors is Helium. can do all these without rooting the device. Those who do not root the device will have to install additional desktop applications to work with the mobile application when plugged into the computer, while the rooted device can use Helium directly. In addition, it also has a paid version that provides backup features to the cloud, scheduled backups and no ads.

## 6. AirDroid

Remote control is one of the features that Android can proudly stand out from iOS. Just like the remote desktop control application, but for Android, AirDroid allows you to control the device remotely from the web browser. This application allows transferring wireless files to or from the device, sending SMS messages from the desktop, viewing notifications and managing, installing and uninstalling remote applications. In addition, AirDrop even allows users to locate, lock or delete data remotely.

## Download : AirDroid

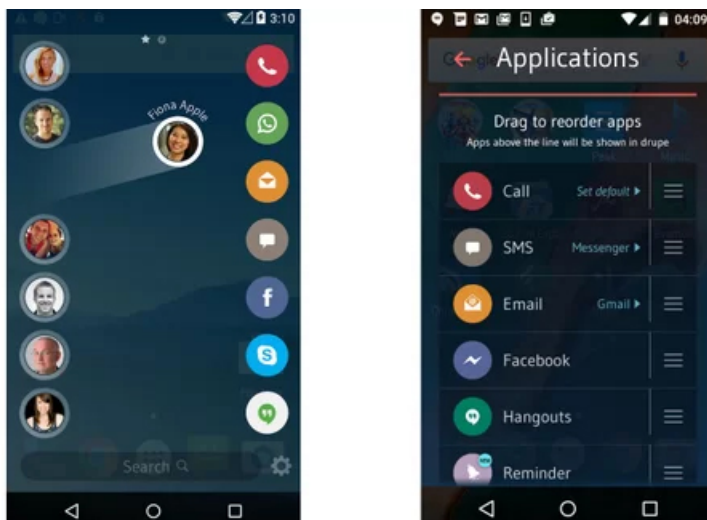

## 7. Flud

Another kind of application that you can't find on iOS devices is the torrent download application. Flud may not be as popular as other BitTorrent apps like Vuze or uTorrent but it is a great mobile torrent application. The latest version of Flud has a Material interface, unlimited upload or download speeds, selective file downloads, file download priority, magnet link support, sequential download and download-only mode WIFI. The free version is fully functional, but if you want to remove ads you can upgrade to the paid version.

## 8. Drupe

With the current social media network, we have tons of ways to communicate with family, friends and colleagues from email, SMS to chat application. Drupe is an Android contacts management application designed to link all contacts so that users can easily access frequently used contacts. Drupe displays all of the user's contacts in a list, accompanied by a series of contact apps on one side of the screen. You just need to drag and drop the contact to one of those applications, Drupe will launch the default application, make calls, send emails, SMS and chat instantly. In addition, Drupe has a dialer, recent communication history and some other features.
