

# Great recruitment needs, a blockchain engineer can get the salary level equal to the AI ??developer

On average, blockchain engineers earn from \$ 150,000 to \$ 175,000, which is quite high compared to the average salary of software engineers, \$ 135,000.

Hired, a company that helps clients recruit San Francisco-based technology industry candidates, recently put together a close look at the average volume of blockchain engineers. Accordingly, the average blockchain engineers earn from \$ 150,000 to \$ 175,000, which is quite high compared to the average salary of software engineers, \$ 135,000. In fact, professional engineers' wages for blockchain are always higher than for other specialized technical engineers and equivalent to developers specializing in artificial intelligence.

Currently, although the value of the digital currencies may decline but because large companies are starting to work and deploy projects that use blockchain technology, the need for blockchain engineers remains high. Big tech firms like Facebook, Amazon, IBM and Microsoft have a job list for blockchain engineers.

Mehul Patel, Hired's CEO, knows that the demand for jobs related to blockchain is very high, but the number of software engineers is not much, so the higher salary for them is understandable. Blockchain engineers, always welcomed by big technology companies with attractive salaries.

According to Hired, job positions like back-end engineers (programmers behind the server), system engineers and solution architects now all require skill on the blockchain.

According to the share of many blockchain engineers, to be proficient and professional in the array of blockchain engineers need to know about computer networks, database design and cryptographic computing skills.

Blockchain engineers use many programming languages ??such as Java, JavaScript, C ++, Go, Solidity and Python to write code.
