Not all pdf converters are the same. This article will help you choose the best and most effective tool to convert pdf files to words

PDF is the most common file format not inferior to .doc, .docx, .xlsx, ppt formats in Office. .Pdf files are often used when printing - avoid font and formatting errors when opening on another machine; It is also used for sharing but does not want other users to edit it again.

Those are the advantages of a .pdf file, but it is also an inconvenience. A lot of cases you find documents but only find .pdf format without other formats such as .doc, docx, . then want to edit, get content is quite difficult. So a lot of applications both online, the software installed on the computer has a feature that helps you **convert PDF to Word** .

However, not all pdf converter apps are the same, you have probably encountered the case of files after converting font errors, formatting errors and almost unusable. So this article will help you choose the best **tool** , the most effective way to **convert pdf files to .doc or .docx** .

If you have used many tools both online, software that cannot be transferred, or transferred font errors, formatting errors, . **Click here** to read the manual for specialized software with the best effect about slightly bigger and harder to install)

What types of .pdf files are there?

With .pdf format is not necessarily the same, there are 3 main types below:

1. **PDF files, when opened in readers, can be highlighted, copied, copied and searched:**

1.1 TỔNG QUAN

Dầu bôi trơn là vật liệu
các máy móc, thiết bị ở các d

With this format, you can Copy PDF directly to Word. Or use the tool to **convert pdf to word online** or **free tools** can convert to word easily without errors.

1. **The file format has been edited so you can read it but not copy, can't search for content.** With this format, even if you choose to select the Select text section of Foxit Reader, you cannot highlight the content. So this format needs more professional pdf converter software to extract the exact content without font errors or layout changes.
2. **Pdf scan from image:** Super hard to convert. However, if the scanning quality is good ~ almost equivalent to the 2nd pdf file, it can still be converted if it's just simple content, no tables or formulas, .
