

Guide to creating presentation slides using ChatGPT

Currently, users can create slides on ChatGPT through Thinking mode, a mode that provides in-depth analysis of the documents you upload and offers more professional feedback to users.

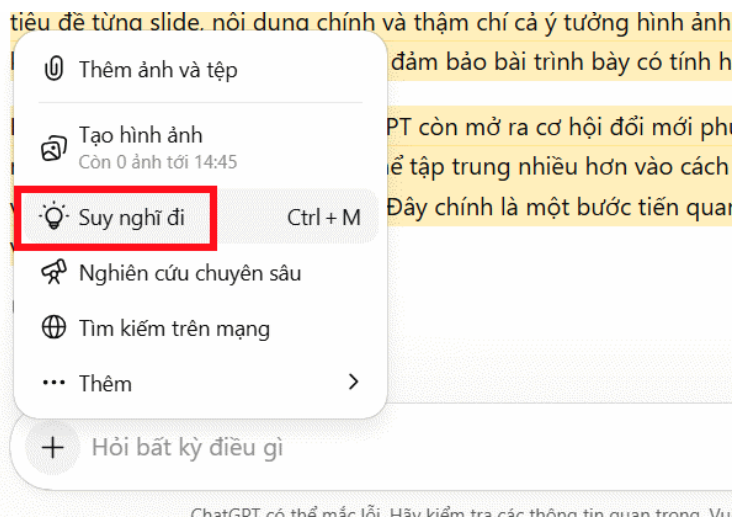

Currently, users can create slides on ChatGPT through Thinking mode, a mode that deeply analyzes the uploaded document and provides more professional feedback. With ChatGPT's support, we can quickly transform raw content into a clear, logical slide outline that closely follows the content objectives.

Simply provide the topic or material, and the tool will suggest a presentation structure, slide titles, main content, and even ideas for illustrative images. This significantly saves presentation preparation time while ensuring a systematic presentation. Below is a guide to creating presentation slides using ChatGPT.

How to create presentation slides using ChatGPT

Step 1:

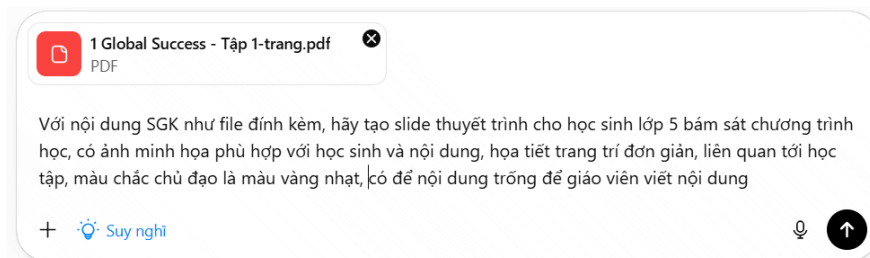

First, you need to switch to **Deep Thinking mode on ChatGPT** to use it.

Step 2:

Next, we upload **the data file to ChatGPT**, for example, in this case, it will be a textbook slide. Then, you enter the command to request slide creation from this file. The more detailed the request, the easier it will be for ChatGPT to analyze and create the slides for you.

The command content will include the following parts: slide object, which part of the slide to create, or to create from the entire content, the slide style you want to use, colors in the slide, how to use images, whether there is space to insert content, etc. You can specify which part of the slide you want to create, the style, the images, and whether you need to leave space to insert an AI video, etc.

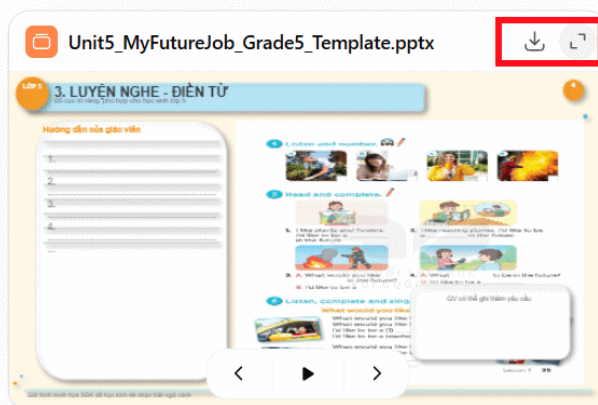

Step 3:

Immediately afterwards, the process of analyzing the original document to create presentation slides begins. You will see the results below, matching the requirements we have set.

Click the **expand icon** to view the content in the slide .

Mình đã tạo xong file slide PPTX theo phong cách vàng nhạt, đơn giản, có hình minh họa cho học sinh lớp 5 và nhiều ô trống để giáo viên điền nội dung.

Step 4:

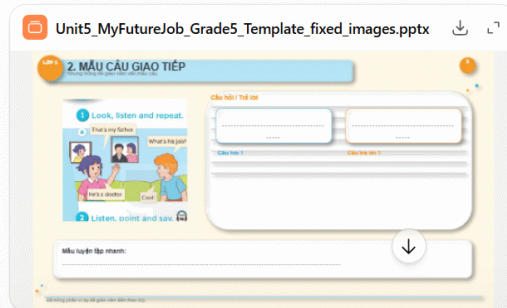

Review your presentation slides, and if you're not satisfied with any part , **enter your requests for revisions** to create a better slide. Remember to keep the "Think" mode selected so ChatGPT can continue analyzing and developing your ideas.

điều chỉnh lại hình ảnh trong slide đẹp hơn và không bị méo

Minh sẽ chỉnh lại bố cục ảnh trong slide để ảnh rõ hơn, không bị kéo méo và nhìn đẹp, cân đối hơn. Minh đang mở file slide hiện tại để sửa trực tiếp.

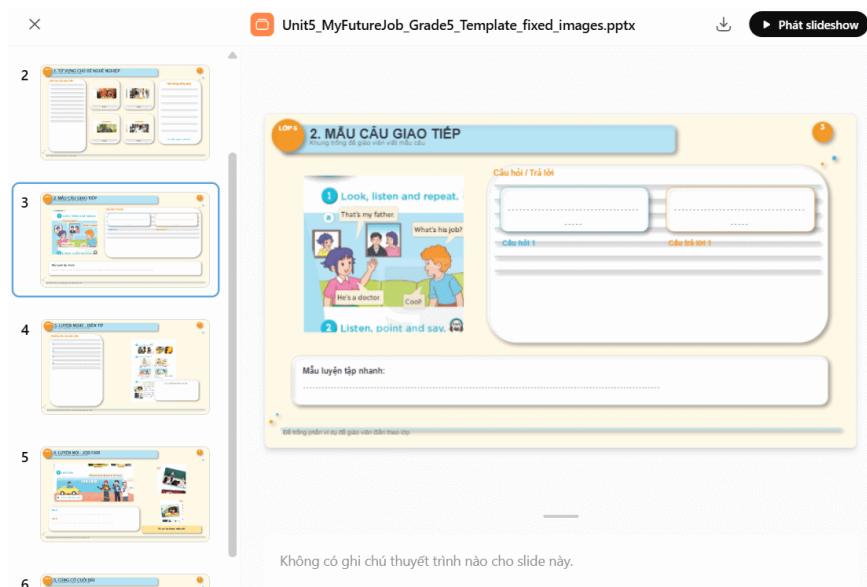

Đã suy nghĩ trong 1m 35s >

Minh đã chỉnh lại toàn bộ hình ảnh trong slide theo hướng giữ đúng tỷ lệ, không bị méo và nhìn gọn hơn.

Step 5:

Finally, we **click the download icon** to download the slides and proceed to edit them to get a more polished slide.
