

Guide to quickly creating AI quiz questions

Below is a guide for teachers on how to create AI quizzes on the Wayground website. Teachers don't need to enter any commands; they can instantly have a set of review questions for their students.

Besides using prompts to create interactive games on Canva or Gemini, teachers can also use several AI-powered websites to assist in creating question sets and supporting their teaching. Below is a guide on how to create an AI quizzz question set on the Wayground website without needing to enter any commands, providing instant review questions for students.

How to create AI quizzes on Wayground

Step 1:

Teachers **access the website wayground.com** and then register an account using their Google account.

Đăng nhập vào tài khoản Wayground của bạn

	Tiếp tục với Google	→
	Tiếp tục với Email	→
	Tiếp tục với Facebook	→

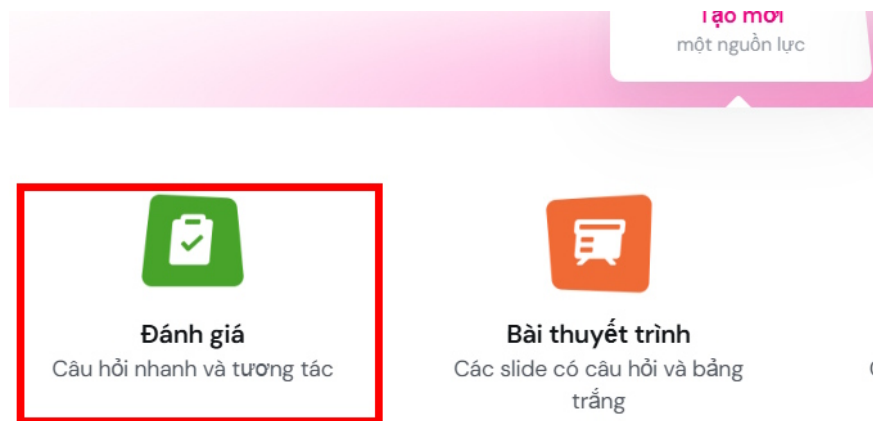

hoặc tiếp tục với

Step 2:

After creating an account, **click "Create New"** in the interface to proceed.

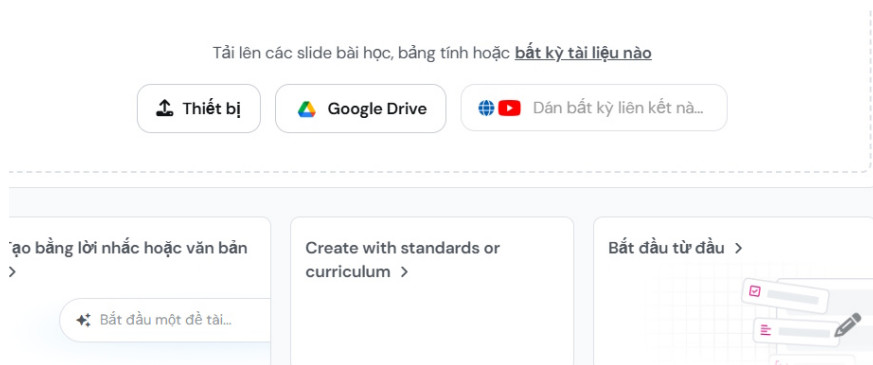

At this point, you'll see several different content creation options; **click on "Review"** to proceed.

Step 3:

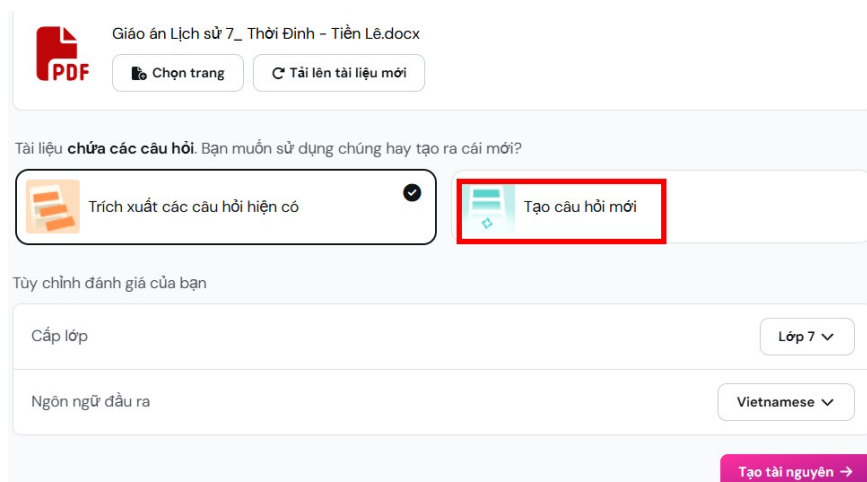

In the interface, you **can choose how to create content** . You can **upload your lecture content file** to use as a basis for creating Quizizz questions. Or, below, you can enter commands to create questions based on any topic or knowledge area you want.

For example, here we will download the lesson plan file as a reference data source.

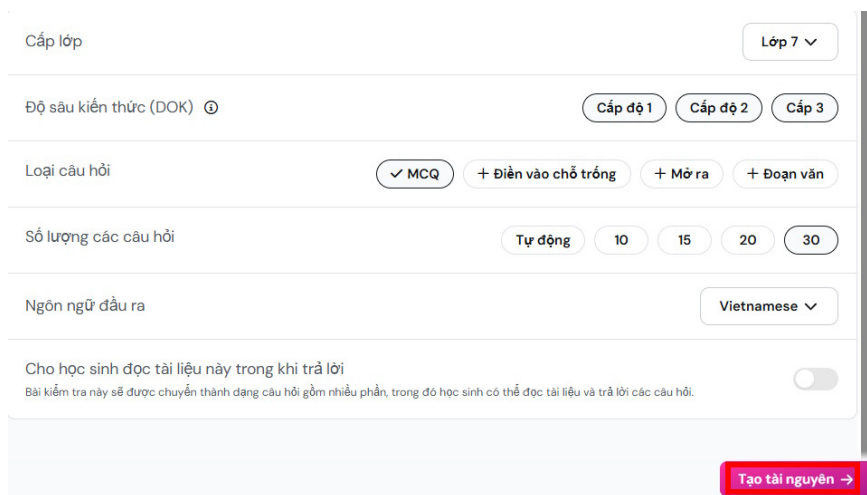

Step 4:

Upon switching to the new interface, teachers will be asked whether to use an existing question or create a new one; **select "Create new question"** to proceed.

The screenshot shows the top part of the Quizizz interface. At the top, there is a PDF icon and the text "Giáo án Lịch sử 7_ Thời Đinh - Tiền Lê.docx". Below this are two buttons: "Chọn trang" and "Tải lên tài liệu mới". The main question is "Tài liệu **chứa các câu hỏi**. Bạn muốn sử dụng chúng hay tạo ra cái mới?". There are two options: "Trích xuất các câu hỏi hiện có" (with a checkmark) and "Tạo câu hỏi mới" (highlighted with a red box). Below this is a section for "Tùy chỉnh đánh giá của bạn" (Customize your assessment) with fields for "Cấp lớp" (set to "Lớp 7") and "Ngôn ngữ đầu ra" (set to "Vietnamese"). A "Tạo tài nguyên" button is at the bottom right.

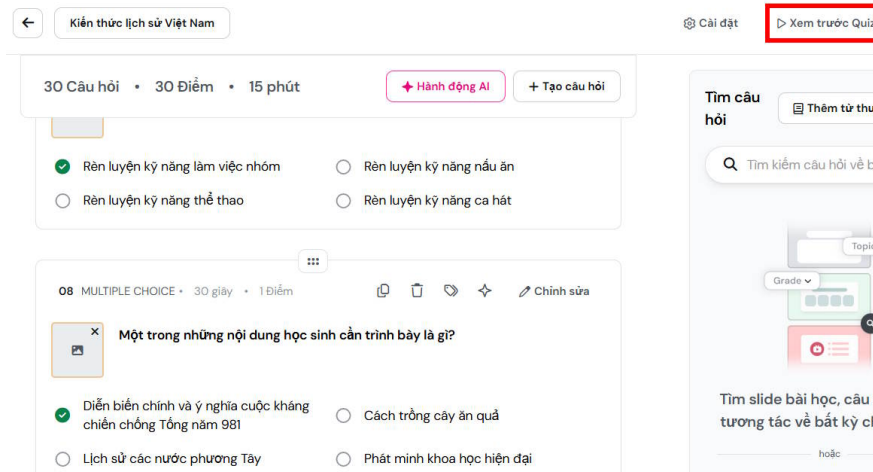

At this point, teachers **select the question type and number for the question set, the difficulty level for the question set** they want to use, and then **click "Create Resource"** below.

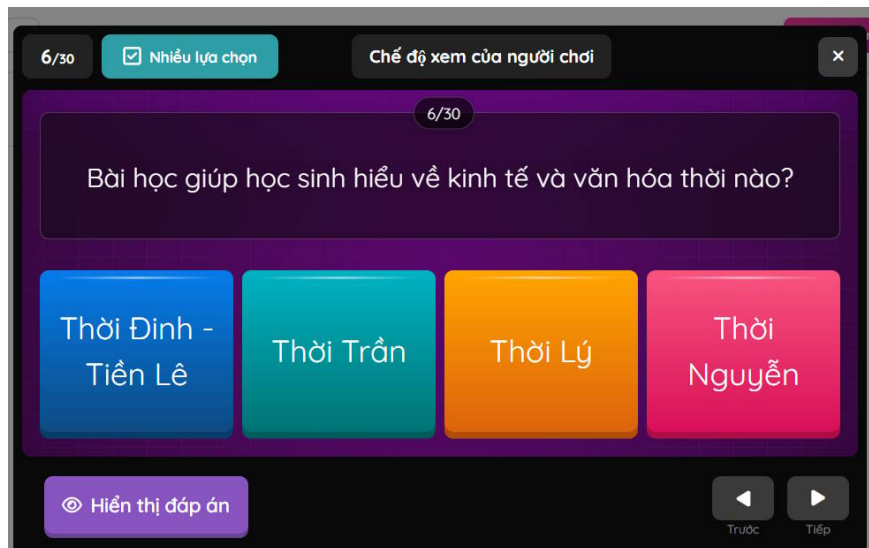

The screenshot shows the question settings section of the Quizizz interface. It includes fields for "Cấp lớp" (set to "Lớp 7"), "Độ sâu kiến thức (DOK)" (with options "Cấp độ 1", "Cấp độ 2", "Cấp 3"), "Loại câu hỏi" (with "MCQ" selected and options "+ Điền vào chỗ trống", "+ Mở ra", "+ Đoạn văn"), "Số lượng các câu hỏi" (with "Tự động" selected and options "10", "15", "20", "30"), and "Ngôn ngữ đầu ra" (set to "Vietnamese"). There is also a toggle switch for "Cho học sinh đọc tài liệu này trong khi trả lời" (Let students read this material while answering) which is currently turned off. A "Tạo tài nguyên" button is at the bottom right.

Step 5:

Wait a moment and you will immediately receive **a set of Quizizz questions with answers** based on the materials and settings you previously selected. You can click **the pen icon to modify** or delete questions. Click on **Preview Quiz** to see the content.

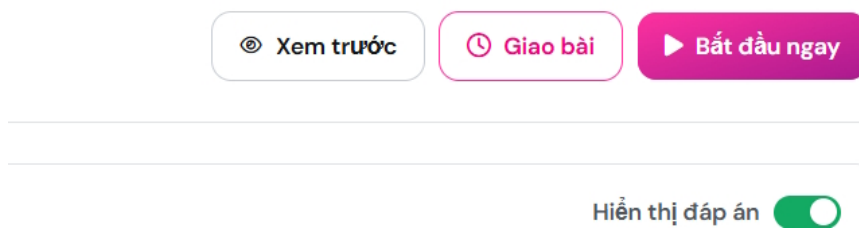

The basic interface of the Quizizz question set from the document you uploaded is shown below. **Then click on the Publish button** in the upper right corner.

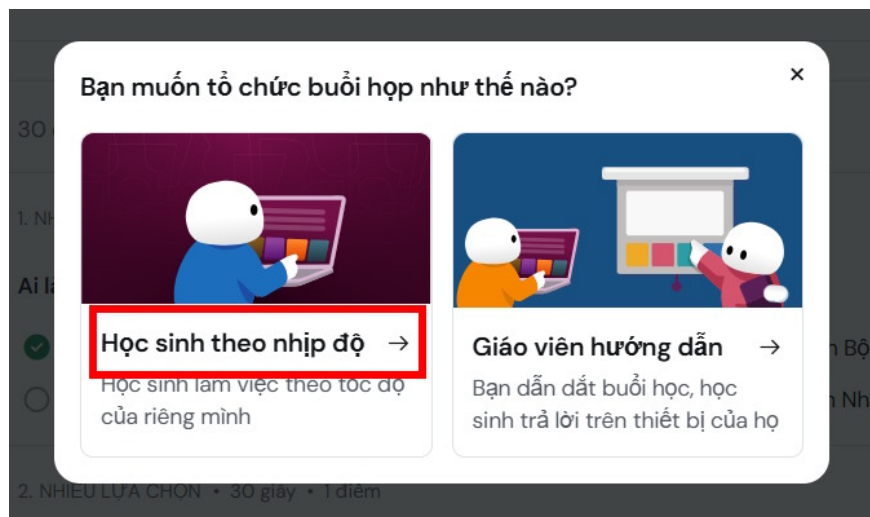

Step 6:

Teachers can click on "Start Now" in the upper right corner to send the link to the students.

Continue selecting "Students at their own pace" so that they can work on the assignment independently without the teacher having to directly send them questions.

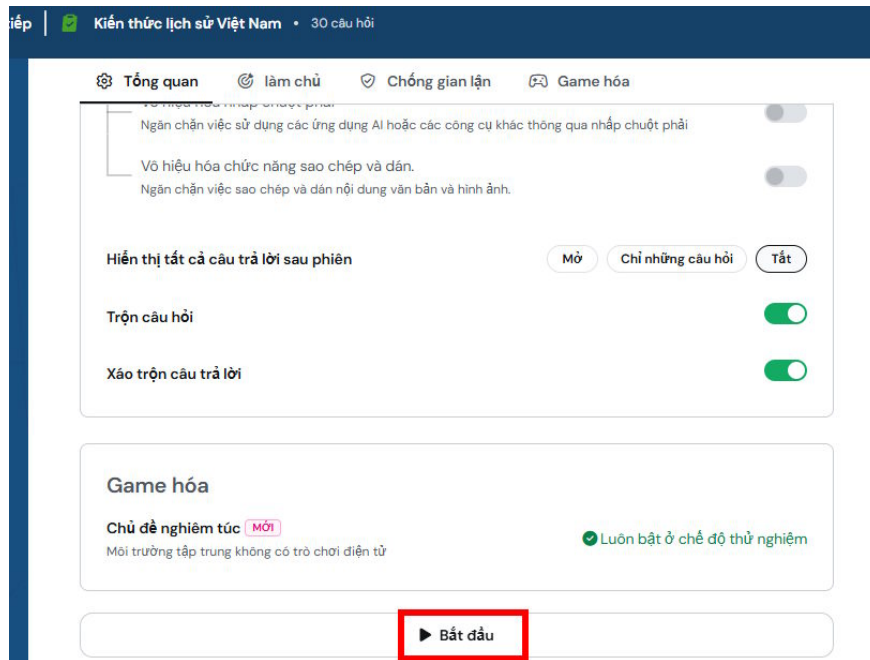

Step 7:

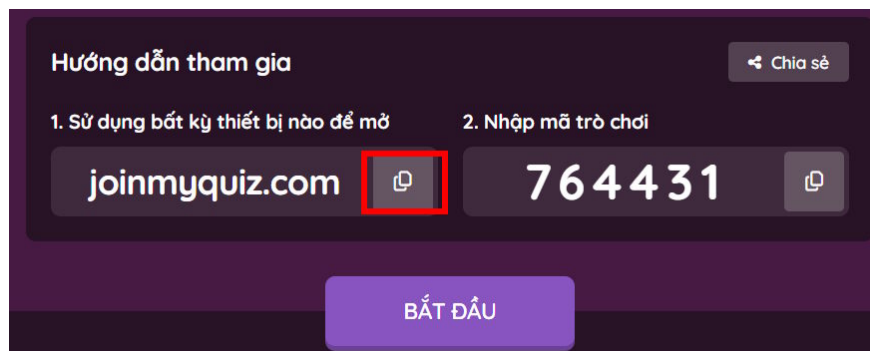

Now select **Test Mode** so students can complete the assignment individually.

In the interface shown in the image, you can see the teacher **setting up rules for students to answer questions** . You can enable question shuffling to prevent cheating. Press **Start** to proceed.

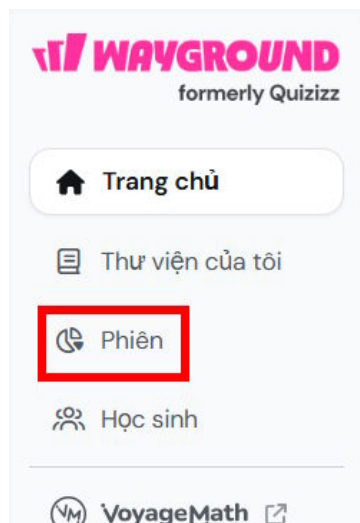

Click the link icon to send the test to participating **students** . **Students need to fill in** their names and complete the test. All answers will be sent back.

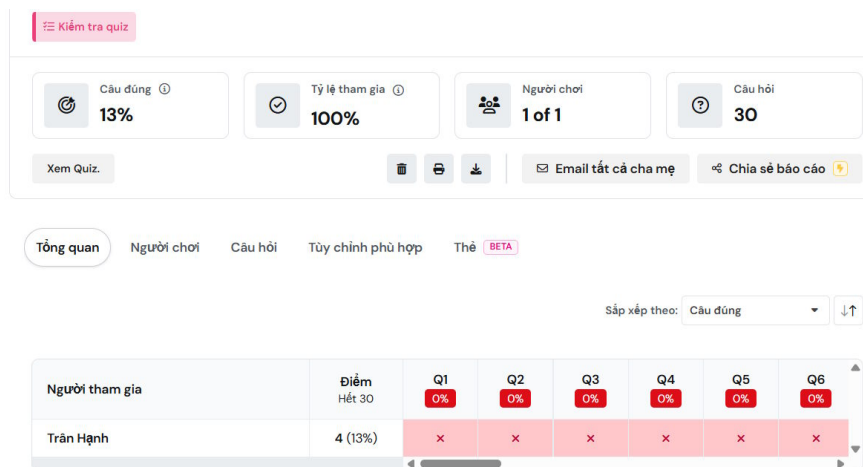

Step 8:

To check and evaluate students' work , teachers click on the **"Session"** section and then select the test for which they want to view student information.

At this point, teachers will see an overview of the students' answers, along with correct and incorrect answers.
