

# Guide to creating slides using Faces app AI

Thanks to the support of artificial intelligence tools like the Faces App AI application, users can quickly design impressive, creative slides suitable for various purposes.

Thanks to the support of artificial intelligence tools, such as the Faces App AI application, users can quickly design impressive, creative slides suitable for a variety of purposes, from learning and teaching to business and communication.

Faces App AI not only automates the content creation process but also suggests layouts, images, and design styles, enabling even inexperienced users to create high-quality products. Below is a guide to creating slides using Faces App AI.

## How to quickly create slides using Faces App AI

### Step 1:

First, access the link below to go to the Faces App AI website and then register an account to use it.

<https://faces.app>

## Create your account

Welcome! Please fill in the details to get started.

### Step 2:

On the main interface of Faces App AI, first look to the right and **select "Pick up a template"** to choose a template for your slideshow.

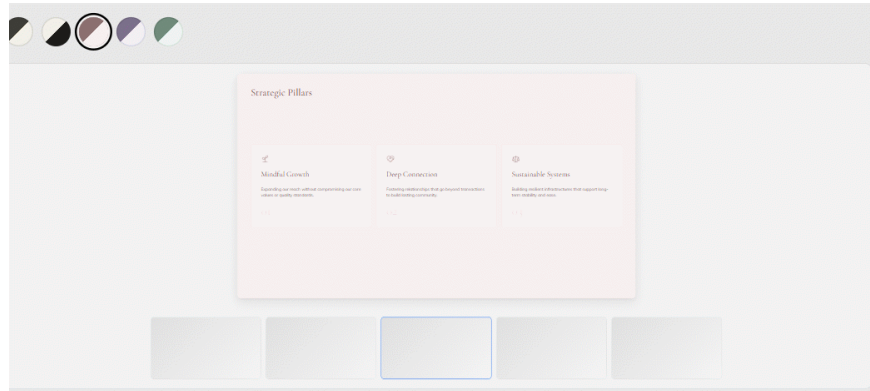

Then you will see many **presentation slide templates** to choose from. Select the slide style you want to use.

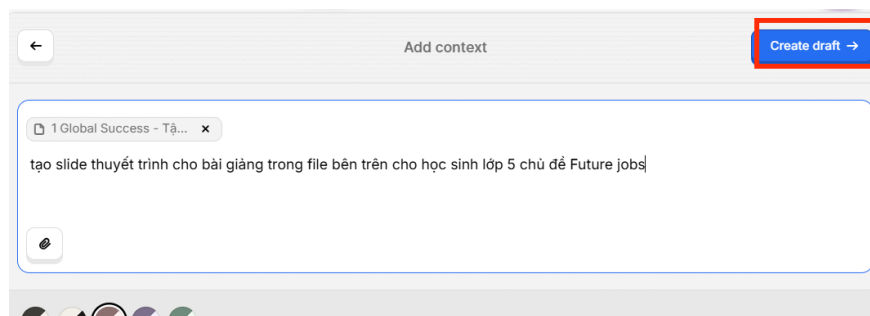

### Step 3:

Switch to the new interface, first **choose the color you want to use for the slide**, from several pre-set colors supported by Faces App AI.

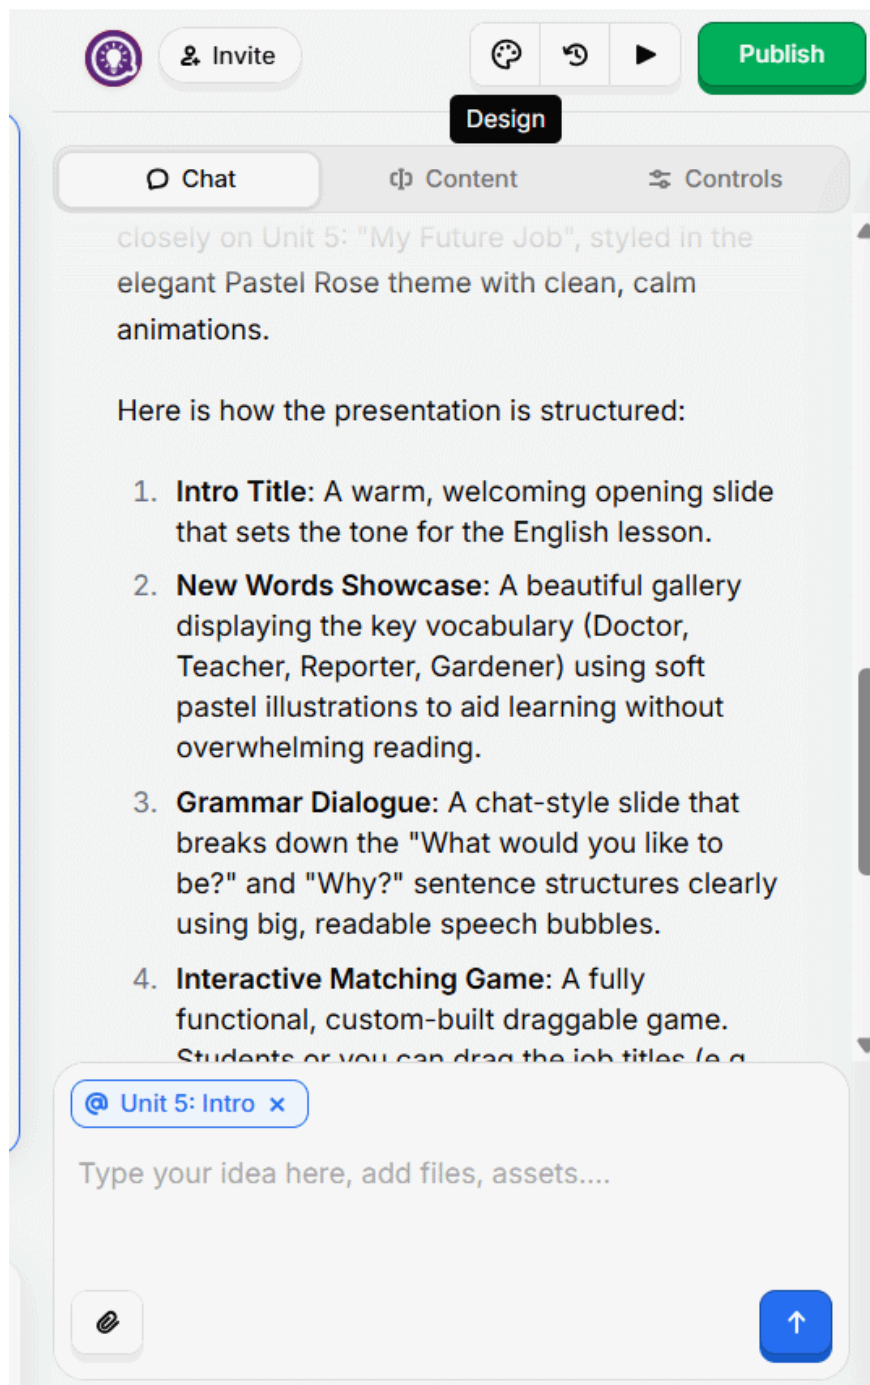

Then, above, you can **upload reference documents** or **enter the topic you want to create slides** for Faces App AI to work with. After that, **click "Create draft"** in the upper right corner to generate a draft slide.

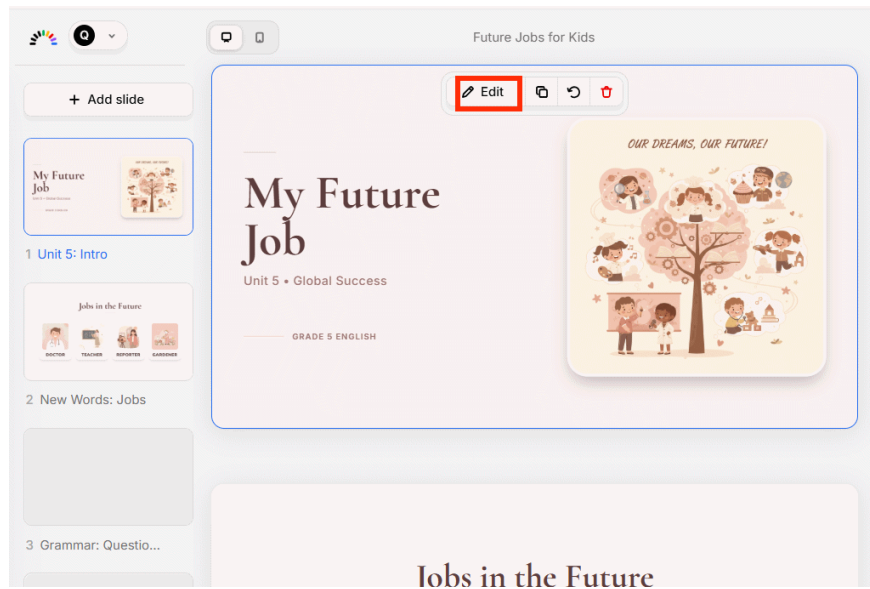

### Step 4:

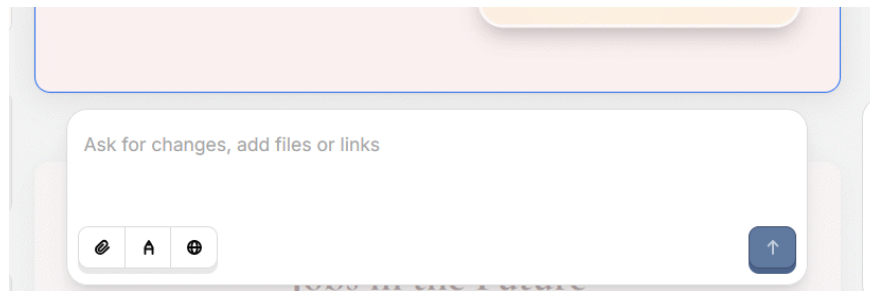

Wait a moment while Faces App designs the slide content based on your file, link, or description. Then, you'll see a **brief description of the structure of the created presentation slides**.

Next to it is a slide created from the document we uploaded. You can **click Add slide to add** a slide page, or click **Edit to edit** this slide.

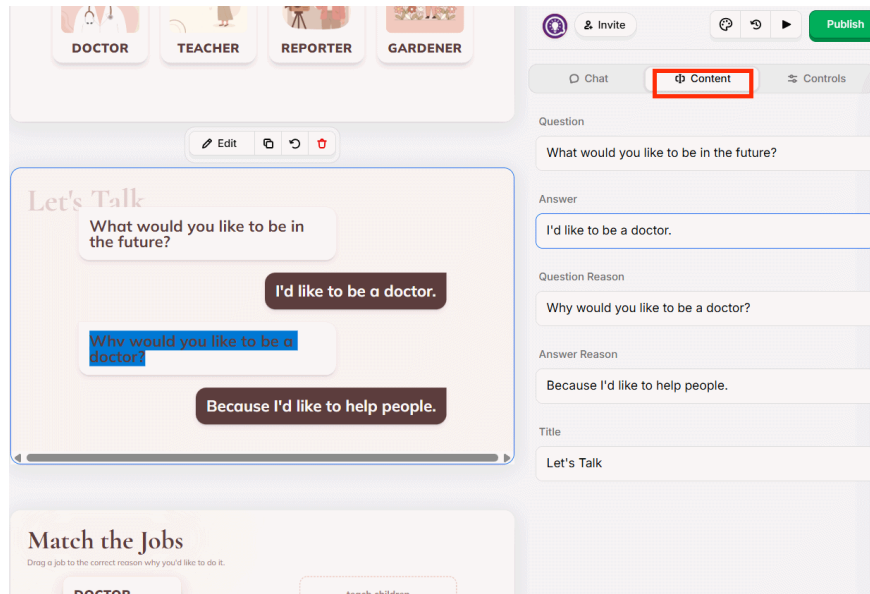

At that point, a box will appear below where we can enter content to edit the current slide.

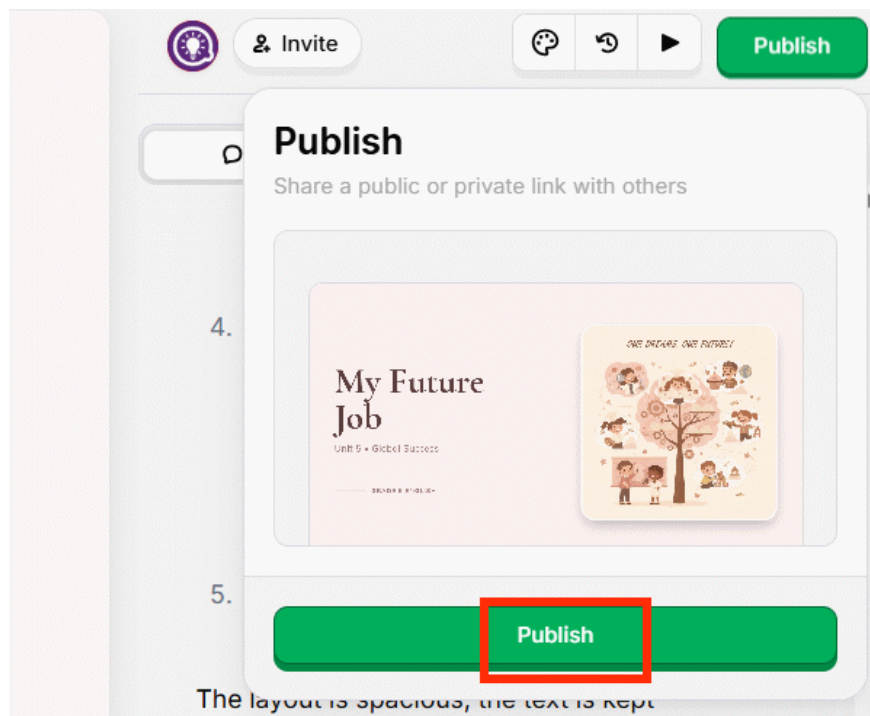

### Step 5:

To **edit the content in a slide**, click on the slide, then look to the side **under Content** to edit each line of content.

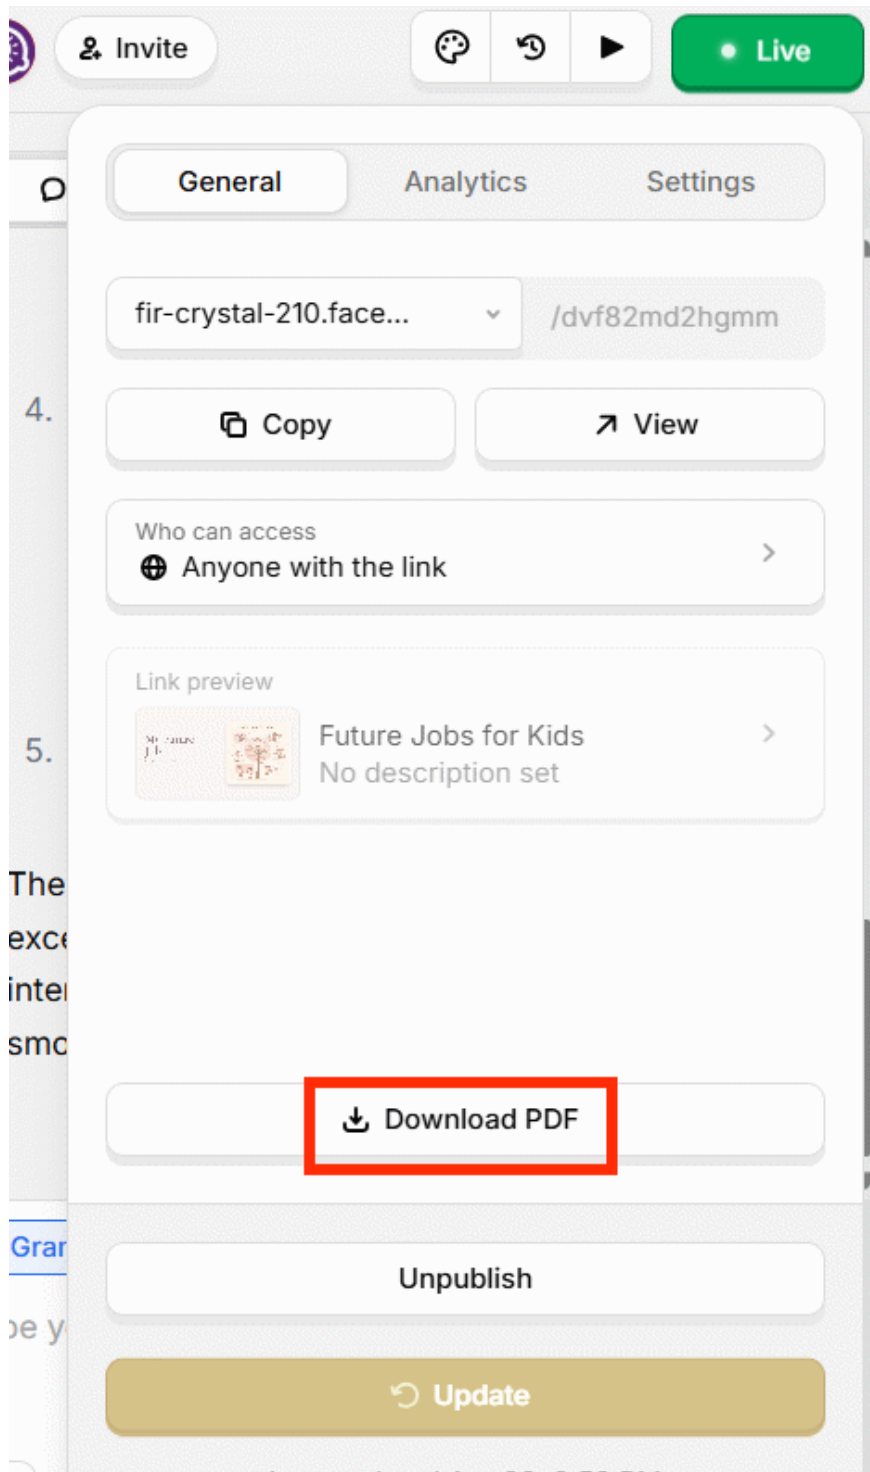

### Step 6:

To upload your presentation slides if needed, **click Publish** in the upper right corner of the interface.

Then we can use the link or download it in PDF format.
