

# Guide to fixing font errors in images using Canva AI

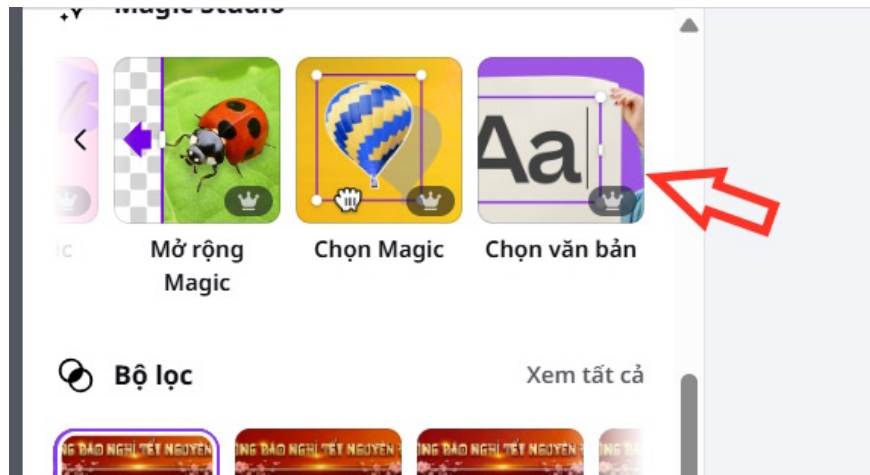

One common problem when creating images using the free version of Canva AI is font errors. In that case, you can use Canva AI to correct the content to your liking.

One common problem when creating images using the free version of Canva AI is font errors. In that case, you can use Canva AI to correct the content to your liking, changing the text with font errors using the Text Selection tool in Canva AI. Below is a detailed guide on how to fix font errors in AI images using Canva AI.

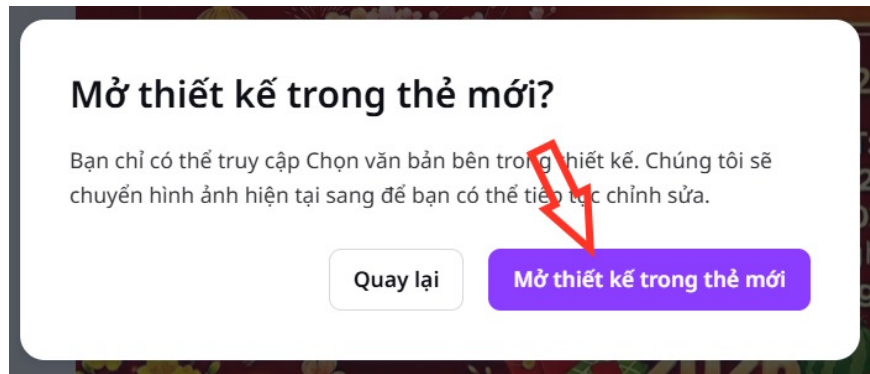

## Guide to fixing font errors in images using Canva AI

### Step 1:

You access your Canva AI account and then **upload the image you want to edit** . Next, we **select the Select Text tool** .

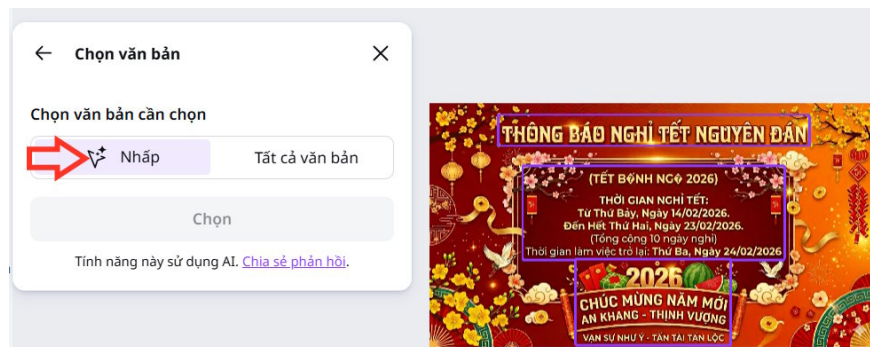

Next, we **open the image in a new design** in Canva AI to proceed with fixing the font errors.

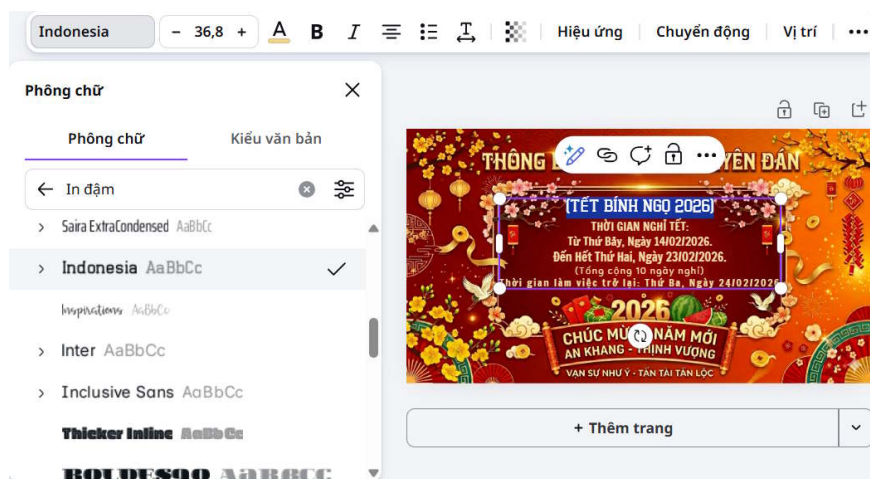

## Step 2:

At this point, you will see the tool options: " **All text**" or " **Click** to select only the text you need to correct for font errors." After **selecting the text area** to be edited, click the "Select" button below.

## Step 3:

Immediately afterwards, you will see the text indicating a font error, prompting you to make corrections. **Select the font again** and retype it into the design. We will **then select the font style** and size to change the area containing the font error.

Finally, once you've finished, download it to continue your work.
