

# Guide to acquiring Pets in GTA Online Mansion Update

Here's how to buy a cat or dog in GTA Online through the new mansion system, priced at \$15,000 per pet.

Pets have finally arrived in GTA Online , bringing the ability to decorate and 'breathe life' into your new safehouse. This feature was added by Rockstar in the A Safehouse in the Hills update, allowing players to adopt adorable four-legged friends. Not just for display, you can pet, interact with, and watch them roam around your safehouse. Below is a detailed guide on how to get pets in GTA Online.

## How to buy pets in GTA Online

To acquire a pet, players must first own a mansion. Los Santos currently has *three high-end mansions* , each with its own price and design. You can choose the one that suits you best before you start 'acquiring pets'.

After owning a mansion:

## 1. Buy a cat

1. Enter the Living Room.
2. There will be a cat bed on the table.
3. Interact to open the menu for purchasing cats.

## 2. Buying a dog

1. Go to the backyard.
2. There will be a doghouse in all three mansions.
3. Interact to buy a dog.

Both cats and dogs can be given custom names. Players can also choose the breed and coat color, all at a fixed price of \$15,000.

## List of pets in GTA Online

Currently, GTA Online has two types of pets: *Cats* and *Dogs* . Although the number isn't large, the system offers a wide variety of colors and breeds.

### Cat List

Each cat breed has only one fixed color according to Rockstar's design:

1. White
2. Calico (Tribody)
3. Ginger (Orange)
4. Gray
5. Black

## Dog List

Dog breeds are much more diverse, and most come in a wide range of colors. The list includes:

1. Husky
2. Poodle
3. Pug
4. Holder
5. Rottweiler
6. Shepherd
7. Laly

All dog breeds are priced the same regardless of color.

## Is it possible to pet pets in GTA Online?

Yes, players can absolutely pet cats and dogs in the safehouse. Simply approach the pet and press the right button on the D-Pad, and the character will perform an adorable petting animation.

This is one of the small details that brings a lively feel to the villa, making the experience more enjoyable and authentic.

With the Mansions update, Rockstar brought an incredibly adorable feature to GTA Online – allowing gamers to create more realistic living spaces with their four-legged friends. For just \$15,000, you can own a cat or a dog, name it, choose its breed and color as you like.

Which companion would you choose? A loyal Husky or a playful Ginger cat?
