

Guide to creating integrated NLS lesson plans using AI

An integrated digital competency lesson plan is a lesson plan that incorporates the use of digital technology or digital transformation into the teaching and learning process. Below is a guide to creating an integrated digital competency lesson plan using AI.

An integrated digital competency lesson plan is a lesson plan that incorporates the use of digital technology or digital transformation into the teaching and learning process. Teachers will utilize AI tools in lesson content, creating videos, images, simulations for lesson content, and interactive AI-powered games for students. Below is a guide to preparing an integrated digital competency lesson plan using AI.

How to create integrated NLS lesson plans using AI

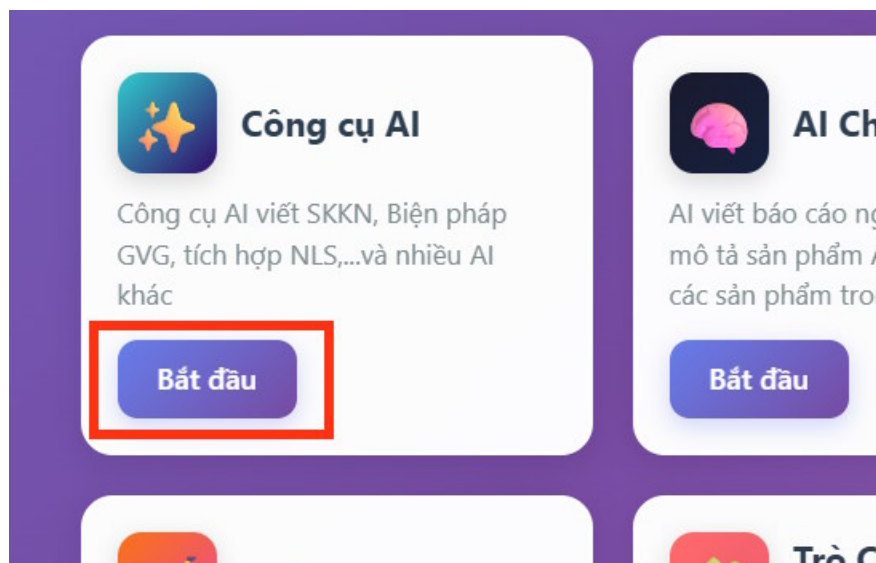

Step 1:

First, go to **the Innovative Teacher website** and then register for an account.

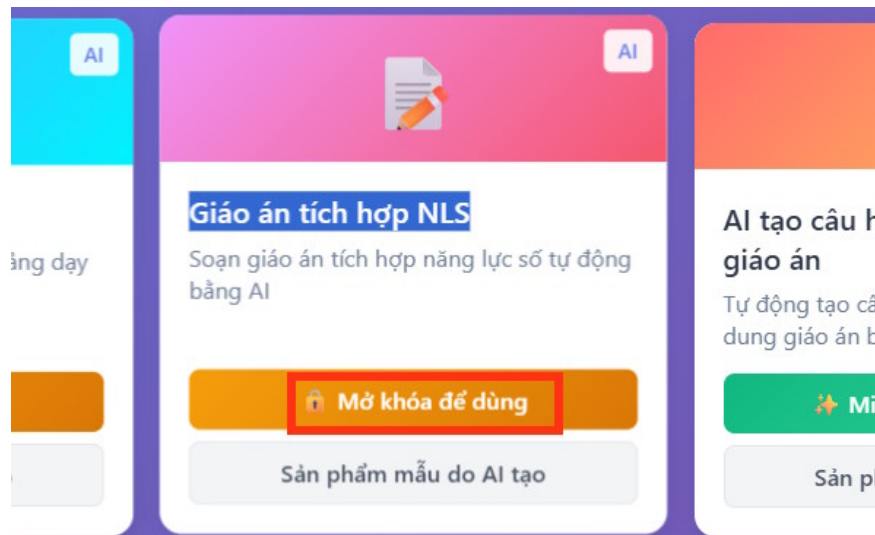

<https://giaoviendoimoi.com/>

Step 2:

Next, on the website interface, we click on **the "AI Tools" option** to use it.

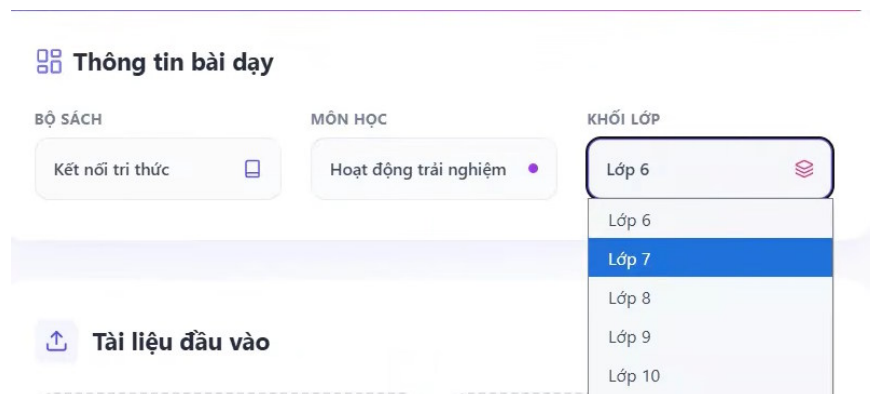

Next, **click on the NLS Integrated Lesson Plan** . Please note that this feature will upgrade your account, so teachers need to be aware of this. Click "Continue to the app" to continue using the application.

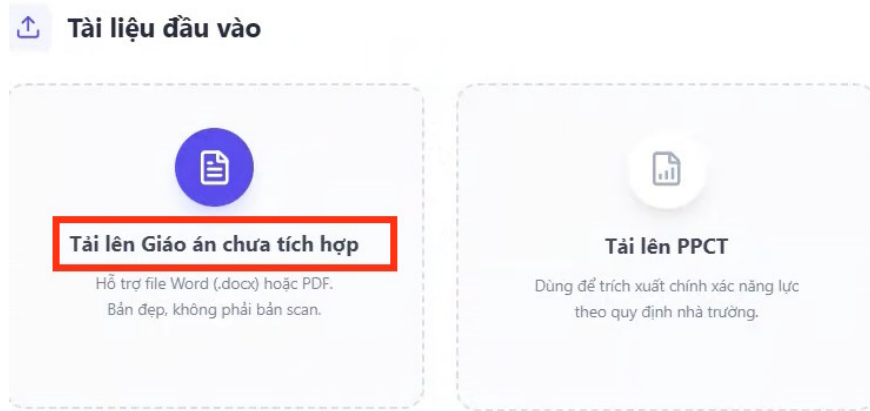

Step 3:

To access the main interface, teachers first **select the set of textbooks** they are using, **then choose the subject** for which they need to prepare lesson plans, and **the class** they are teaching.

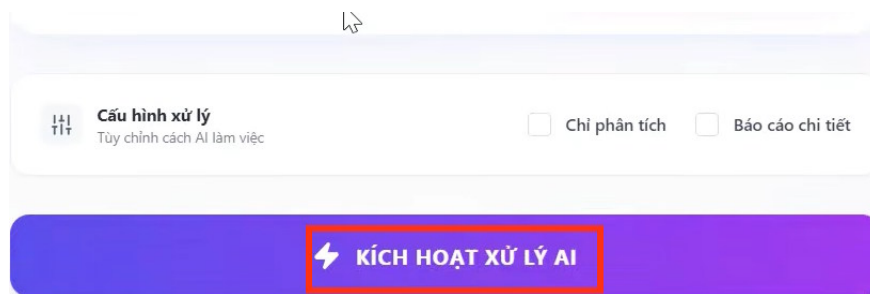

Step 4:

In the Input Documents section, we upload **a lesson plan without integrated NLS content** . After uploading, this AI tool will analyze your lesson plan.

Teachers should keep the other content unchanged so that the AI tool can automatically adjust it. Then, **click "Activate AI Processing"** to proceed with creating the NLS-integrated lesson plan.

Finally, teachers wait for the process of creating the new integrated Digital Competencies lesson plan to complete, then download it, and they're done.
