

# Guide to securing 2 layers of Facebook

For Facebook class 2 security, two Facebook authentication factors, we can do it by phone number or through Duo Security and Google Authenticator authentication application.

Recently, Facebook has updated 2 ways of securing Facebook classes, 2 factors authentication (2FA) for Facebook by Duo Mobile and Google Authenticator authentication applications. Previously to secure 2 layers for Facebook need a phone number. Then, when you receive the SMS, you can access your personal Facebook account.

However, recently the phone security system Facebook has been constantly bugging, sending SMS messages unrelated to users, the authentication application is a safer, more optimal option especially faster. When using Duo Mobile or Google Authenticator, you want to log in to Facebook just enter the security code provided by the application.

The following article of Network Administrator will guide you how to enable 2-factor authentication for Facebook, via application and via phone number.

1. How to permanently delete a Facebook account on a computer
2. How to secure your Facebook account so it won't be hacked?
3. How to turn off / hide Facebook nick even when online
4. Do you know how to login to a Microsoft account without a password?

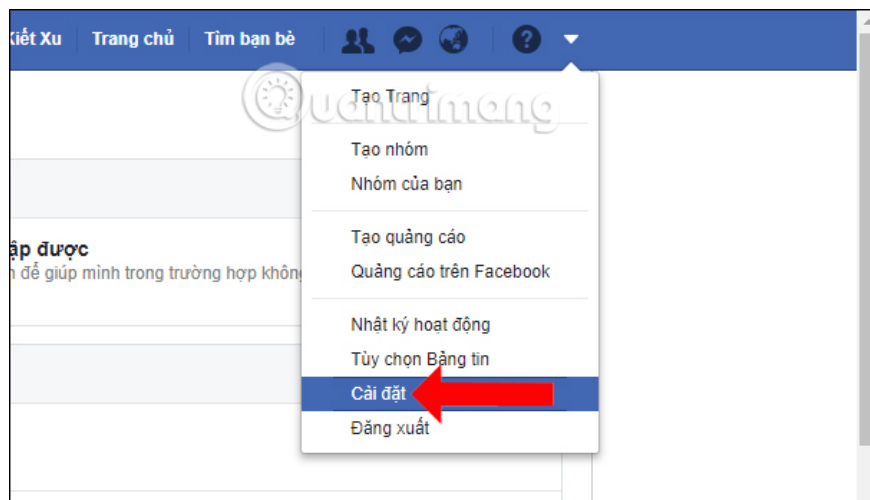

## 1. Turn on Facebook security via the authentication application

As mentioned to use this way, you need to download Duo Mobile or Google Authenticator application. Click on the link below to download the application.

1. Download Duo Mobile
2. Download the Google Authenticator app

### Step 1:

In your personal Facebook account, click on **the triangle icon** and select **Settings** .

## Step 2:

In the new installation interface, click on the **Security group and login** .

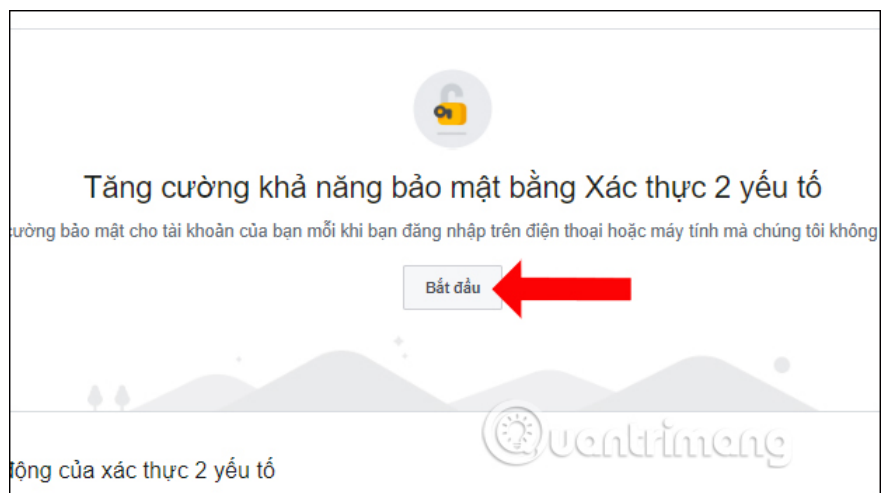

Next you look at the content on the right to find **2-factor authentication** , then click the **Use 2-factor authentication** option.

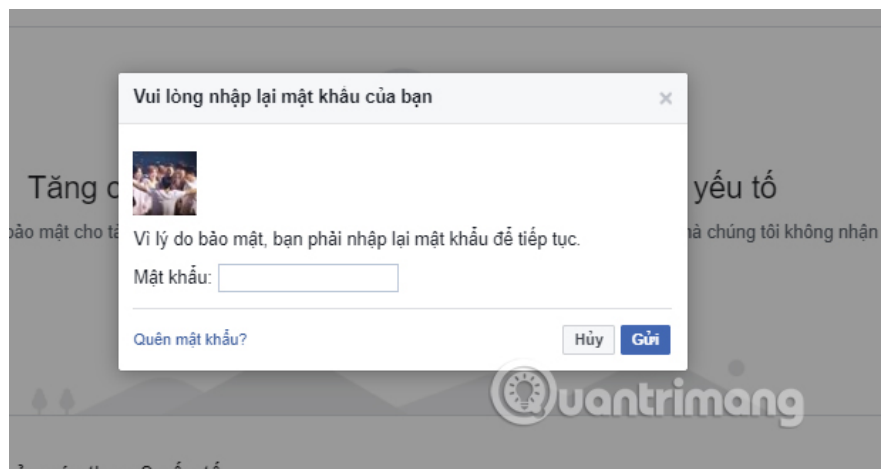

### Step 3:

Click the **Start** button to proceed to secure Facebook 2-factor authentication.

Now the system will ask users to re-enter their **Facebook password** .

#### Step 4:

Current 2-factor authentication on Facebook will have 2 ways via SMS text message about phone number, or via authentication application. Click on **the Authentication Application** and then press the **Next** button below.

#### Step 5:

Now users will be notified to use 1 of 2 Duo Mobile and Google Authenticator applications to turn on authentication. We will have 2 ways to proceed with the setup via a third-party authentication tool, via QR code or entering the authentication code. Click the Next button.

### Step 6:

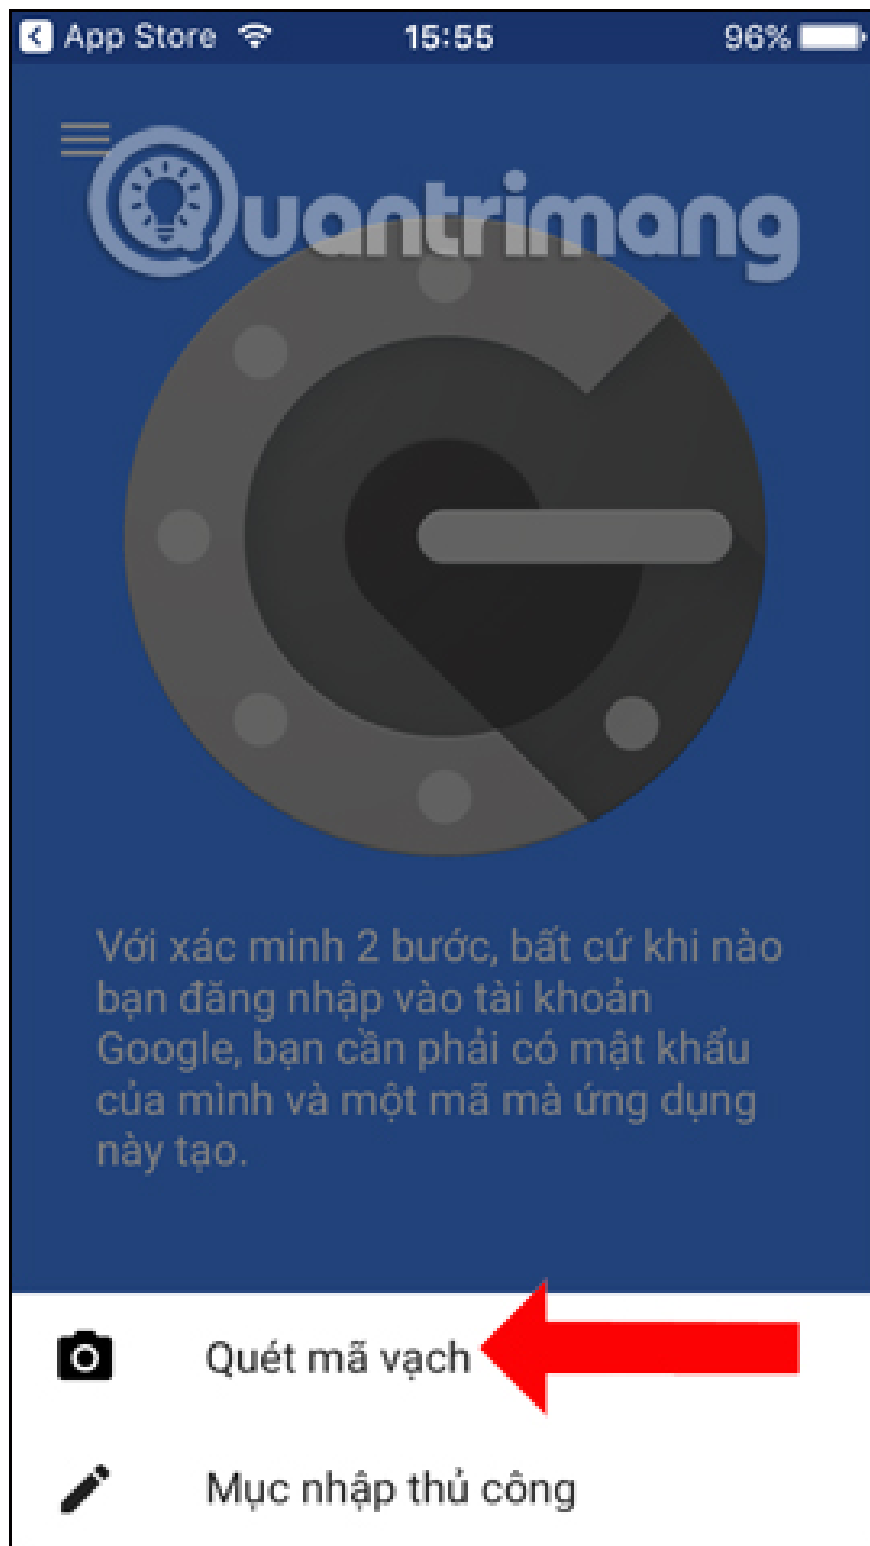

Now you open the application installed on the device, here is Google Authenticator, click **Start setup** . We will then be selected to set up. To scan a QR code, press Scan the barcode. If you want to enter the code, press Manual entry.

Với xác minh 2 bước, bất cứ khi nào bạn đăng nhập vào tài khoản Google, bạn cần phải có mật khẩu của mình và một mã mà ứng dụng này tạo.

**BẮT ĐẦU THIẾT LẬP**

**Step 7:**

You need to agree to the application **to access the camera** , press OK. Then simply **scan the QR code with the camera** to set up. We will immediately receive **the access code** . The code will have a expiry date. Time will change to another code.

OK

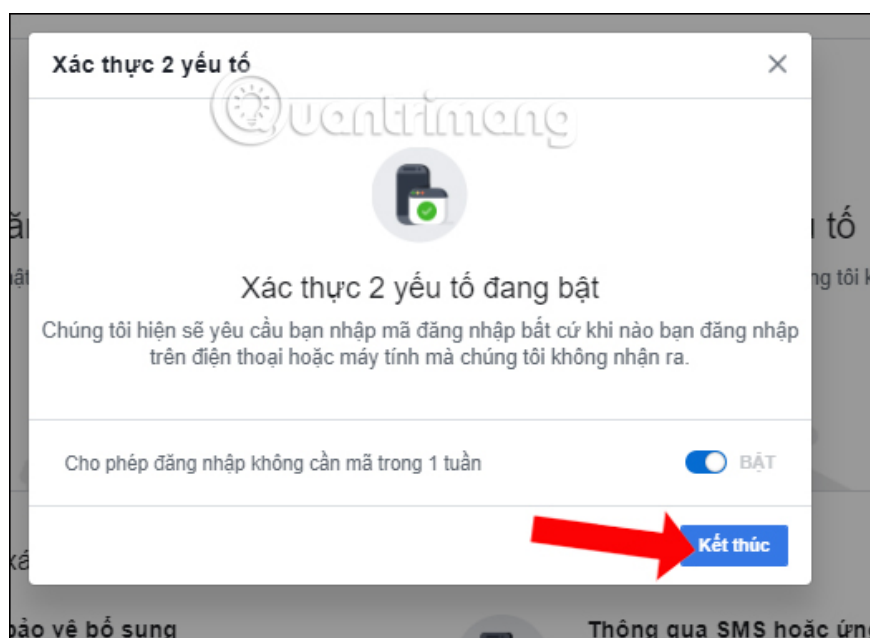

**Step 8:**

Or **enter the code on Google Authenticator application** into this interface of Facebook.

When you enter it correctly, you will receive a **confirmation of 2-factor authentication** and you have successfully secured 2 layers of Facebook via the authentication application. Users will have 1 week of login without code and you can choose to turn it on or off.

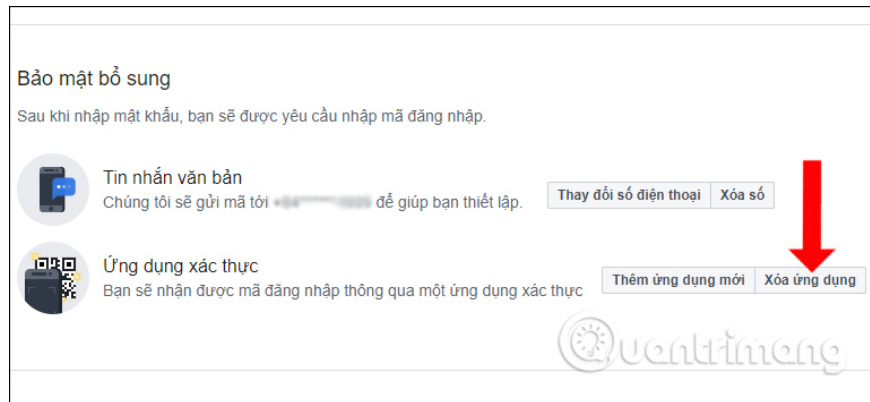

## 2. How to turn off Facebook 2-layer authentication via the application

### Step 1:

You also access the Security section and log in on Facebook and also click on the Use 2-factor authentication section.

Here we will see there are two ways to secure messages and applications. If you still **want to use the authentication element but switch to another authentication application**, click **Remove application** .

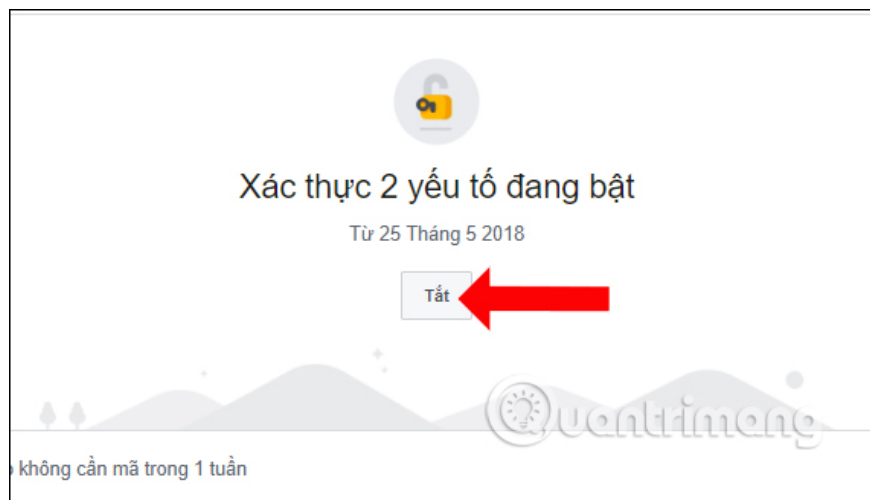

Facebook will ask if you are sure to delete the authentication application, press Delete.

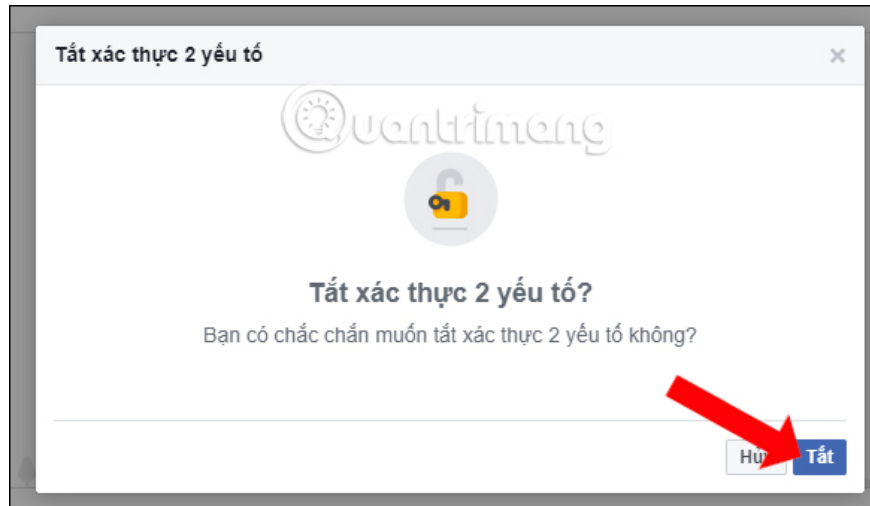

## Step 2:

To completely turn off the 2-layer Facebook security element , click the **Off** button above the interface.

Finally **click Off** to determine that you do not use 2-factor authentication on Facebook.

### 3. Activate Facebook layer 2 security via phone

To achieve efficiency as well as ease of implementation, you should make security 2 layers of Facebook on your computer.

#### Step 1:

First of all, we log in to your personal Facebook account. At the main interface, we click the arrow on the top right and select **Settings**.

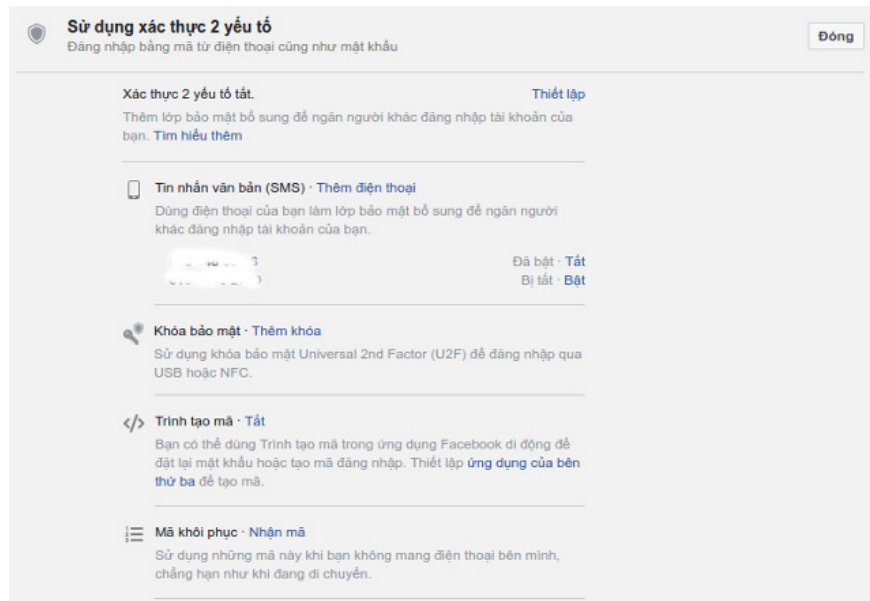

**Step 2:**

Next in the **Settings** interface, we click the **Security** item **and log** in the menu on the left of the interface.

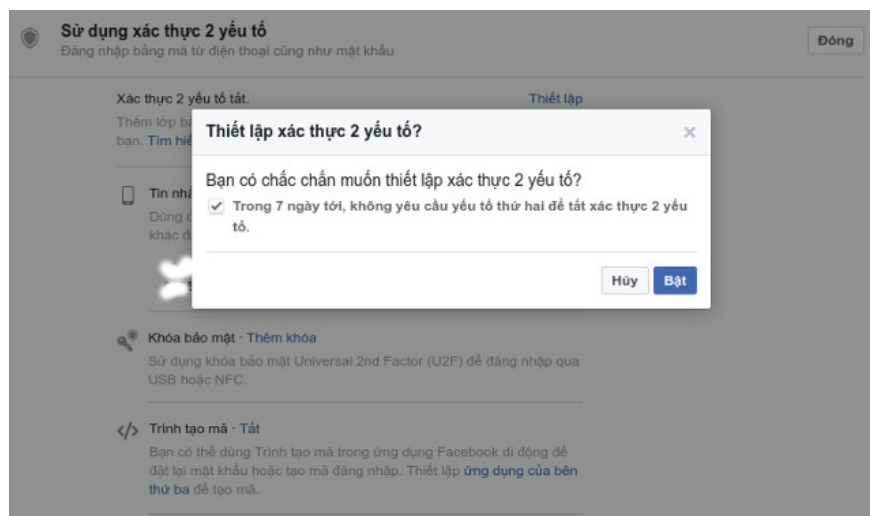

### Step 3:

You look to the right interface. Here, we go to the section **Using 2-factor authentication**, then select Settings.

Soon a new dialog box appears. Click on the **Enable** button to activate 2-layer security for Facebook.

#### Step 4:

In the **Setup** dialog box **providing the security code** , Facebook will ask the user to **enter the mobile phone number** , to receive the second security code message when we log into the Facebook account.

We enter the phone number, the Vietnamese area code by default, and then press the **Continue** button below.

**Thiết lập cung cấp mã bảo mật**

Để chúng tôi có thể gửi tin nhắn chứa mã bảo mật cho bạn, bạn cần thêm điện thoại di động vào Dòng thời gian.

Mã quốc gia: Việt Nam (+84)

Số điện thoại: 123456

Xác nhận số điện thoại bằng:  Gửi tin nhắn cho tôi

Nhớ rằng: Nếu bạn muốn thay đổi người mà bạn chia sẻ số điện thoại, hãy truy cập Dòng thời gian. Để thay đổi người có thể tìm kiếm bạn theo số điện thoại, hãy đi tới thiết lập quyền riêng tư của bạn. Để tìm hiểu thêm về cách thông tin trên Dòng thời gian của bạn được sử dụng ra sao, hãy xem [chính sách quyền riêng tư](#) của chúng tôi.

**Tiếp tục** Hủy

#### Step 5:

Once you have entered the correct phone number, Facebook will send a phone number **with a security code with 6 characters** to confirm. You enter the code with 6 characters in the interface on Facebook and click **Accept** to verify.

**Nhập mã xác nhận của bạn**

Bạn sẽ sớm nhận được một tin nhắn đến số +84 90 123 456 7 kèm mã xác nhận.

Nhập mã xác nhận

[Gửi lại Mã \(xin đợi ít nhất 5 phút trước khi yêu cầu mã khác\)](#)

**Chấp nhận** Hủy

Due to security reasons, Facebook will **ask you to re-enter your account password** , then click **Submit** to continue.

Vui lòng nhập lại mật khẩu của bạn ×

Vì lý do bảo mật, bạn phải nhập lại mật khẩu để tiếp tục.

Mật khẩu:

### Step 6:

Next, the **login approval approval** dialog box appears. We will tick **No, request the code immediately**, next click **Close**. So you have activated the 2-layer security mode for Facebook account already.

Thiết lập phê duyệt đăng nhập đã hoàn tất ×

Mỗi khi có hoạt động đăng nhập từ trình duyệt không xác định, chúng tôi sẽ hỏi mã đăng nhập.

Trong tuần đầu tiên, nếu không có điện thoại, bạn có thể tắt Phê duyệt đăng nhập mà không cần mã đăng nhập.

Không, yêu cầu mã ngay lập tức.

The next time you log in, you will receive a login approval code sent to your phone. Enter the code to login.

**Enter Your Login Code**

You've asked us to require a 6-digit login code when anyone tries to access your account from a new device or browser.

Enter the 6-digit code from your **Code Generator** or 3rd party app below.

Need another way to authenticate?

After entering the password, you will be asked if you want to save this browser for the next time you login without a password.

**Remember Browser**

If you save this browser, you won't have to enter a code when you log in from this browser again.

Save Browser

Don't Save

Continue

When we log in to a Facebook account on a strange computer or smartphone, but have never logged in before, you must add a second security code entry step, sent by message on the registered phone. This security code will change when we log in.

Setting up the 2-layer Facebook security code on your computer will not affect your account usage or login on your smartphone.

### 3. Log in to Facebook if you can't enter the code

As mentioned, when you enable this feature, you will receive a second code via phone message. We must enter this code to log in to the account. So what if you don't bring your phone and can't enter the security code?

#### Step 1:

First of all, you also access the Privacy section and log in on Facebook. Navigate to **Use 2-factor authentication**, you will see **Recovery code**, click **Get code**.

#### Step 2:

If required, re-enter your Facebook account password. Soon after, the dialog box of the **Login Approval Code** dialog appears. We will see **10 random code snippets** that we can use to log into our Facebook account, in case you don't bring your phone to enter the confirmation code. It's best to save all 10 codes above, except in case you don't receive a security code or don't carry your phone.

## Mã Phê duyệt đăng nhập của bạn

Sử dụng các mã này cho Phê duyệt đăng nhập khi bạn không mang điện thoại theo, như khi bạn đang đi du lịch.

Bạn vẫn còn **10** mã khả dụng. In mã ra, giữ mã an toàn và sử dụng mã bất cứ khi nào được yêu cầu cung cấp mã Phê duyệt đăng nhập để đăng nhập.

## 4. How to cancel 2 layers of Facebook security via phone

Due to the security of 2 layers on Facebook, we need to add a step to receive a message to enter the security code, so we will add a login step or sometimes we do not receive the code to the phone, we can remove the 2-layer password verification feature. on Facebook.

In the section **Using 2-factor authentication** , click the **Off** button to cancel this feature.

The above is a tutorial on how to enable 2-layer security for Facebook. Besides, in case you can't enter the code sent to your phone, you can use 1 of 10 codes that Facebook provides. Don't ignore confirming the 2-layer password for Facebook so you can enhance the security wall for your account.
