

Guide to transforming videos into engaging interactive lectures.

Transforming a regular video into an interactive lesson will increase student engagement. Instead of passively watching the video, students will be guided through a series of review activities.

Transforming a regular video into an interactive lesson will increase student engagement. Instead of passively watching the video, students will be guided through a series of review activities. The lesson content goes beyond simply delivering knowledge from the video; it's redesigned into points to delve deeper into important ideas.

This is a modern approach, well-suited to today's digital learning environment and flexible learning needs. Below is a guide on how to turn videos into interactive lectures.

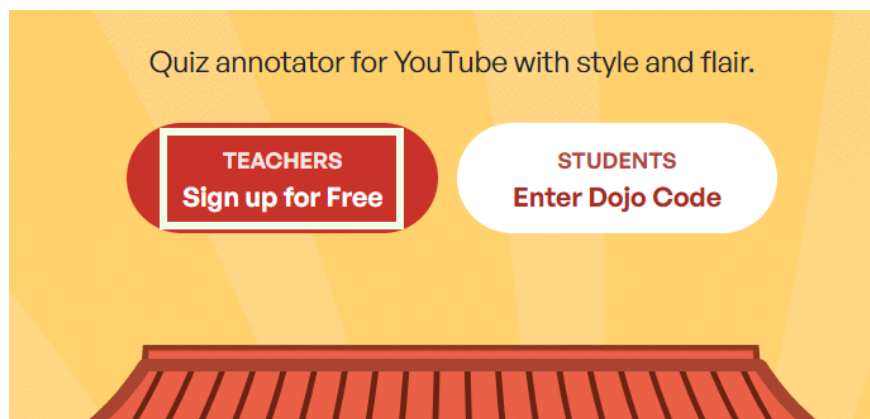

How to convert videos into interactive lectures

Step 1:

First, access the Kung Fu Quiz website using the link below.

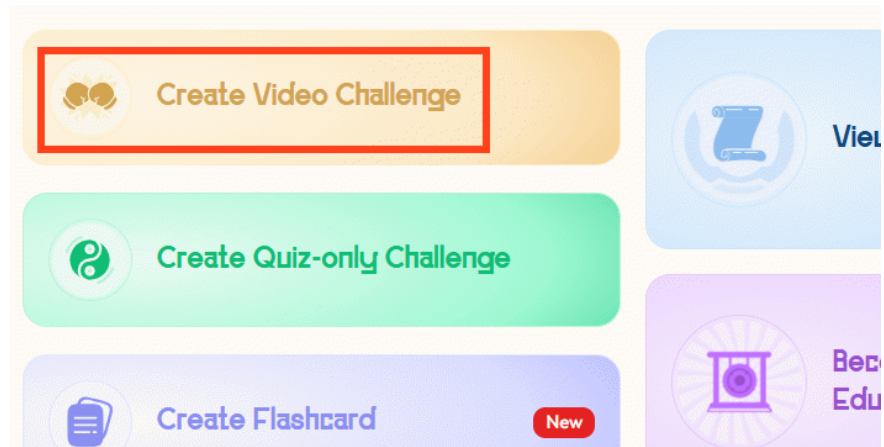

<https://www.kungfuquiz.com/>

Next, we will **create an account as a teacher** . Students will join using a code sent by the teacher.

Step 2:

On the main interface, click the **Create New Challenge tool** to create a challenge.

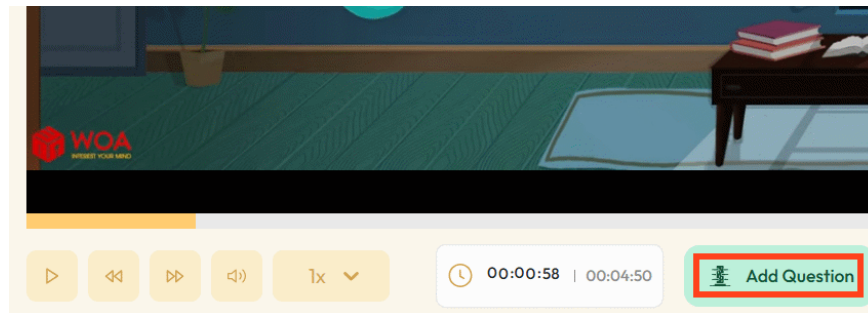

Then, an interface will appear where you can **paste the URL of the YouTube video** you want to use. Below, you can fill in other content; teachers should fill it in as shown in the image. Click "**Create Challenge**" to start creating the interactive lesson.

A screenshot of a form for creating a challenge. The form has several sections: 'YouTube Video URL' with a text input containing 'https://www.youtube.com/watch?v=MJq4r57ohCM'; 'Challenge Title' with a text input containing 'Khám phá bút chì'; 'Subject' and 'Grade' dropdown menus, with 'Science' and 'Grade 3' selected; 'Description (Optional)' with a large text area; and 'Thumbnail (Optional)' with a preview of a cartoon pencil character and the text 'BUT CHI'. Below the thumbnail is a note: 'Use a PNG or JPEG file under 2MB.' At the bottom right, there are two buttons: 'Cancel' and 'Create Challenge', with the latter highlighted in orange.

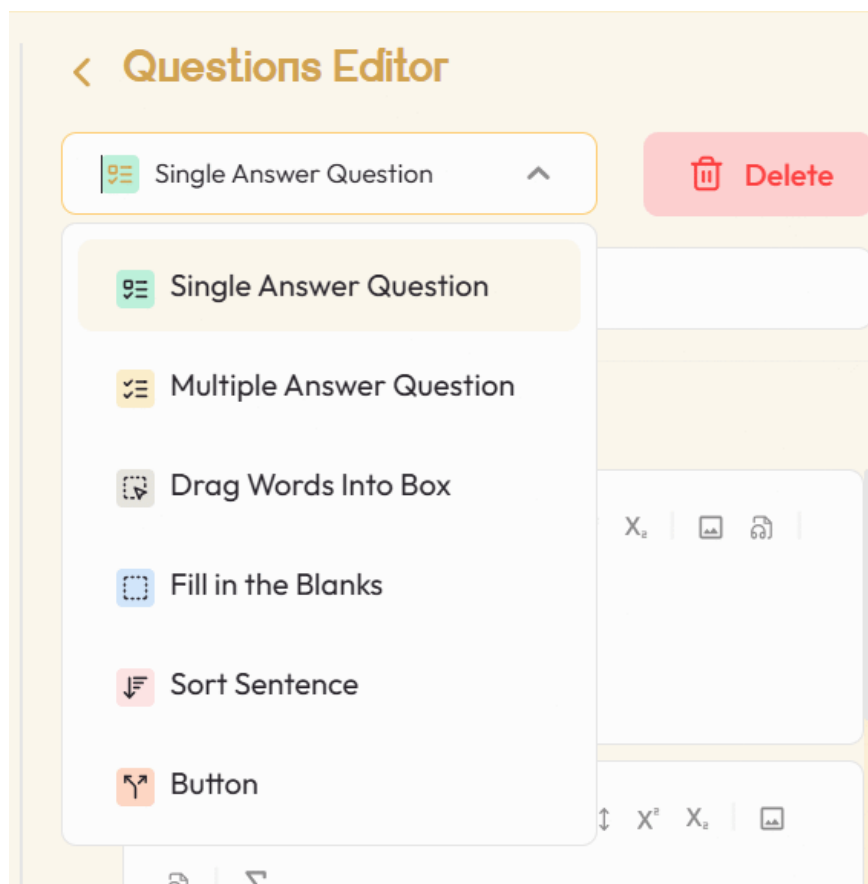

Step 3:

In the interactive lesson setup interface, teachers **pause at the video they want to use** and then click "**Add Question**" below.

Step 4:

Next to the interactive question creation interface, teachers **select the type of question** they want to create.

Next, **name the question** and enter the answer options. The setup interface will vary depending on the type of question you choose. For multiple-choice questions, you need **to select the correct answer** and then click Save to save it.

☑️ Save 📄 Add Question

We continue to create interactive questions for students in the video segment we want.

Step 5:

The questions created on Kung Fu Quiz are displayed in a list as shown in the image for teachers to review. Click the icon to edit the question, and if satisfied, **click Publish** to export the video.

A new interface will appear; **click on Create and Share Dojo** to share this interactive video.

Share Dojo

Note: The Dojo details have been auto-set for reference.

Dojo Name
Khám phá bút chì-dojos(1)

Dojo Mode: Game | Pass Threshold (%): 50

Player Limit: Limited Players | Unlimited Players Premium
100

Dojo Expiration: Fixed Date | No Expiration Premium
24 Apr 2027, 10:25 AM

Cancel | **Create and Share Dojo**

Teachers will **copy the link and send it to the students** .

Share Dojo

Your Dojo is created. Copy the Dojo Code or Link below to share it with your students.

5 7 1 1 F D 

OR

 **Copy Dojo Link**

Students fill in their names without accents and then participate in the game. When a question appears in the video, students need to answer it, and their score, correct or incorrect answer, will be announced.
