

# Guide to using AI for voiceovers in Google Videos

The AI-powered voiceover feature in Google Videos allows you to create natural-looking voiceovers with just a few simple steps.

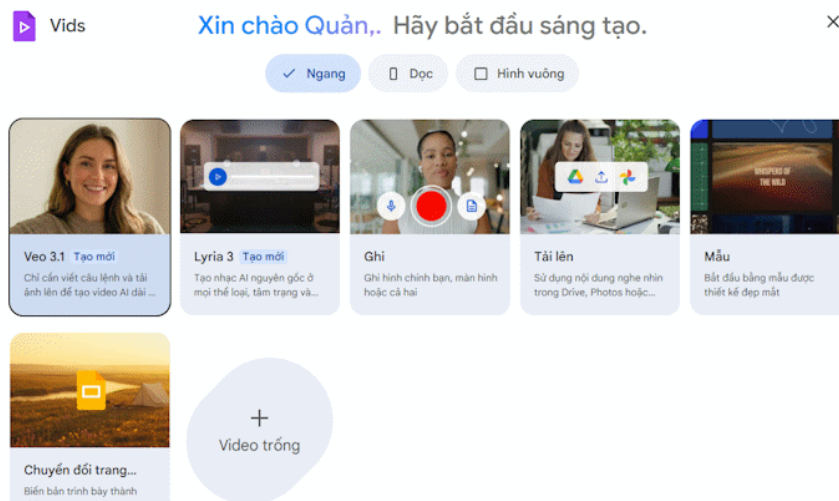

The AI-powered voiceover feature in Google Vids allows you to create natural-looking voiceovers with just a few simple steps. This tool uses artificial intelligence to convert text into speech with various options for intonation, speed, and style, making video content more lively and engaging. Thanks to this, even those without experience in recording or audio editing can create professional-looking videos. Below is a guide on how to add AI voiceovers to Google Vids videos.

## How to add voiceovers using AI in Google Videos

### Step 1:

First, access Google Videos using the link below, then upload your video or create a new one, depending on your needs.

#### 1. Access Google Vids

### Step 2:

After you have the video and have switched to the editing interface, look to the right side and click on **the Voiceover tool** to create an AI voice.

At this point, you will see a text input interface to convert the text to speech. Note that Google Videos does not support Vietnamese. We can create voiceovers for each scene in the video.

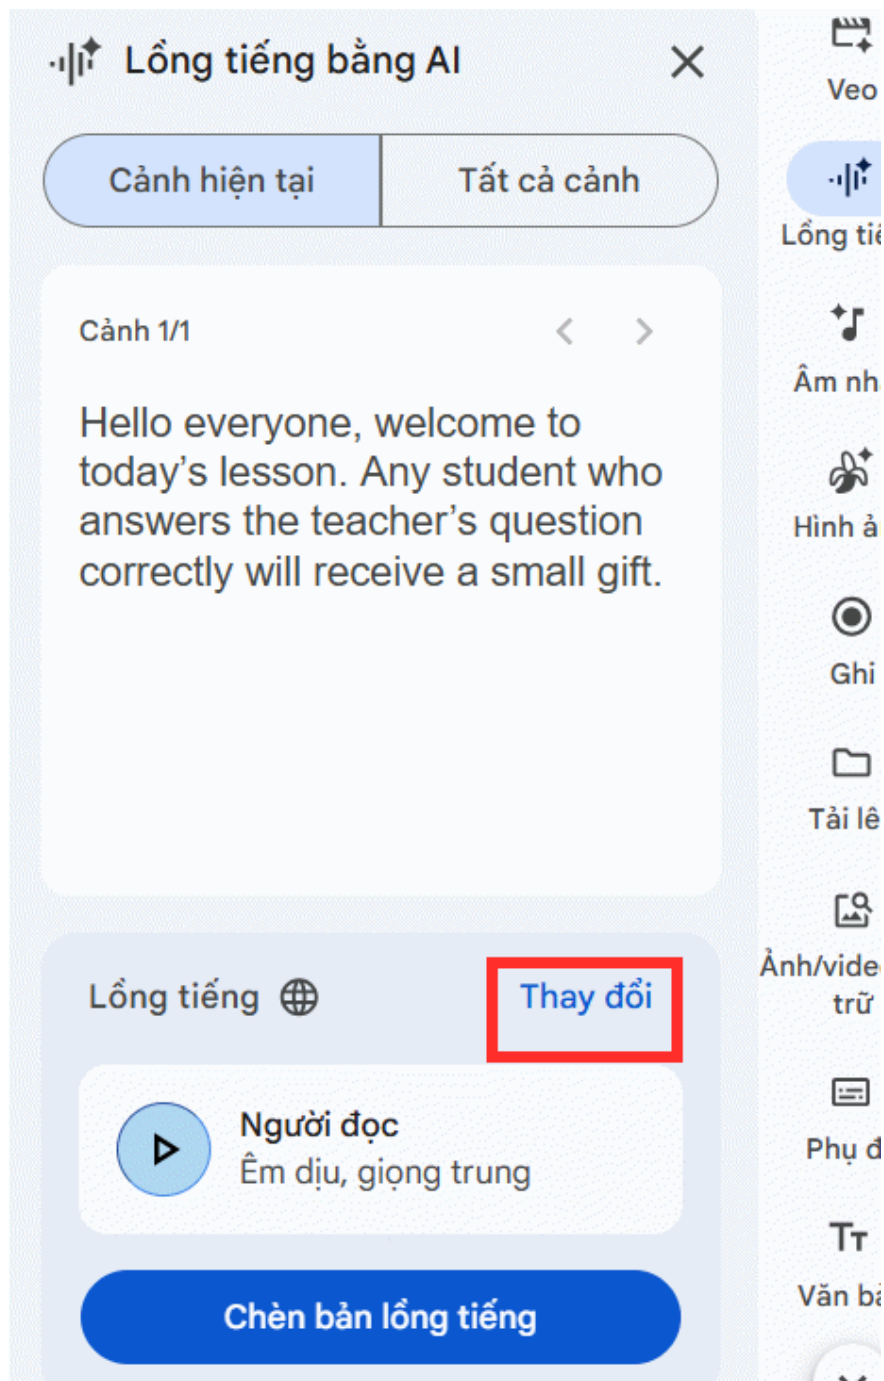

Or add voiceovers to the video scene, depending on your video.

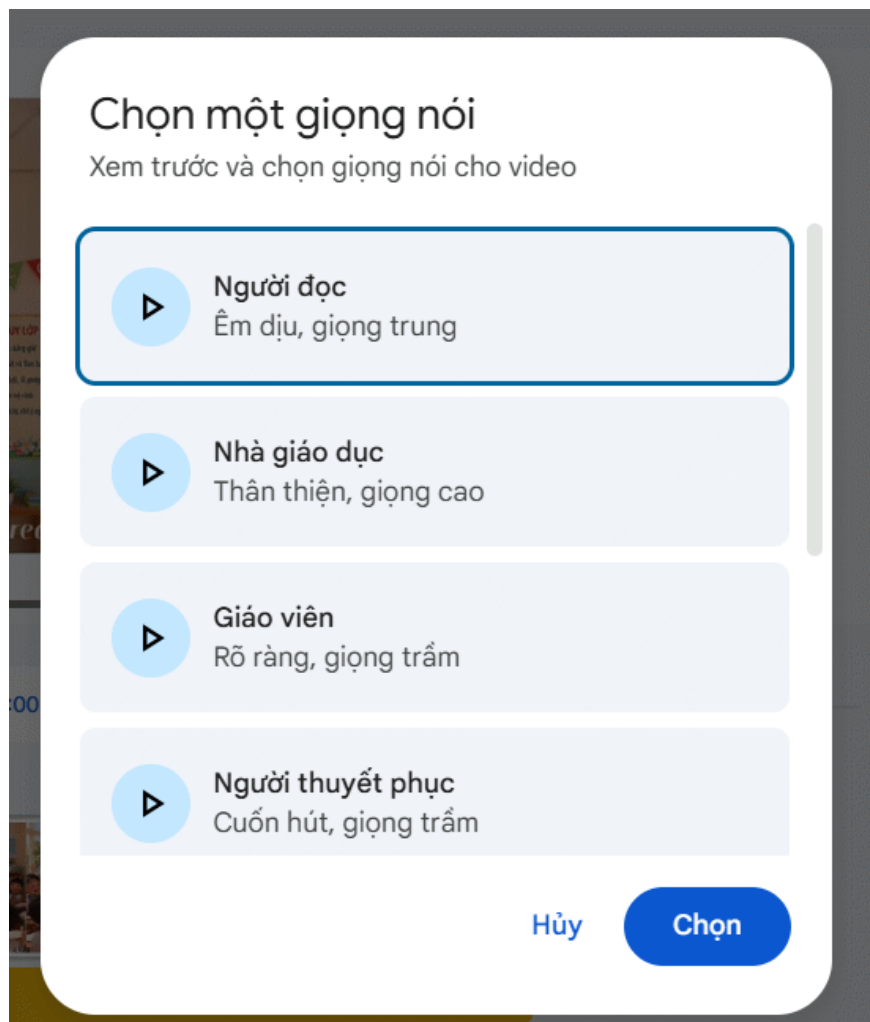

### Step 3 :

Next, we **enter the content we want to convert** to speech. Below , **click Change** to select the voice you want to use.

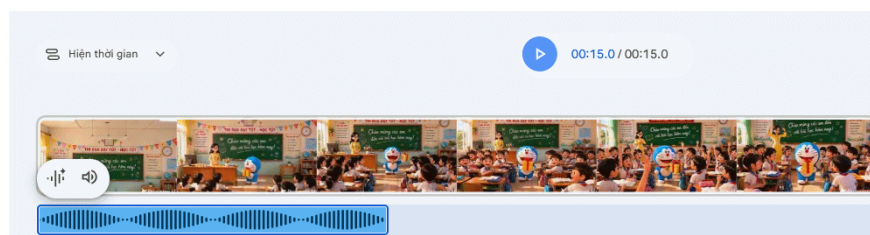

Listen to each voice and then click on the one you like best.

Finally, we **click Insert Voiceover** to have Google Videos convert the speech to audio and insert it into the video.

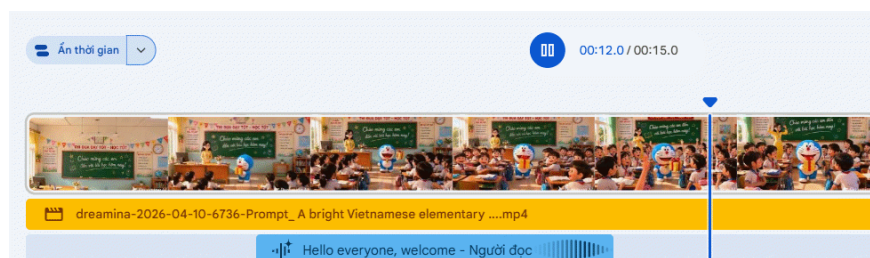

#### Step 4:

The audio is inserted into the video as shown below. Please listen and check if any adjustments are needed.

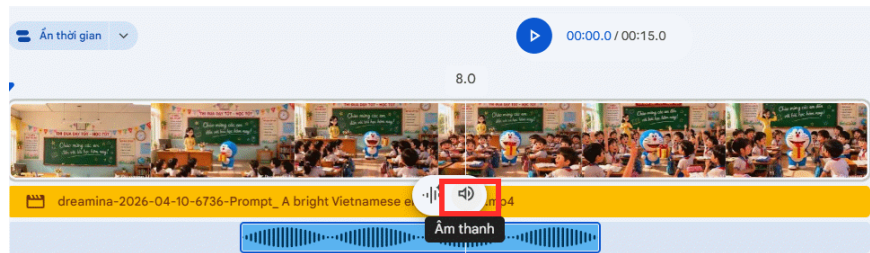

We can display a timeline to adjust where we want the voice bar to appear in the video.

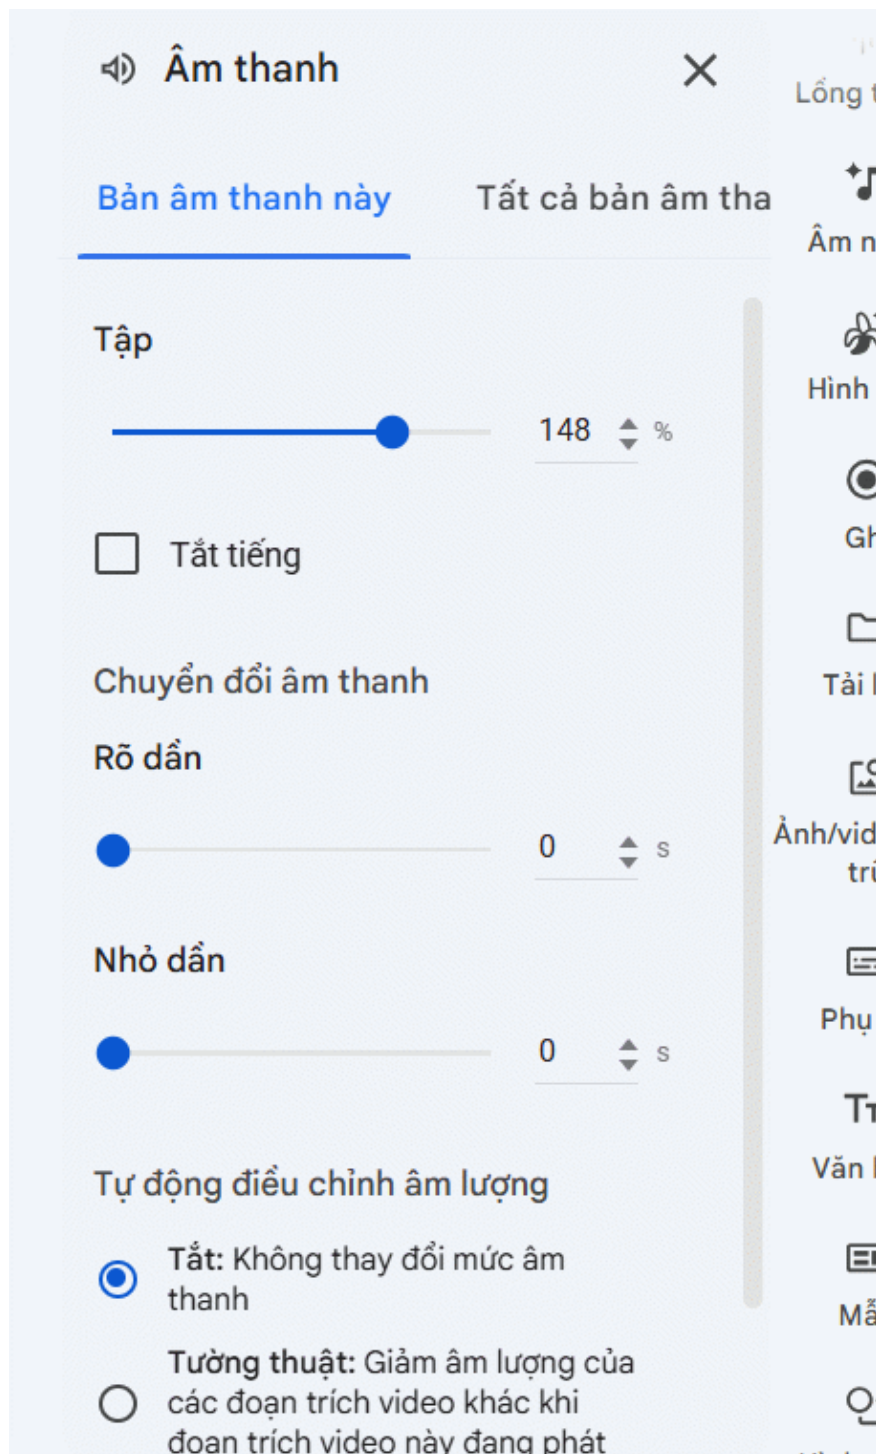

## Step 5:

Click **the speaker icon** in the volume bar to adjust the effects.

Then you can adjust the volume to your liking.

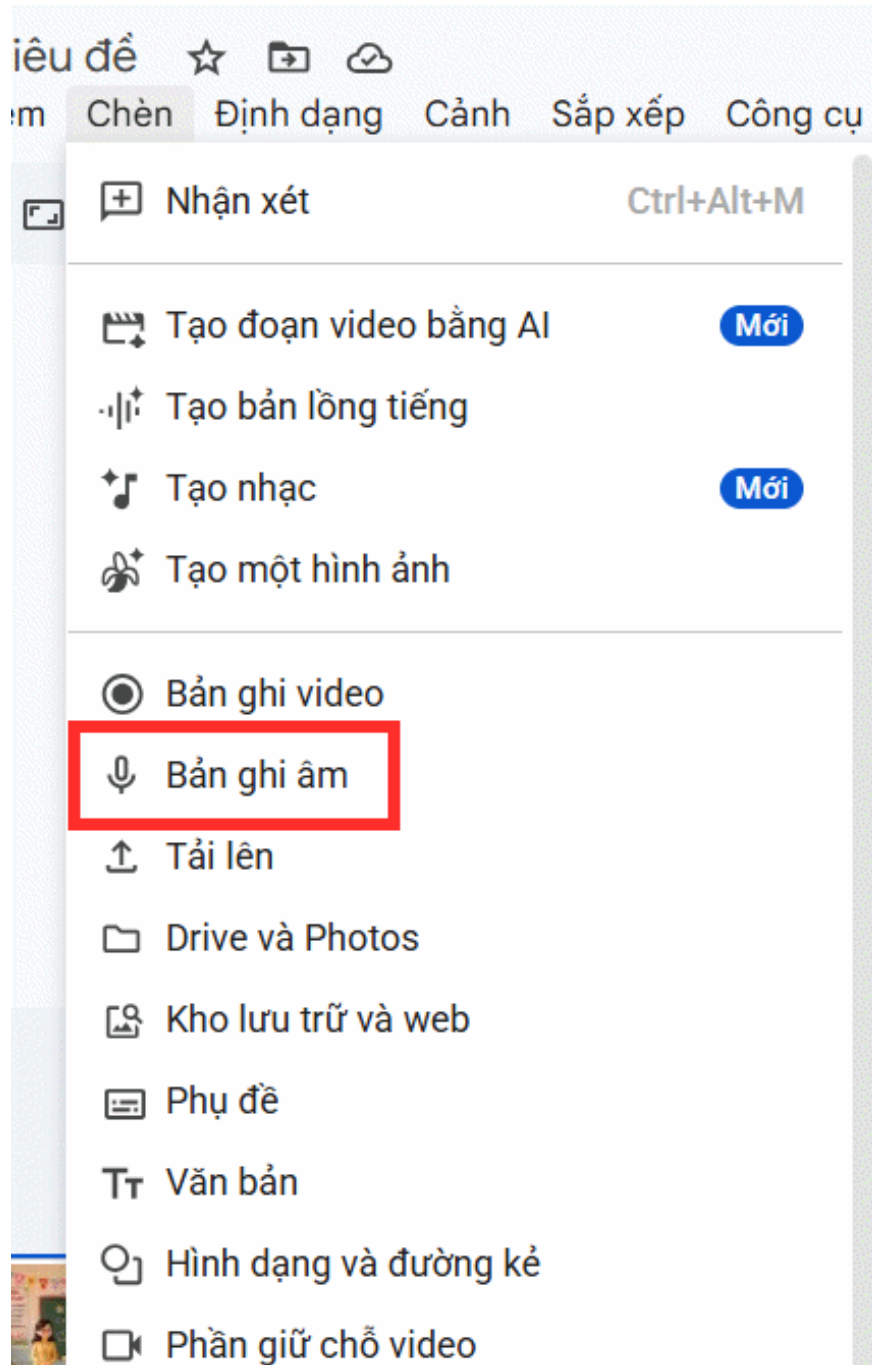

If you want to directly insert your voice into the video, it's also simple.

## Instructions on how to add voiceover to videos on Google Vids

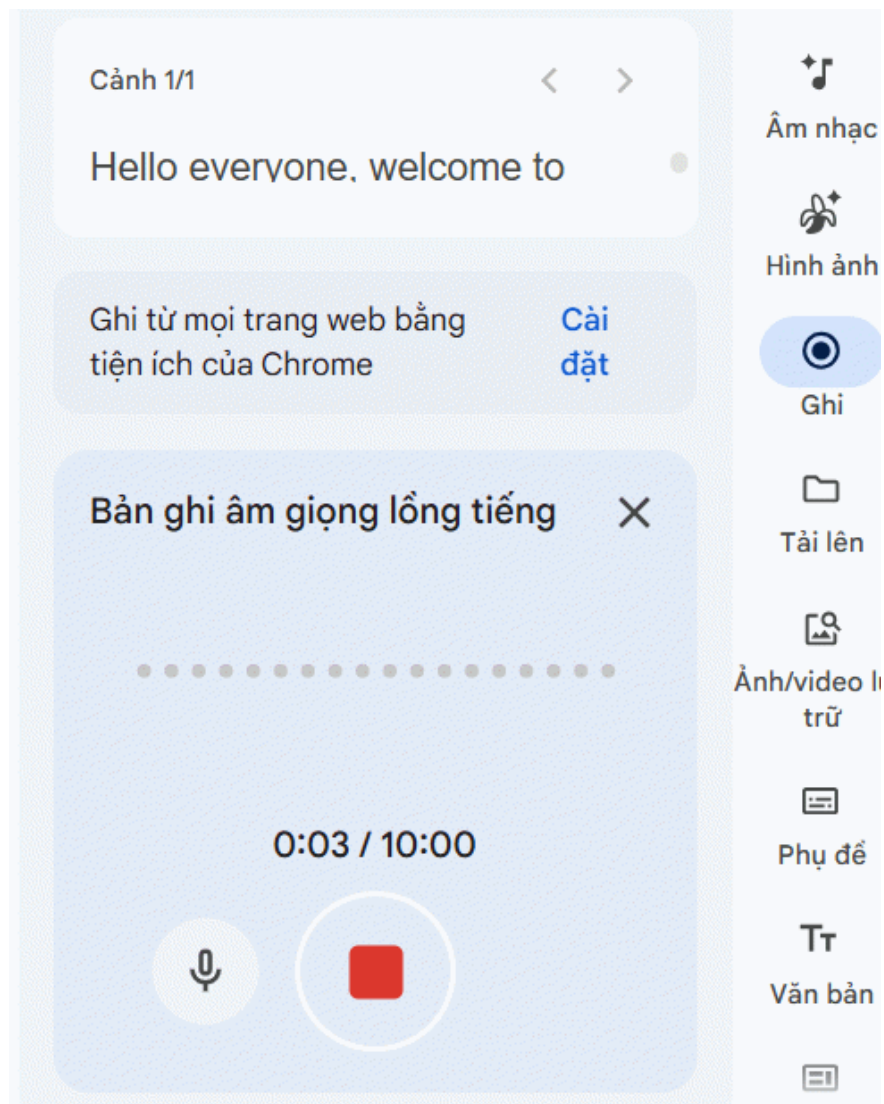

### Step 1:

On the Google Videos interface, click on **Insert and then select Audio Recording** from the list that appears.

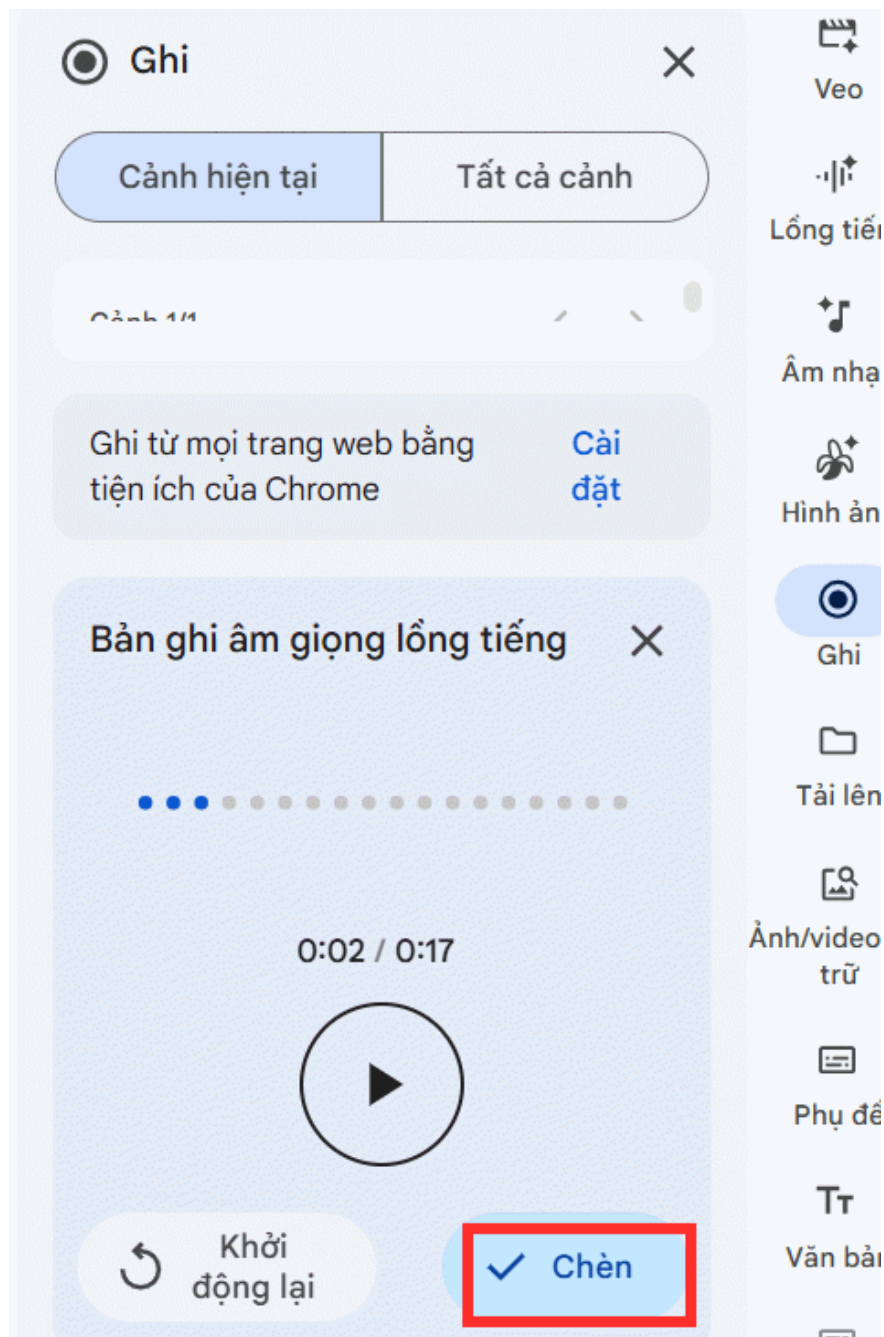

## Step 2:

On the right side of the screen, you'll see an interface allowing you to adjust the mode for directly recording and inserting voiceovers into the video. For this option, you'll need to prepare audio recording equipment and noise reduction devices if you want a professional-looking video.

**Step 3:**

After recording your voice, listen to it and **click Insert** to add it to your Google Videos video.
