Question number 1

A man lives on the 17th floor.
He only rides the elevator to his own floor
when it's raining outside or when one
of his neighbors rides it with him.
If the weather is sunny or he's alone
in the elevator, he only rides as far
as the 9th floor, and goes the rest
of the way up the stairs. Why?

BRIGHTSIDE.ME

A man lived on the 17th floor. He only used the elevator to get to the ground floor when it was raining or with another person. If it is sunny or he only takes the elevator alone, he will stop at the 9th floor and continue using the stairs to go up! Why is that?
