

Harm when leaving the car outside in the rain

Leaving the car outside in the rain will make the car dirtier and the risk of damage may occur. Below is harm when leaving the car outside in the rain.

1. In rain water, there is quite a lot of acid content, so it can cause parts in the car such as undercarriage, screws, bolts, and chains to rust.
2. Rain water will also grease used to lubricate transmission details, car brakes drift. This is the cause of the screeching and squealing of the brakes when driving.
3. After it rains, yellow and black mud spots will appear on the car. The car looks dirtier and unsightly.
4. After it rains you will see the car is dirtier than the original, appear yellow and black mud spots that look very unsightly.
5. If it rains heavily accompanied by strong winds, hard and sharp objects may appear to fall into the car, causing the car to be scratched.

How to protect the car in the rain?

Cover the car: You should use a tarpaulin to cover the car if you have to leave it in the rain for a long time.

Periodic vehicle maintenance: Regular car cleaning and maintenance will help detect damaged engine parts caused by rain, helping to ensure safety when the vehicle is moving on the road.

Check your tires regularly: Tires are the part that comes into contact with the road surface, so if there is wear or cracking, it should be replaced. Rain makes the road surface slippery, so it is important to ensure that the tires are in the best condition to help ensure safety when rolling.

Undercarriage protection: Undercarriage coating can be used to increase longevity and avoid rusting in the rain.

Remove mold in the car: Cars will get moldy when left outside in the rain for a long time. To remove odors and prevent the penetration and growth of bacteria, car owners should use a car deodorizer to kill bacteria, clean the interior of the car with a cleaning solution, hang a deodorizing wax, etc. general health protection for the family.

Rust remover for the wheels, the powertrain under the car, the parts that are most exposed to rain water and mud, so it is easy to cause rust.
