

HCOM – Leading enterprise providing LED screen display solutions and AV systems

In the digital age, display technology is not only a communication support tool but has become a strategic factor, contributing to improving management efficiency and optimizing operations. With more than 15 years of experience, HCOM is proud to be the leader in providing modern LED screen solutions, video walls and AV projection systems, meeting all needs from private enterprises to government agencies.

LED display technology: A breakthrough in visual experience

HCOM provides advanced LED display solutions, designed with superior display quality, high durability and energy efficiency. Main product lines include:

- **Indoor LED screens:** Optimally designed for meeting rooms, conference centers and performing arts spaces, HCOM's indoor LED screens ensure sharp image quality, true color and vivid visual experience.
- **Outdoor LED screens:** Responding well to harsh weather conditions, HCOM's outdoor LED screens are the top choice for outdoor advertising, stadiums and major events.
- **Curved LED screen:** A breakthrough product, suitable for shopping malls and exhibitions, bringing uniqueness and attracting all eyes.

HCOM not only provides products but also undertakes the entire process from consulting, design, implementation to maintenance, ensuring the system operates stably and with maximum efficiency.

Video Wall: Flexible and sharp for large spaces

HCOM is a pioneer in deploying video wall systems with high resolution, seamless splicing capabilities and smooth projection over large areas.

Some typical applications of video walls include:

- **Operation and monitoring center:** The video wall system helps display visual data from many different sources, supporting managers to make quick and accurate decisions.
- **Creative and display space:** At museums and exhibitions, HCOM's video walls create a strong visual impression, helping to convey content in a vivid and engaging way.
- **AV projection and 3D Mapping solutions:** Elevating brand experience

HCOM's AV projection system is not only a technological solution but also a smart bridge, optimizing communication and projection experiences in the fields of events, conferences, and brand communications. With flexible integration capabilities and outstanding performance, HCOM's AV solutions have contributed to improving projection efficiency in a series of large projects nationwide.

Modern AV projection system

HCOM's AV projection solutions are designed to meet a wide range of needs, from corporate meeting rooms, executive centers, to large-scale events. Highlights:

- **Outstanding display quality:** Sharp images, high resolution, meeting professional presentation needs.
- **Smart connectivity:** Easy integration with existing devices and systems, supports remote control, optimizes operating processes.
- **High reliability:** The solution is built on advanced technology from leading brands to ensure stable and durable performance.

3D Mapping Technology – Unique projection experience

Not only stopping at traditional AV projection, HCOM is also a pioneer in deploying 3D Mapping technology, bringing vivid and artistic experiences.

- **Creative applications:** 3D Mapping helps turn ordinary surfaces such as buildings, stages, or objects into unique interactive displays.
- **Brand enhancement:** This is a powerful tool for businesses to affirm their brand impression at opening events, promotional campaigns, or large-scale performances.
- **Attract maximum attention:** 3D Mapping performances not only make a strong impression but also create unforgettable emotions and experiences for viewers.

HCOM - A reliable partner in the field of LED screens, video walls and modern AV projection solutions
