

Help your newly purchased Jeans not fade with 4 simple tips

Jeans that you just bought often fade when they wash, making them quickly get old. Here are 4 tips to help newly purchased jeans do not fade and always look like new.

Jeans are many young people's favorite outfits because they bring youthfulness and dynamism. However, newly bought jeans often fade when washed, making them quickly become old. Here are 4 tips to help newly purchased jeans do not fade and always look like new.

Wash jeans with table salt, vinegar

After buying jeans, you should soak your jeans in the first wash with cold water mixed with dark salt, vinegar or alum for at least 12 hours. Salt will help stabilize the color of the fabric, and slow down the process of fading.

Then rinse with clean water. Do not wash jeans with soap on the first wash.

Put jeans in the freezer

Put the jeans in a zip-zip pocket. Then, place the bag in the freezer overnight. Next day take out your pants and wash with warm water, dry in the shade. This way the jeans will not have an unpleasant smell, smell good and keep the color like new.

You can also use the jeans freezing method to clean them. Proceed as follows:

1. Shake jeans strongly left and right. Then spray vinegar on both sides.
2. Turn the jeans over and left in the sun for about 20 minutes, until completely dry.
3. Fold the pants and place them in a zip or plastic bag, squeeze out all the air, tie them up and place them in the freezer for 24 hours.
4. Remove jeans, gently shake, allow to dry and wear.

Wash jeans with betel leaves

Take 2 betel leaves, wash, crumble, put in water soaked for 10 minutes. Filter out betel leaves, only take water. Soak the jeans in betel nut water for about 45 minutes and then dry it without washing again.

Wash jeans by hand

With jeans, you should wash by hand instead of washing machine to help pants retain color better and more durable. If you don't have a lot of time, you can still wash in the washing machine, but please remove the left pants, close the buttons and pull the zipper up before washing.
