

# Here Maps for Android has Vietnamese voice

Today Here Maps for Android navigation software has been updated with Vietnamese voice, voice files are about 4MB in size and you can download from within the installation of this software.

**Today Here Maps for Android navigation software has been updated with Vietnamese voice, the voice file is only about 4MB in size and you can download it from the installation of this software.**

The default is currently only female, but quite good. With voice input, you can plug in headphones to get better navigation when moving. This version is still not high quality (*Hi-fi*), hopefully in the future, Nokia will soon update it to make you hear better.

To download Vietnamese voice, go to **Settings -> Voice navigation -> Manage voices -> drag down with Vietnamese section -> click on it to download**. In case you haven't downloaded *Here Maps* for Android, download it here: <http://here.com/download>
