The following article introduces you to how to mark copyright by creating **Watermark** in Word.

To create borders for a text page in Word 2013 there are 3 basic ways as follows:

## 1. Highlight copyright using text.

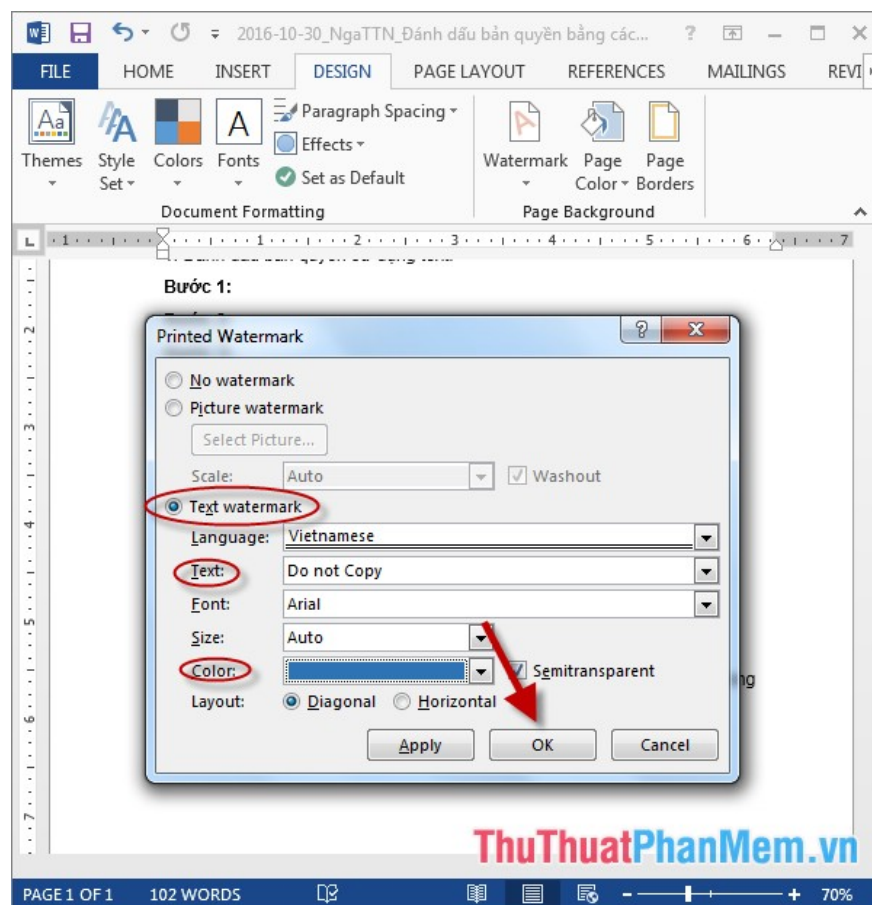

**Step 1:** Go Card Design -> Watermark -> select the type of available copyright mark or click on **Custom Watermark** to customize the request:

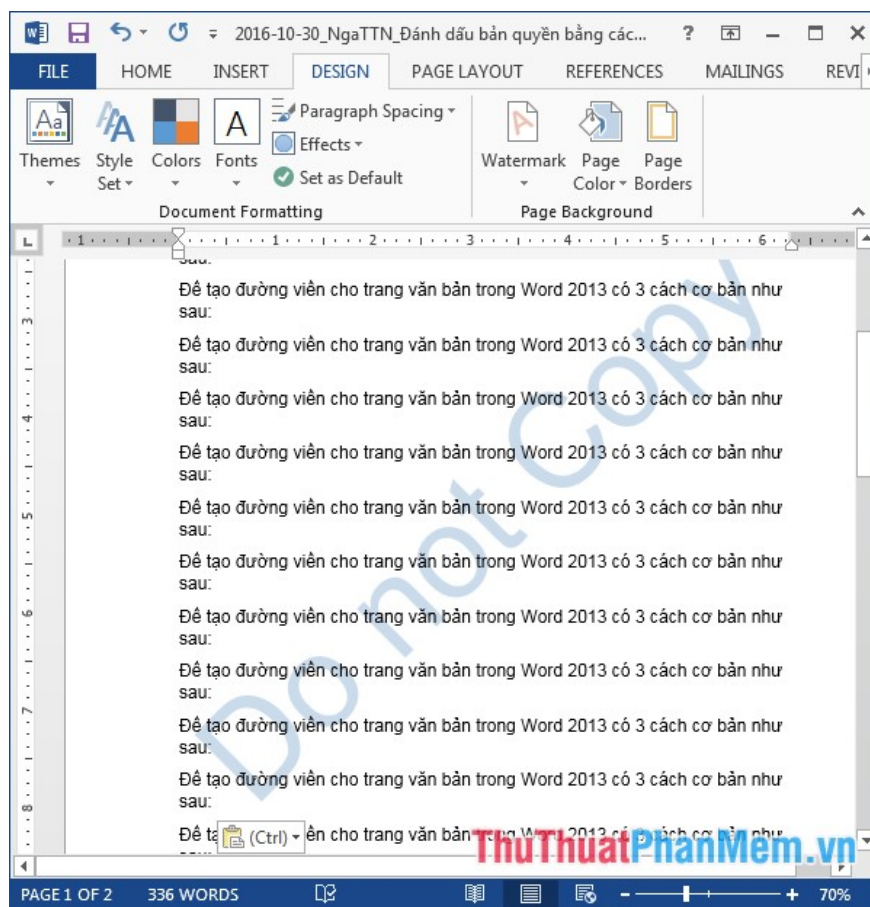

**Step 2:** The **Printed Watermark** dialog box appears, click the **Custom Text Watermark** box, including the following options:

- **Language:** Select the input language.
- **Text:** Enter the text content used to mark copyright.
- **Font:** Select a font for input.
- **Size:** Select the font size.
- **Color:** Select text color for highlighted content.

Finally, click **OK**

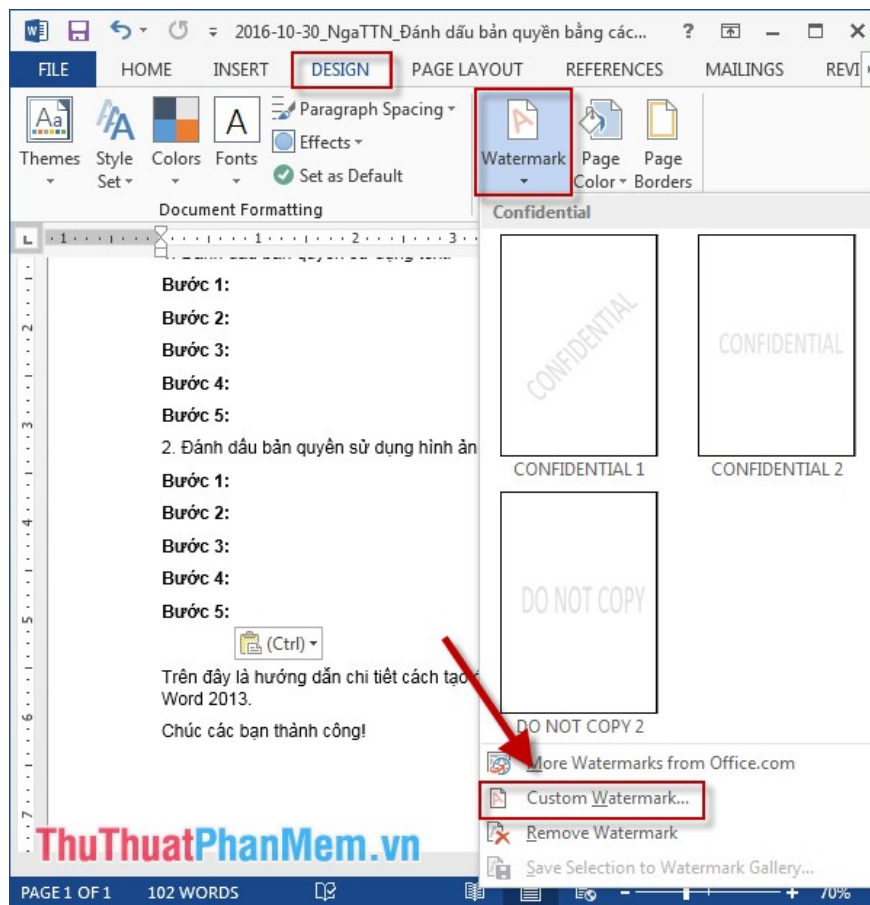

- After clicking **OK**, your text has been copyrighted with a sinking text:

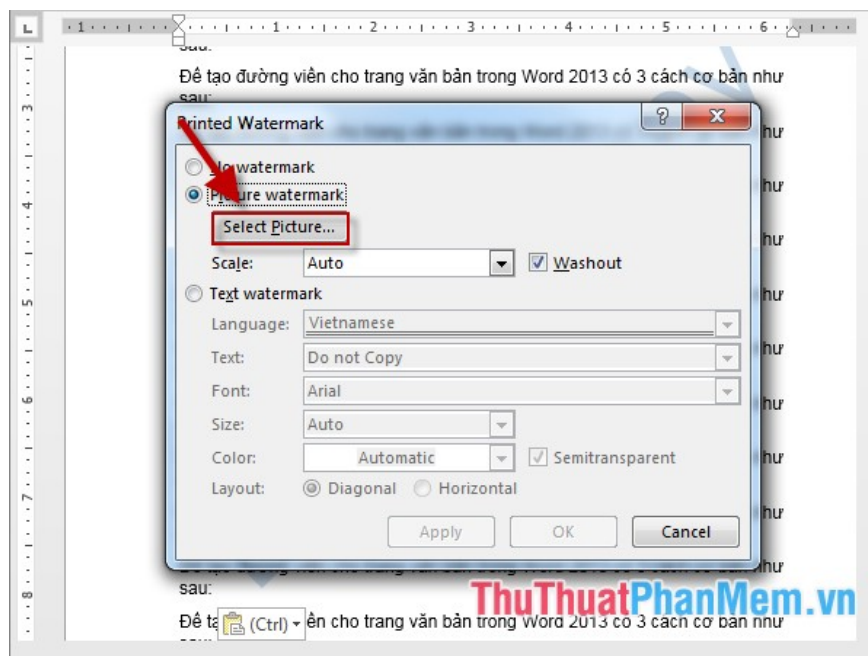

## 2. Copyright markup using images.

**Step 1: Go Card Design -> Watermark -> Custom Watermark:**

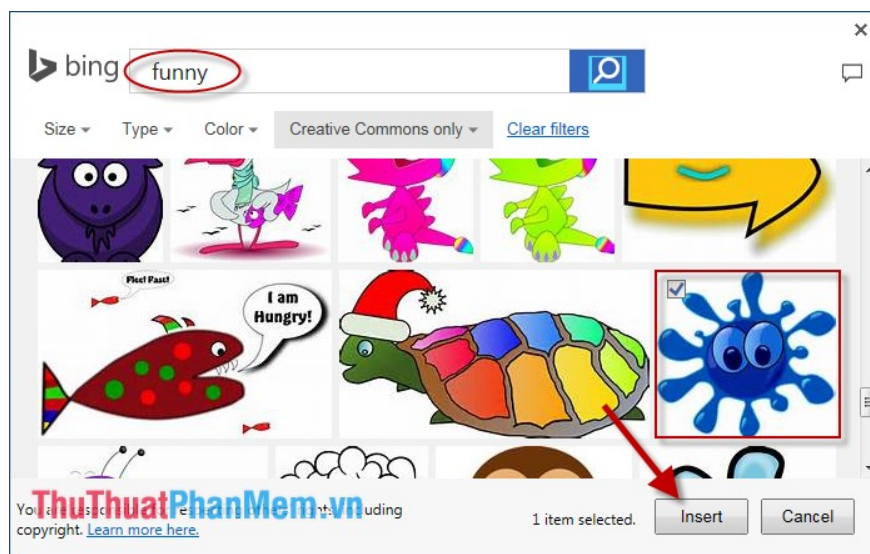

**Step 2:** The **Printed Watermark** dialog box appears, select **Picture Watermark** -> **Select Picture** to select the image you want to mark copyright:

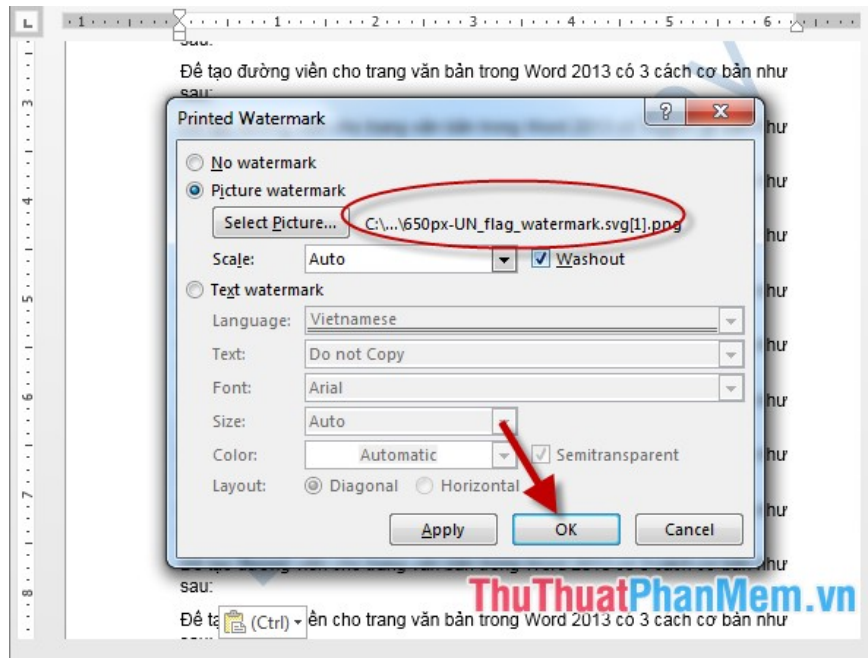

**Step 3:** The **Insert Pictures** dialog box comes with 2 options: retrieve images from files available on your computer or search for images online:

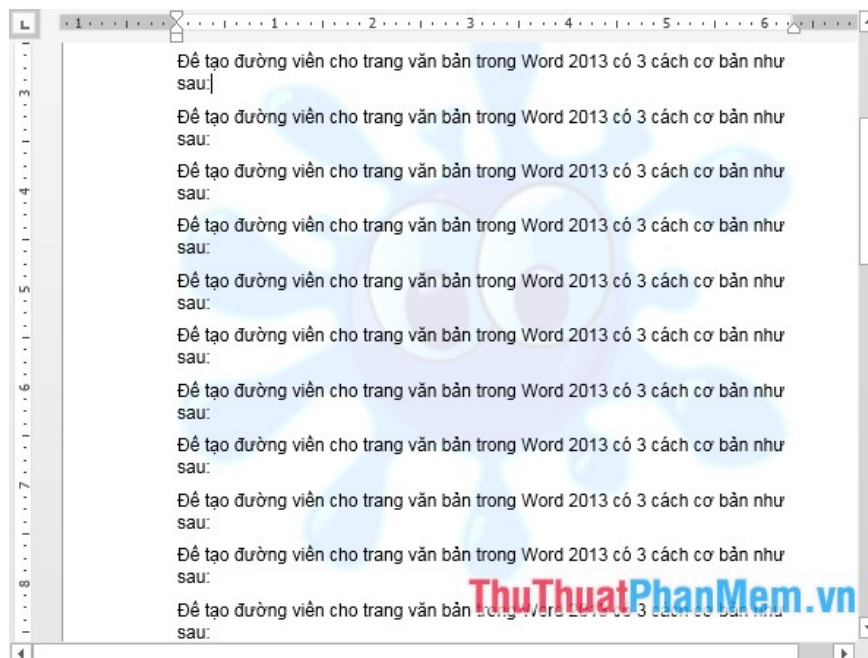

**Step 4:** For example, here search other images on the network -> enter the search content in **Search Bing** -> press **Enter** -> search results are displayed -> select the image you want to use the bookmark -> **Insert** :

**Step 5:** After selecting the image to be inserted in the dialog box -> click **OK** to complete:

- After clicking **OK**, your text has been copyrighted by the selected image:

The above is a detailed guide on how to mark copyright by creating **Water mark** in Word.
