

# Highway time to release Android flagship smartphones 2018

Recently, leaked information about a timeline table indicates that the time to release flagship phones to be released in 2018 will help us figure out better.

The year 2017 has passed, the technology world is waiting for 2018 in different ways. When smartphone manufacturers finalize the old year, preparing the next steps for the new year, users are also looking forward to the availability of technology products this year.

Recently, leaked information about a timeline table indicates that the time to release flagship phones to be released in 2018 will help us figure out better.

This table first appears on Weibo, China's social networking site, then translated by Gizmo China. If the information in this table is correct, **Samsung, G7 and G7 + Galaxy S9 and S9 +** will be available in February; until September, **Galaxy Note 9 and LG V40** will be included; Finally, Google's **Pixel 3 and Pixel 3 XL** came out in October.

The smartphones listed in this table are expected to run Qualcomm's **Snapdragon 845 processor**, which is designed for high-end smartphones. The smartphones listed here are also in the high-end line, so we have no news about other mid-range phones for now.

月份	机型	月份	机型
2月	三星盖乐世S9/9+	9月	小米MIX3
	LG G7/7+		LG V40
4月	小米7	10月	Google Pixel 3 (XL)
5月	HTC U12		努比亚Z18S
6月	一加6		索尼Xperia XZ2
	努比亚Z18		HTC U12+
	索尼Xperia XZ Pro-A	11月	MOTO Z 2019
8月	诺基亚10	12月	一加6T
9月	三星盖乐世Note9		三星W2019

*List of smartphones at the same time of issuance in 2018*

Some of the release dates in this table are actually not surprising because it has been rumored for some time. The release time of some brands is also predictable, for example Samsung or LG are always announcing new phones at the Mobile World Congress (MWC) event in late February.

However, in this list we also see some names coming from smaller phone makers. Between April and August is **Xiaomi's Mi 7, U12, HTC's OnePlus 6, Z18 by Nubia, Xperia XZ Pro-A from Sony and Nokia 10** . Some products may also not be released worldwide.

The peak will fall in the fall. Besides the Note 9 and V40 in September , **Xiaomi's Mi Mix 3** may be released globally. In addition to Pixel launched in October - probably running Android P, guessing it will be called PopTart - there are **Nubia's Z18S, Sony's Xperia XZ2 and HTC's U12** + also this month.

Finally, the **Moto Z** (version 2019) may be announced in November and **Samsung's OnePlus 6T, Galaxy W2019** in December.

Currently there are not any phones on this list that have been confirmed by the company, all are still predictions only.
