

HMD Global launched a new series of phones at MWC 2019, the most impressive being the super-5 smartphone camera

Within the framework of the 2019 MWC event held in Barcelona, HMD Global has introduced a new series of Nokia phones.

Besides the cheap and popular smartphones but still equipped with good features, HMD also impresses the technology world when introducing a unique smartphone with camera cluster design like "honeycomb".

Nokia 9 PureView

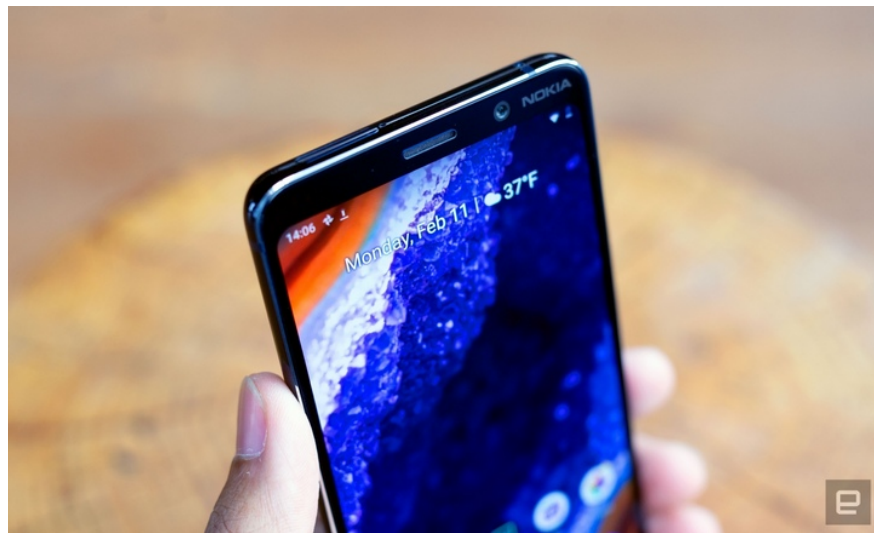

This is the first smartphone in the world equipped with a 5-camera cluster on the back. Especially, the parameters of all 5 cameras are the same: 12MP sensor, f / 1.8, Zeiss lens. In these 5 cameras, there are 2 color camera, 3 black and white cameras.

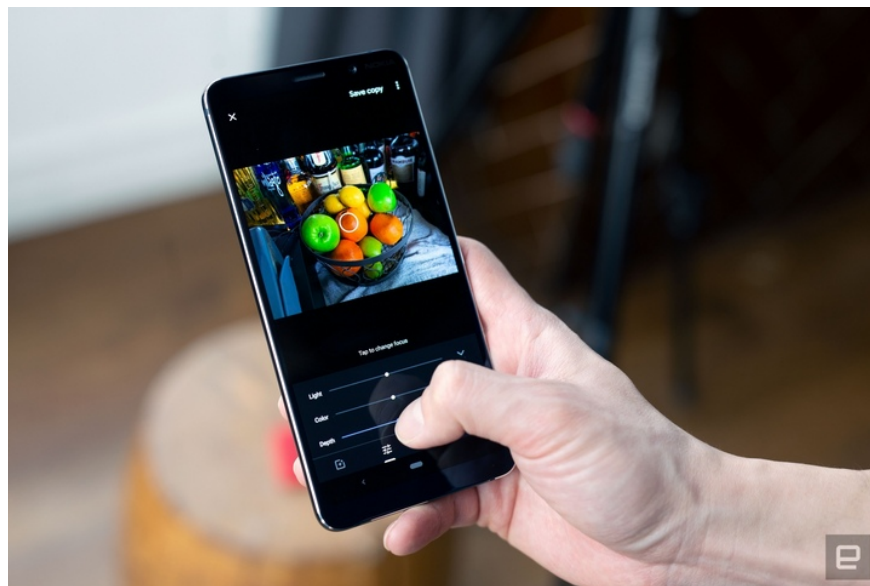

Nokia 9 PureView owns 5.99 inch OLED screen with 18: 9 aspect ratio, resolution of 1,440 x 2,880, QHD + standard.

Configuration of the machine includes: Snapdragon processor 845, 6GB RAM, 128 GB internal memory, battery capacity of 3,320mAh. Nokia 9 PureView is equipped with fingerprint sensor in the screen, support fast charging, IP67 waterproof standard, no headphone jack.

Nokia 9 PureView is priced at 699USD. It is still clear when HMD put products on shelves.

Nokia 4.2

This is a mid-range smartphone but still equipped with many impressive advanced features such as 5.71 inch water drop screen, fingerprint sensor, dual camera, glass back face, LED light integrated into the power key and automatically glow when new notice.

The hardware power of Nokia 4.2 comes from Snapdragon 439 processor, 3000mAh battery. Nokia 4.2 has two memory versions for users to choose from: 2GB RAM + 16GB and 3GB RAM + 32GB.

In addition, Nokia 4.2 is equipped with a physical button to activate Google Assistant and display the Visual Snapshot feature.

As expected, Nokia 4.2 costs 169 USD for 2GB / 16GB versions, and 199 USD for 3GB / 32GB version.

Nokia 3.2

Like Nokia 4.2, this model is also equipped with Snapdragon 439 processor, Google Assistant key and integrated notification LED on the power key.

Machine with 6.26 inch screen, battery capacity up to 4000mAh, only single camera and plastic back and no fingerprint sensor.

For Nokia 3.2, there are two configuration options like Nokia 4.2 with cheaper price, 139 USD for 2GB RAM and 169 USD for 3GB RAM version.

Nokia 1 Plus

Nokia 1 Plus is a cheap smartphone, which has many improvements compared to Nokia 1 last year. Configuration of the machine includes MediaTek MT6739 chip, 1 GB RAM, 8 GB memory, 2,500 mAh battery, 8 megapixel rear camera, 5 megapixel front, 5.45 inch screen with 18: 9 ratio, running Android Go.

This low-cost model from Nokia will be launched in March for only \$ 89.

Nokia 210

This is a popular phone model for only 35USD. Nokia 210 has 2.4-inch QVGA screen, 16MB internal memory, T9 physical keyboard, 1020mAh battery, plastic case, runs on the S30 platform, integrates Opera Mini browser, Facebook and Classic Snake snake hunting game.
