

Ho Chi Minh City has deployed the application 'Lookup for medical examination and treatment' on smartphones

Users just need to type symptoms or pathology, the application will display a list of clinics and hospitals with the corresponding professional scope.

Department of Health of Ho Chi Minh City started deploying a trial application of search and treatment places on smartphones, in order to assess the utility of the application after more than 9 months of construction. The trial period is expected to last about 4 months, from September to December 2019.

Information of all medical examination and treatment facilities will be supplemented and completed during the test. As expected by the Department of Health, an English search application for foreign tourists will be introduced in 2020.

The application 'Lookup for medical examination and treatment' on this smartphone is the official information channel of the Ho Chi Minh City Health sector and is available on both Google Play and App Store so that users can download and install. free reservation.

1. Search and treatment application on Android phones
2. Search and treatment application on iOS phones

In the first phase of testing, the search information of the application includes all public and private hospitals, all ward and commune health stations and general clinics with a quality score of more than 3 (type). pretty up). Data on medical examination and treatment facilities on the application will be updated regularly.
