Tips for playing Honkai Impact

Save crystal crystals

Players should not spend crystals on standard gacha after the first S-ranked character and do not spend crystals on gacha items. Use crystals to unlock the best Valkyries by getting stock cards. Save crystals for new characters that appear in events or limited characters.

Daily login bonus

Make sure to login to the game every day to get different rewards like crystals, tokens, gold and more. Even if, on that day and that time, people don't have time to play, just log in and still get daily rewards.

Collect Valkyrie shards

Collect resources for Valkyrie to increase the rank. Each character can be rated from B to SSS. Get the Valkyrie shards after completing the story on higher difficulty and level. Go to Dormitory, select the Expeditions and the Valkyrie shards you want to collect.

This game would be boring if gamers only had a few characters to choose from. The fun of Honkai Impact started to soar once people got enough characters to play with and applied various combinations.

Aside from gacha being one way to unlock them, the other, quicker way is to get through some of the Hard and Supreme levels, as they will yield character shards.

When completing stages once, gamers can automatically collect daily through exploration battles. If you are lucky, every day the player will receive 2-4 character pieces. That means it only takes about 2 weeks to unlock a character with 30 shards.

Captain Upgrade

Valkyrie's maximum level is limited to captain level, so if you want the game to be more interesting and interesting, people must level up to make their Valkyrie even stronger.

It's not too difficult and all the player needs to do is clarify the main storyline. The first few parts should be to take a walk in the park and complete all levels to gain additional experience points in achievements. In the end, the player will earn an experience card that will give the 50% experience bonus.

Perform daily tasks

Daily quests are an indispensable part of Honkai Impact. Players will receive crystals, experience, weapons and upgrade items. If you want to know how to play Honkai Impact to maximize your character, the daily quest is a must.

Try to complete all the challenges

Completing 3 challenges of the level will receive 15 crystals from each of them. If you play the stories from the first chapter at normal level, you will get 225 diamonds. It's not too difficult and also gets gold coins for each level so complete all the challenges.

Join an Armada

Armada is similar to the clan feature in many other games. After unlocking the Arama feature, find a party and join it as it will open up more gameplay for everyone:

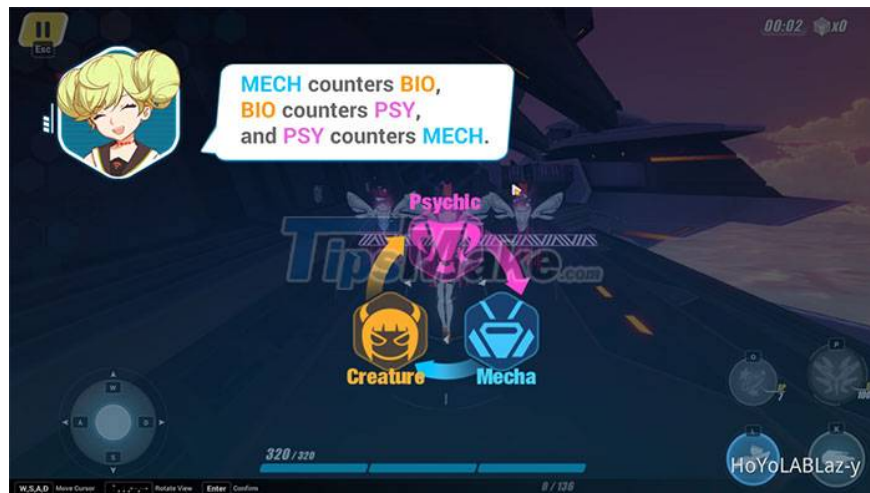

1. By contributing to Armada, gamers can earn reputation to use in the shop for useful materials, even gacha tickets.
2. If the leader and members of Armada are not lazy, log in the game every day, everyone can join the boss fight. This gives you a chance to get even more gems and fame.
3. Unlock more daily Armada quests and rewards.

4. If certain upgrade materials are missing or need to be purchased at the shop, the player can request help in Armada.

Combat mechanics in Honkai Impact

Honkai Impact 3 follows a scissors-hammer-bag combat system, with each Valkyrie divided into a specific type. The three types that gamers will learn first are Biologic, Psychic and Mecha. They interact with each other as follows:

1. Biologic is effective against Psychic
2. Psychic is effective against Mecha
3. Mecha is effective against Biologic

There's also Quantum and Imaginary, which aren't particularly effective or susceptible to any of the above 3 Valkyries but have unique skills, power, and incredible manipulation.

Players will participate in Story Stages with a team of 3 Valkyrja. Inactive team members will be listed on the right side of the screen during battle to swap in and out according to their strengths and weaknesses.

With the gacha-based character collection, there will be plenty of Valkyries to choose from. So players can focus on some favorite characters after they have accumulated more.

It's very helpful to get a feel for each Valkyrie's fighting style, learning their different attacks and combos. By familiarizing themselves with the handling of each of their favorite Valkyries, gamers will be able to better use their characters on the battlefield, and arrange the appropriate squad.

Teamwork is very important in Honkai Impact 3. There are special actions that allow swapping and attacking tactics. To make the most effective attack, it is necessary to place the swap in the right place and have an idea of what Valkyrie swap will attack.

For example, Bronya's special attack draws enemies together, then allows the other Valkyrie to attack to deal massive damage to trapped enemies. However, if you swap in a Valkyrie that's not effective against those types of enemies, it'll be a waste of time with no results.

The only other fundamental aspect to master is dodge timing. The game's tutorial will teach this quite thoroughly as it's a great useful tactic from the start.

When a pink light animation bar flashes past an enemy, tap the dodge button to dodge. A perfectly timed dodge will trigger a time freeze, allowing you to lunge at enemies for some massive damage.

Valkyrie in Honkai Impact

How to collect Valkyrie

Mainly, players will have Valkyrie from Supply Draw. This is why it's a good idea to save your crystals to spend on x10 unlocks, to ensure your chances of getting a new Valkyrie. Gamers will also receive new Valkyries for completing random Story Stages, or be rewarded with characters for various promotion milestones or achievements.

Prepare Valkyrie for battle

While they level up through experience, gamers will have to manage the various upgrades and enhancements of the Valkyrie. This includes their weapons, skills, and relics.

Weapons	Upgrading weapons will increase their star rating, while also providing the Valkyrie with new skills.
Skill	Passive skills support Valkyrie's active skills or automatically take effect when the character performs a certain action. Skills need to be activated and upgraded with gold.
Relic	These are stat boosters to give better stats when equipped in sets with the same relic. Relics with better star ratings are usually found through creating a matching set.
