

How do foreigners find and kill mosquitoes buzzing in the bedroom?

Lifhacker page has gathered many comments on many forums abroad and offers two methods that seem to be the most effective and most widely used to destroy nasty mosquitoes in your room. Read and try to see how it works!

Turn off the light, cover the blanket and prepare to sleep when you hear the annoying hum of the mosquito hovering somewhere in the room in the middle of the still night. Although trying to scare away, it still "chases like leeches" and refuses to let go.

1. A simple trap can kill quickly, compact 4,000 mosquitoes every night anyone can do it at home
2. A guide to making mosquito traps super effective
3. What happens if obnoxious mosquitoes disappear completely on Earth?

When you can't stand it anymore and turn on the light to destroy it, it's too late. It was already 'running away from the air'. Lifhacker page has gathered many comments on many forums abroad and offers two methods that seem to be the most effective and most widely used to destroy nasty mosquitoes in your room. Read and try to see how it works!

Method of hunting mosquitoes by flashlight

1. Prepare a flashlight.
2. Turn off all lamps, leaving only a single light source such as desk lamp, phone, tablet .
3. Sitting in a corner in the dark, near the light source waiting and watching.

4. After a few minutes, that hateful mosquito would probably reach the light source and land on the nearby wall.
5. Turn on the flashlight and hit the wall straight. After that, move the lights along the wall until each child comes out. What are you waiting for, hand out it.

Mosquito trap with phone or Tablet

1. Lying in bed, place the Tablet or smartphone on your chest, leaving the brightest and the screen facing up.
2. If you have a white or light colored cloth, lift the cloth up so you can see the mosquito better.
3. Mosquitoes will be attracted by carbon dioxide released from your breath and light from the Tablet.
4. Now just wait. Mosquitoes will move close to you and when you see it, handle it quickly.

Do you have a way to catch mosquitoes more effectively, please share it with everyone!
