Using laptops for work and study is becoming more and more necessary and popular. Usage time and charging time also affect the life of the laptop battery. So how long does it take to charge a laptop battery? **Check the** simplest laptop charging capacity.

How long does it take to fully charge a laptop battery?

For each different **laptop** model , the laptop battery charging time is different and the charging source used for each type of machine is also different.

When you buy a new laptop, the laptop battery already has a gradual discharge feature. Normally, when not in use, the maximum battery life is about 60 days, not forever.

Normally, for a newly purchased laptop, it takes about 4 hours to fully charge the **battery** . After a long period of use, the charging time can be extended to about 4 hours and 30 minutes.

How to check laptop charging capacity

On Windows 10 laptop

Method 1: On the Taskbar, hover your mouse over the battery icon -> the laptop will automatically display the time it takes to fully charge the laptop next to the words Until Fully Charged

Method 2: See the full charge time of Dell laptops, HP laptops and other laptops running Windows 10 and Windows 11:

Go to Settings -> Systems -> Battery Saver -> Below the battery percentage check the line Estimated time to Full charge.

On Macbook

To check the time needed to fully charge the Macbook laptop battery, click on the battery icon -> See the time needed to fully charge at the Until Fully Charged line.

Tips to charge laptop faster

Some tips to help your laptop charge faster apply to both laptop hardware and software.

With hardware:

You need to prepare the charger with the correct maximum capacity for your laptop. Some laptop models come with a charger with a low capacity, so it will be difficult to find a charger with the maximum capacity.

To choose the right **laptop charger** , you should find out information in advance or contact for advice from reputable establishments and suppliers of laptops and laptop chargers you have purchased.

With software

Some laptop manufacturers now provide users with software to support performance control as well as proactively control the fast charging mode on and off on laptops to avoid battery failure.

For example, for Lenovo there is the Lenovo Vantage app.

Above is the basic information you need to know about how to **check laptop charging capacity** , the time needed to charge laptop battery. Contact **TipsMake** to receive advice and support on the most reputable and best quality genuine charger product lines.
