How long does it take to fully charge an HP laptop battery is a question of concern for many HP laptop users as well as users who are looking to switch to using HP. Let's find out the charging time of an HP laptop battery through the following article with TipsMake.

How long does it take to fully charge an HP laptop battery?

The exact time required to fully charge an **HP laptop** battery is a difficult question to answer precisely. Battery and charging specifications can also vary quite a bit between different laptops even under the same HP brand.

Therefore, to clearly understand the time needed to fully charge an HP laptop battery, it depends on the characteristics of each different laptop model, the technical specifications of the battery and different charging sources.

How to charge HP laptop battery properly

Charging HP laptop batteries must be done correctly to ensure the performance of the device and the best battery life. Some notes that users need to pay attention to to ensure their devices are used in the best way.

Use the correct, genuine **charger** that comes with the device. Non-genuine laptop chargers can cause many dangers to the laptop's battery, reduce its function, reduce its lifespan, and can be more dangerous if you do not use the right charger.

Fully charge the battery before use. According to the manufacturer's recommendation, it is highly recommended to fully charge the battery before use to ensure the best performance of the device and not affect the laptop battery.

Do not charge the battery for too long: Do not leave the battery charging for too long after the battery is fully charged. This can cause some effects on the battery and reduce its lifespan, causing battery failure.

Do not charge the battery while using the device: Using the laptop while charging causes many negative effects on the device as well as the battery. This greatly affects the battery life as well as the performance of the laptop when used. In addition, it can also contain many elements that can be dangerous to users such as: short circuit, fire,.

Unplug the power source when the battery is full: When the **laptop battery** is full, you should unplug the charger from the laptop to ensure safety and longevity of the device.

How long does it take to fully charge an HP laptop battery?

According to HP's announcement, most HP laptop product lines have similar battery charging times. How long does it take to fully charge an HP laptop battery? -> The answer is: It takes about 2-4 hours to charge the battery and it will be full.

Each time charging the HP laptop battery is recommended when the battery has dropped to about 20-30% and stop charging when the battery is full. All to ensure the best optimization of battery life and device.

Above is the answer to the question of **how long it takes to fully charge an HP laptop battery** of many users today. Hopefully the article has provided readers with the necessary information to best apply to their devices.
