

How to access ChatGPT on Telegram

This guide explains why you should use ChatGPT in the Telegram chat app and how to do it.

Since its launch in 2022, ChatGPT has grown rapidly, expanding its accessibility across multiple platforms. One of the recent developments is its integration into popular chat apps, such as WhatsApp and Telegram. This guide explains why you should use ChatGPT in the Telegram chat app and how to do it.

1. How to use ChatGPT on WhatsApp

ChatGPT at your fingertips with chat apps

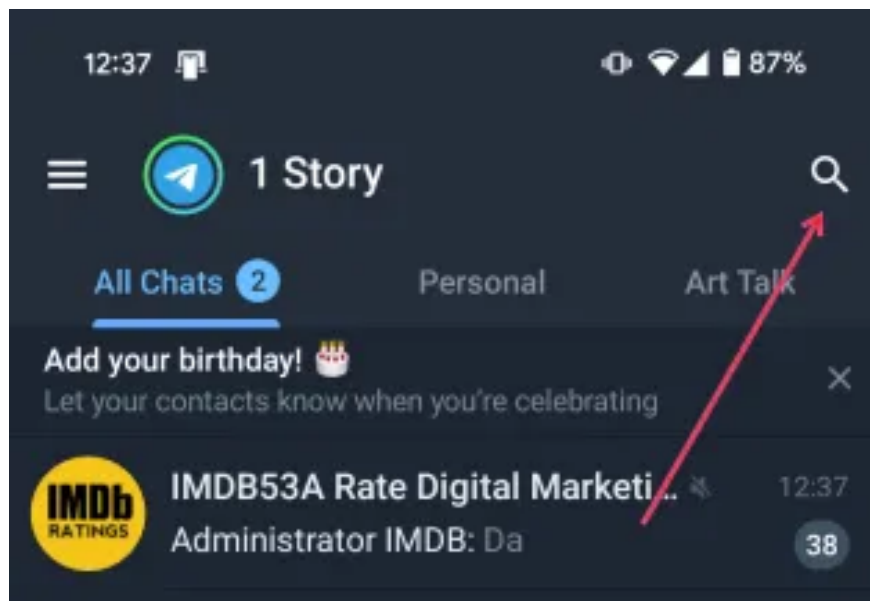

The expansion of ChatGPT into popular messaging apps like WhatsApp and Telegram is a significant step forward in AI accessibility. While ChatGPT has been widely adopted, its new and unfamiliar interface may have deterred some potential users from interacting with the chatbot.

Bringing ChatGPT to chat apps breaks down this barrier. Interacting with ChatGPT now feels more natural, making conversations as intuitive as messaging with regular contacts. It also makes it easier for less tech-savvy users to use AI bots.

How to access ChatGPT in Telegram

You can also access ChatGPT in Telegram in a slightly different way. Telegram allows you to add ChatGPT, just like any other add-on.

Open the Telegram app and tap on the search icon in the top right corner.
