

How to activate Dark theme in Firefox Quantum

On Firefox Quantum or Firefox 57, there are many new options for the interface such as setting the Dark theme theme.

After the wait, Firefox 57 or Firefox Quantum has officially launched users with many changes, especially the browser interface. The browser provides more options for changing the interface, such as customizing the Toolbar to minimize it, hiding some options to make the Firefox Quantum interface look cleaner, or some changes to the browser theme.

Accordingly, Firefox Quantum will provide users with some original theme options and some other themes, so that we can choose to change the browser interface. With this number of new themes, the web browser will become much more new than previous versions of Firefox. This article will show you how to enable the Dark theme in Firefox Quantum.

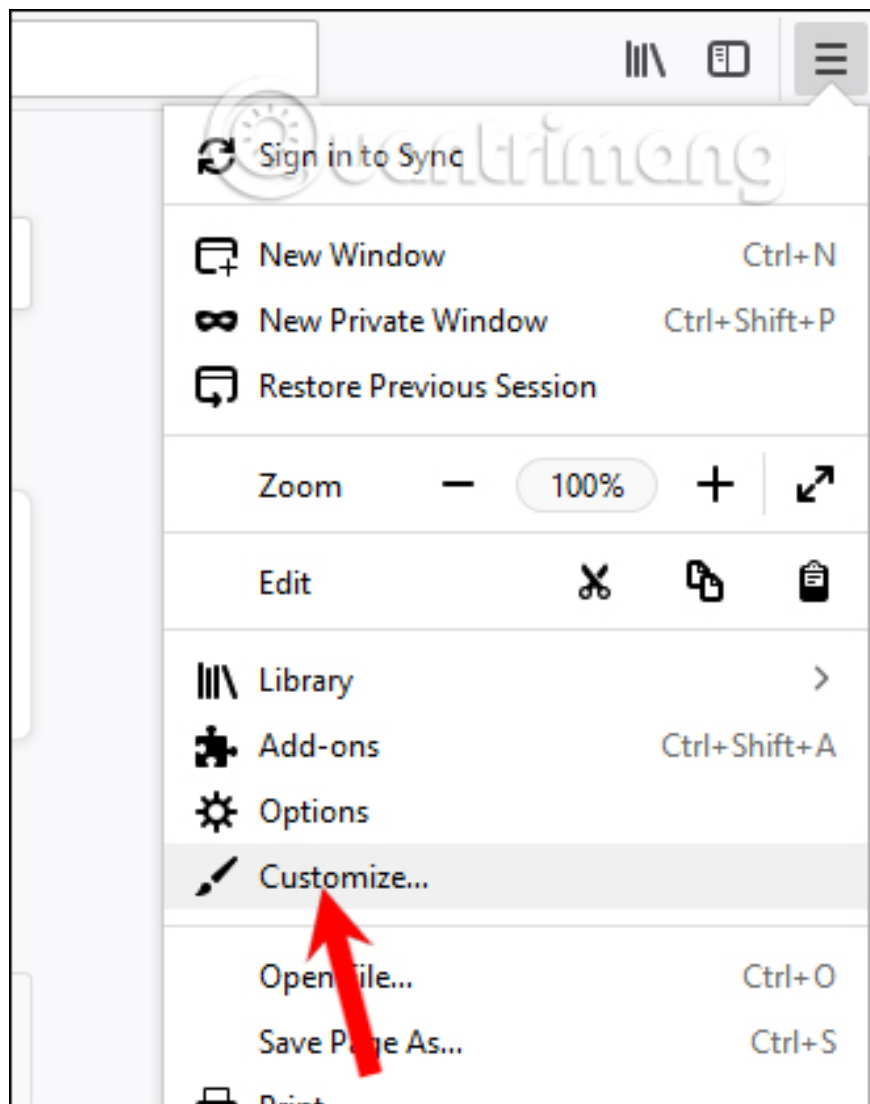

1. How to customize Firefox's new interface Quantum
2. What extensions are no longer working on FireFox 'fire fox' 57?
3. The easiest way to speed up Firefox

How to set Dark theme in Firefox Quantum

1. Download Firefox Quantum

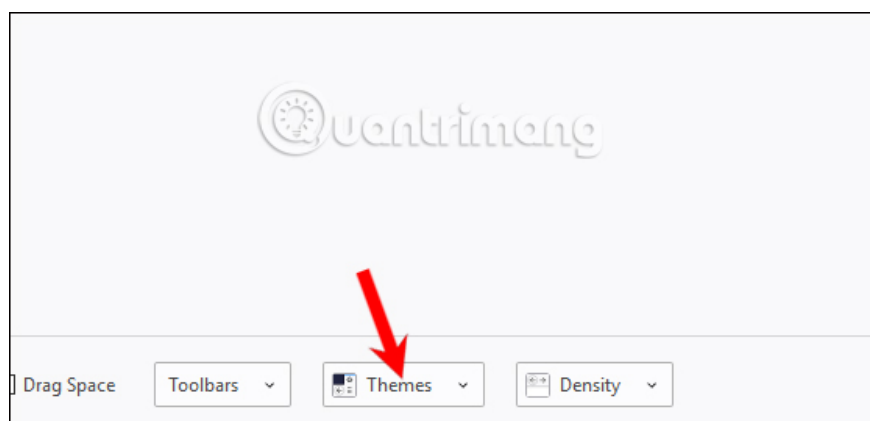

Step 1:

You start Firefox on the device, then at the interface click on **the dash** and select **Customize .** in the options list.

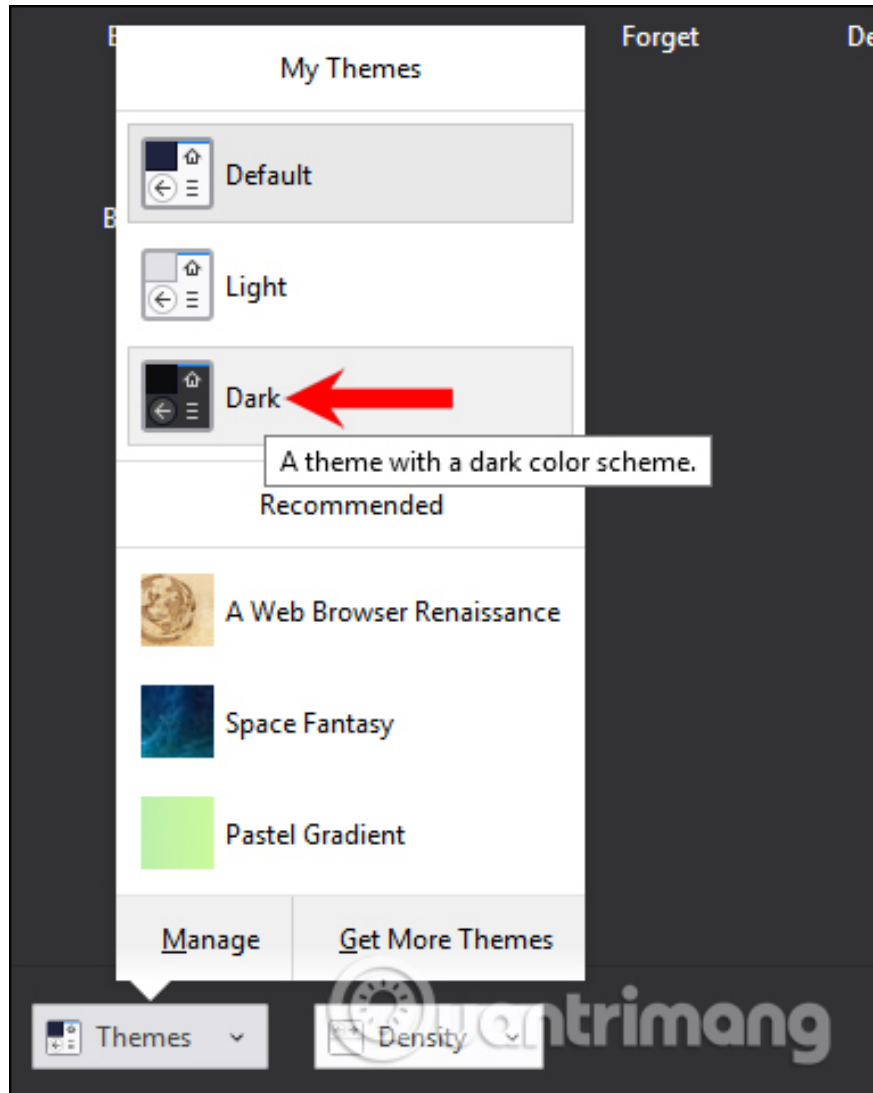

Step 2:

A new interface is available for us to modify the interface related settings in Firefox Quantum. To change the theme for the browser, here is the Dark theme, first click on **Themes** to select a new theme.

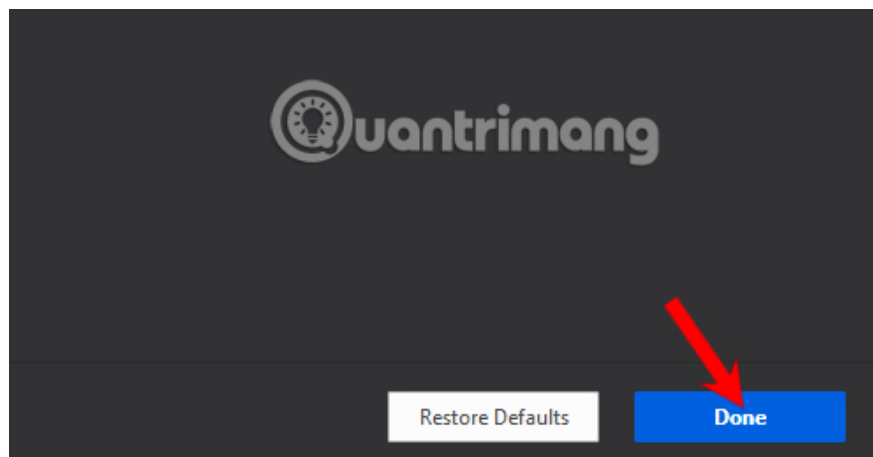

Step 3:

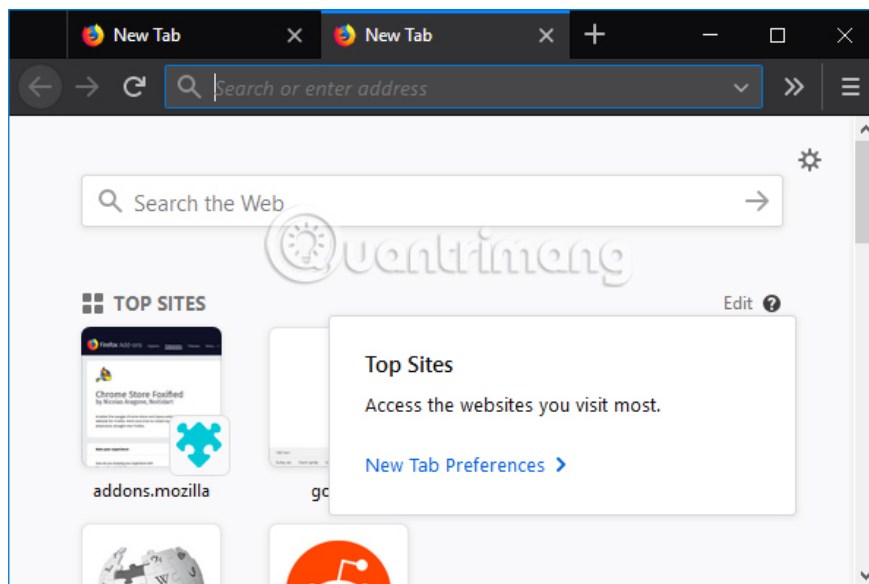

Appearance interface My themes. Here, click on the **Dark theme** to choose for the interface on the browser.

Then click **the Done button** at the bottom right corner of the interface to save the new change to Firefox 57 browser.

The web browser interface after applying the Dark theme will look like the image below. The Toolbar above has been turned black. At the same time the screen will also be less dazzling than the default browser theme.

So with the new change in Firefox Quantum, we can change the theme for the browser, where the Network administrator selects Dark theme. This dark theme will help reduce screen glare, or if the OLED screen will save energy for the device.
