Windows 11 comes with a new interface design, many outstanding features, and performance improvements. Surely, everyone is eager to experience this latest version of OS and the issue of Windows 11 Pro license activation is also very interested. The Active Windows 11 will be divided into two cases and Taimienphi.vn will find out with you soon.

Guide to Active Win 11, Activate Windows 11 Pro license

Content of the article:

1. Update Windows 11 from Windows 10 copyright.
2. How to Active Windows 11 with an activation code.

How to Active Windows 11, activate Windows 11 license

1. Update Windows 11 on a computer running Windows 10 with a copyright

The recently leaked Windows 11 build has allowed users to install Win 11, as long as the computer meets the **Windows 11 installation configuration** requirements . We know that after installing Windows 11 or other versions of Windows, you need to activate the operating system. Otherwise, customizations like changing backgrounds, themes, and more will be limited. Microsoft said it will release Windows 11 as a free version for Windows 10 users. Thus, if you upgrade your computer running Windows 10 copyright to Win 11, you will not need Active Windows 11. The copy of Windows 11 will automatically be activated during the update process.

2. How to Active Windows 11 with an activation code

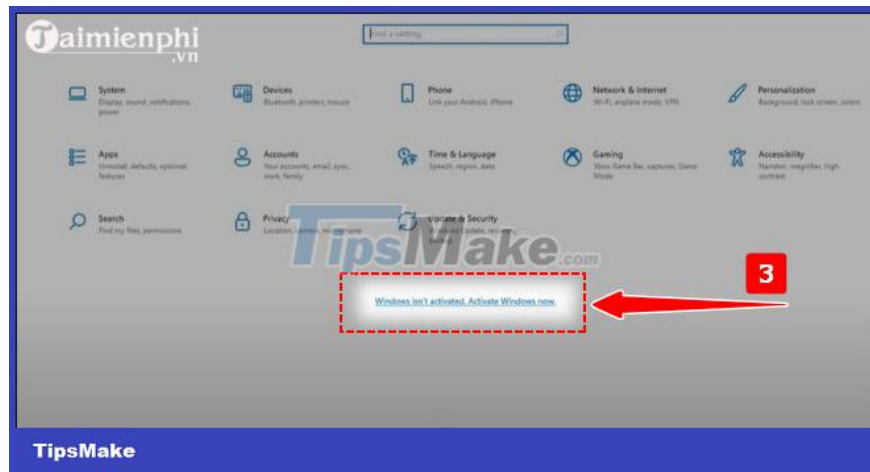

According to Taimienphi.vn, in the case of a new Windows 11 installation, you will need to activate the copyrighted Windows 11 with the product key. Until activation, Windows 11 will not allow you to customize the operating system. And as mentioned above, because Windows 11 will be released for free for copyrighted Windows 10 users, to Active Windows 11, you need a Windows 10 license activation key and a network connection. Of course, you can also activate Windows 11 with the win 11 key that Microsoft will provide in the future.

Here's how to Active Windows 11 even before the official release of Windows 11 comes out using the Windows 10 Product key.

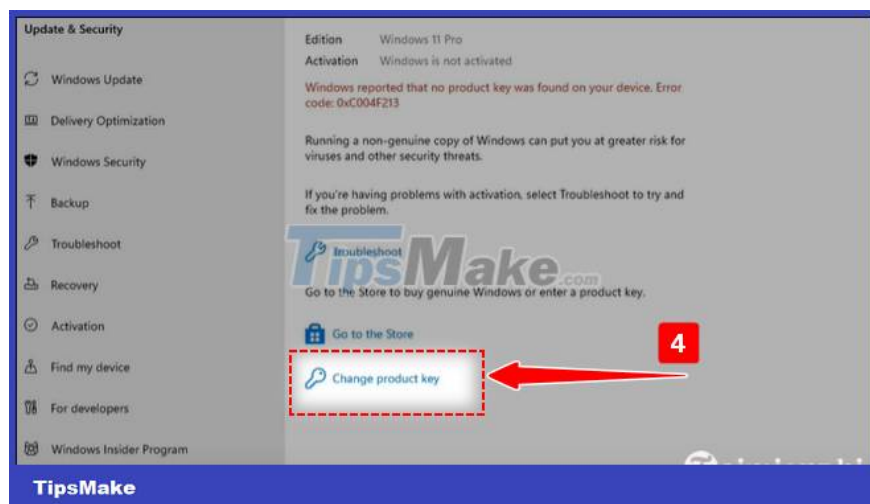

Step 1: Click on the Windows window (1) -> Select **Settings** (2)

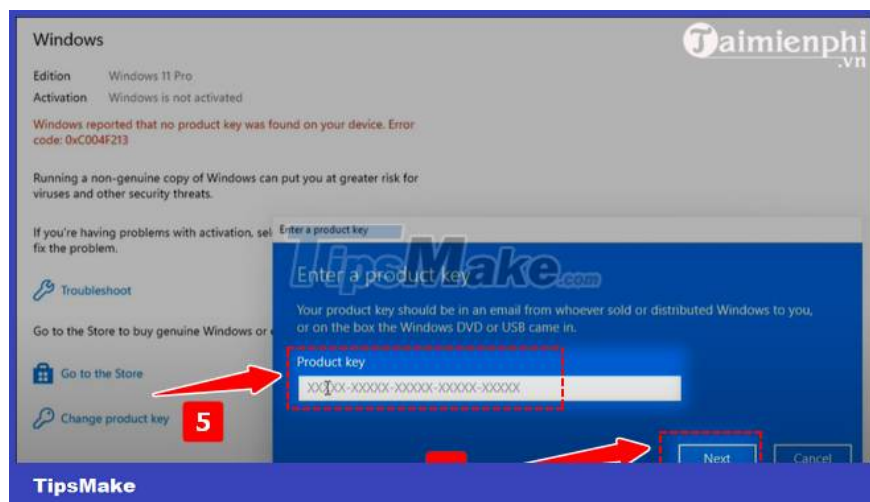

Step 2: Click on the words **Windows isn't activated** .

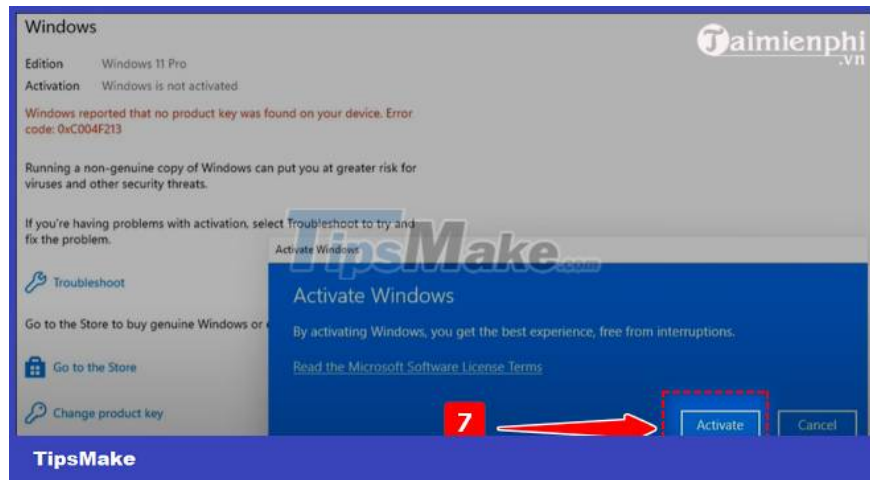

Step 3: Select **Change product key**

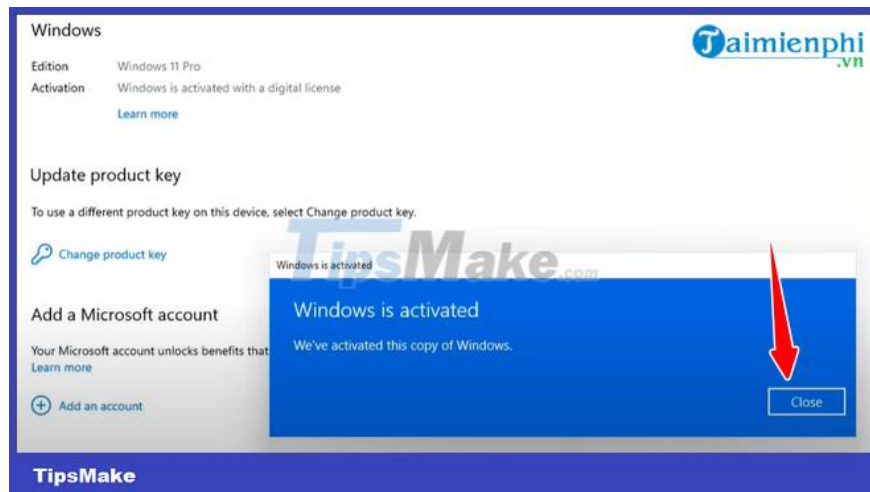

Step 4: Enter the Windows 11 license activation code in box (5) -> select **Next**

Step 5: After the system confirms the correct activation code, select **Activate** to start Active Windows 11

Active Windows 11 takes place in seconds, depending on the network connection. After activating the Windows 10 license, click **Close** to close the window.

Above is the legal Active Windows 11 Pro way. You should not use any scripts or triggers as these are illegal. A better way is to join the Windows Insider Program and upgrade from Windows 10 to Windows 11. This will automatically activate Windows 11. Windows 11 is a free upgrade from Windows 10, and you can activate it. activate Windows 10, then upgrade or use the Win 10 activation key to Active Win 11 until Microsoft releases the "original" active win 11 key.

Or simply, you can install the ghost version of Windows 11. This is the fastest way to install Windows 11. Besides, Ghost Windows 11 also integrates some office software such as Word, Powerpoint, Excel, Chrome, Coc Coc, . to help you save time when installing these software.
