

How to Add a Pinterest Tab to Your Facebook Fan Page

Pinterest tabs can be added to your existing Facebook page to help attract more fans. You can even easily import pins and boards from your Pinterest account to your Facebook page using the Pinterest tab. Log into your Facebook account. Go...

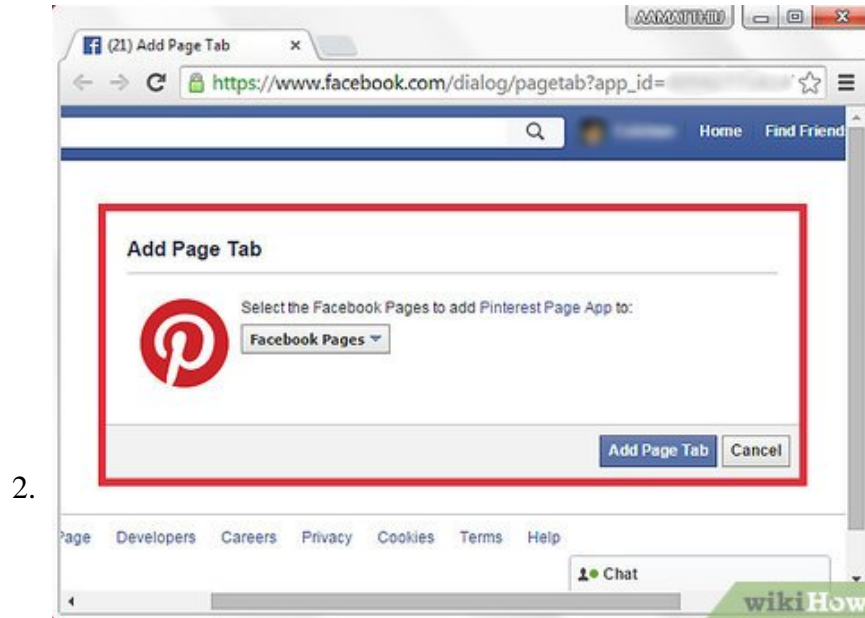

Part 1 of 2:

Adding the Pinterest Tab to Your Facebook Page

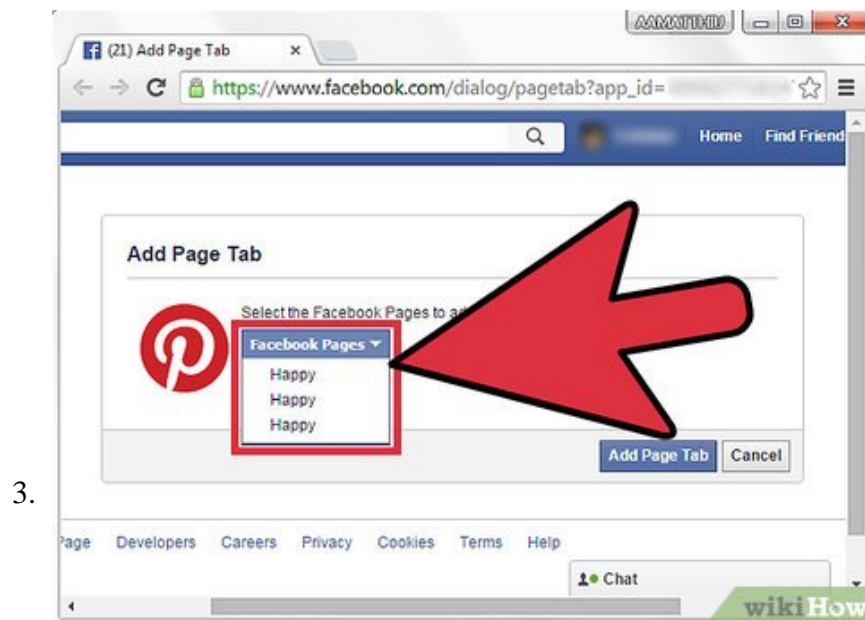

Log into your Facebook account. Go to Facebook's home page and enter your registered email address and password in the required fields at the top right corner of screen. Hit the 'Log in' button to access to your Facebook account.

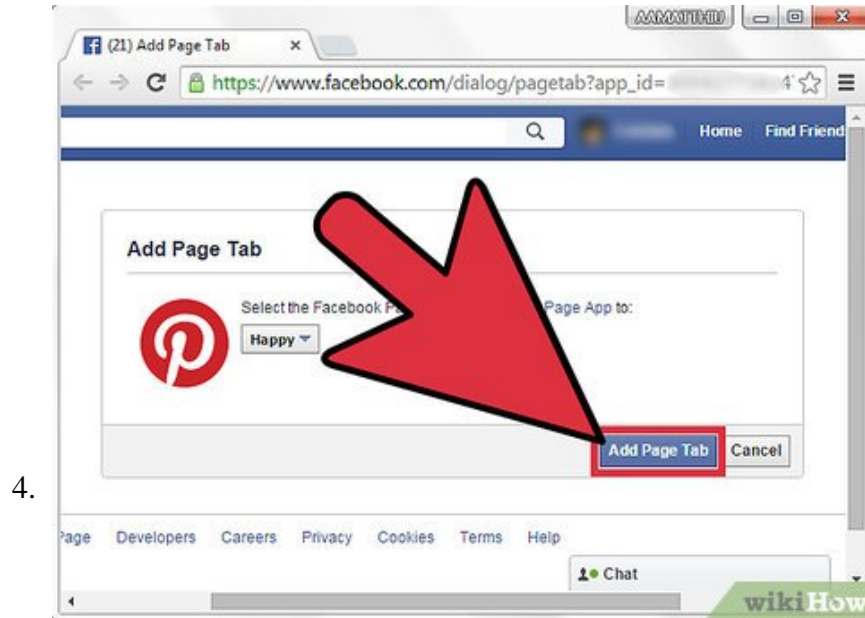

1. Remember, you must be an administrator of the Facebook fan page to add the Pinterest tab.

Visit the Iframe Host tab page launched by Woo-box on a different browser. Here, you will see all options on adding the Pinterest tab to your Facebook page.

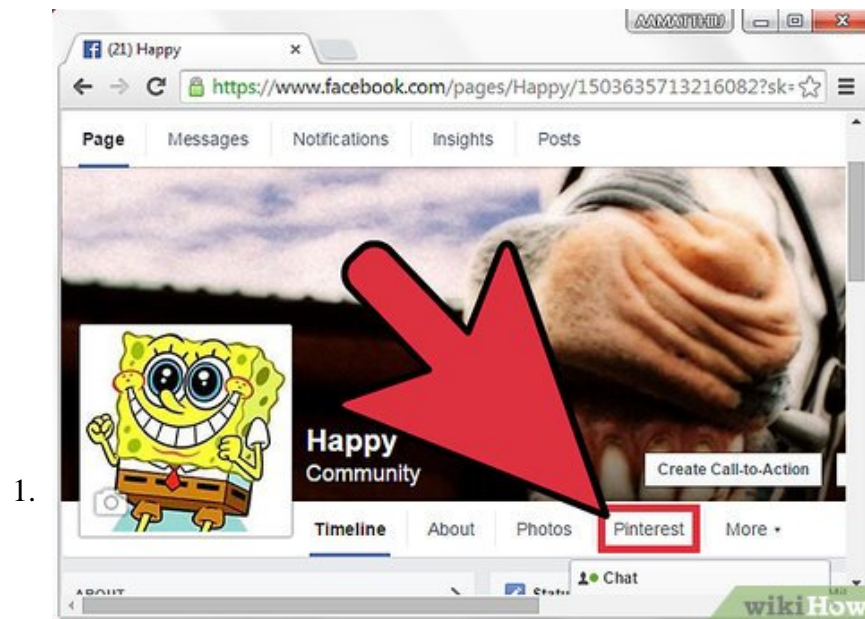

Select a Facebook page to install the app. Click on the drop-down menu tab next to the Pinterest logo, and select a particular page from the list of pages under your administration.

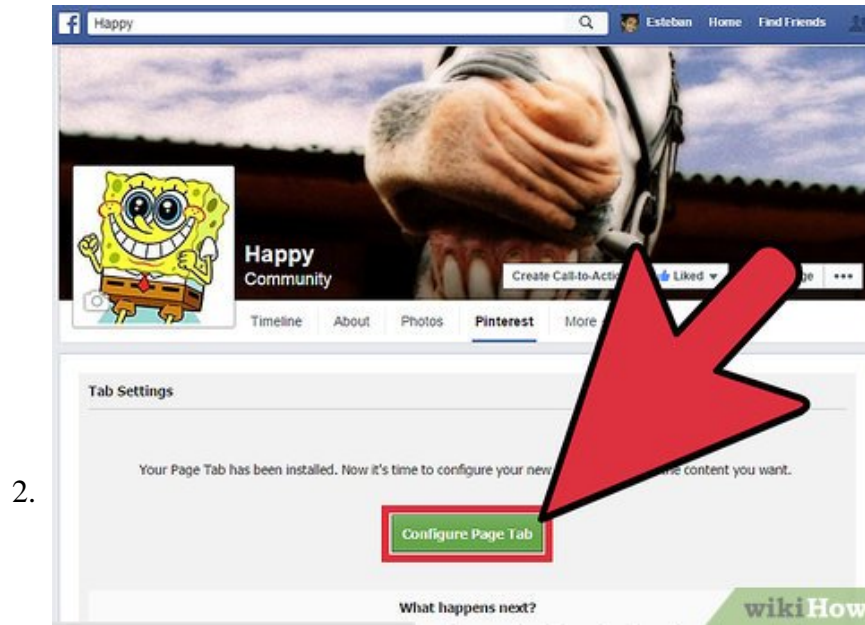

Click on the 'Add Page Tab' button at the right bottom corner of the dialog box. You will be redirected to the selected Facebook page, which will now have the Pinterest tab on it.

Part 2 of 2:

Configuring the Pinterest Tab

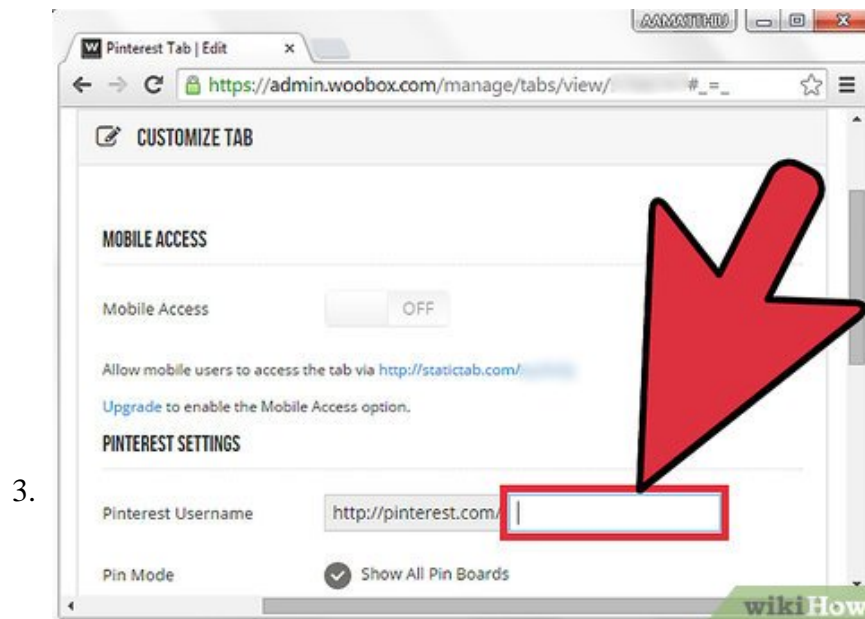

Click on the **Pinterest** tab. You'll find the new Pinterest tab along the top bar, below your page's cover image.

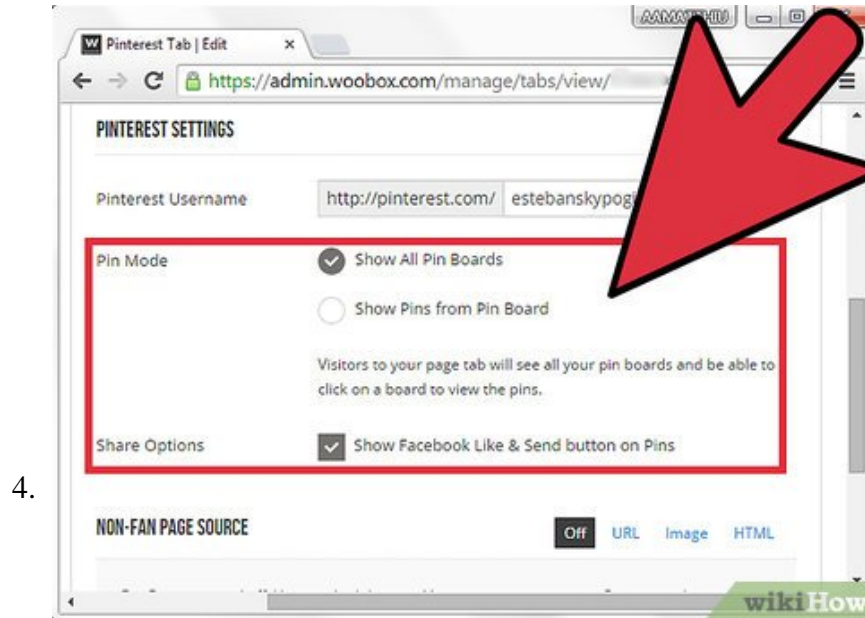

Click on the 'Configure Page Tab' button at the middle of the page. You will be taken to the Woobox Pinterest Tab Edit page.

1. If it's your first time to use Woobox, you will be asked to grant Woobox permission to access your Facebook. Just accept to proceed to the edit page.

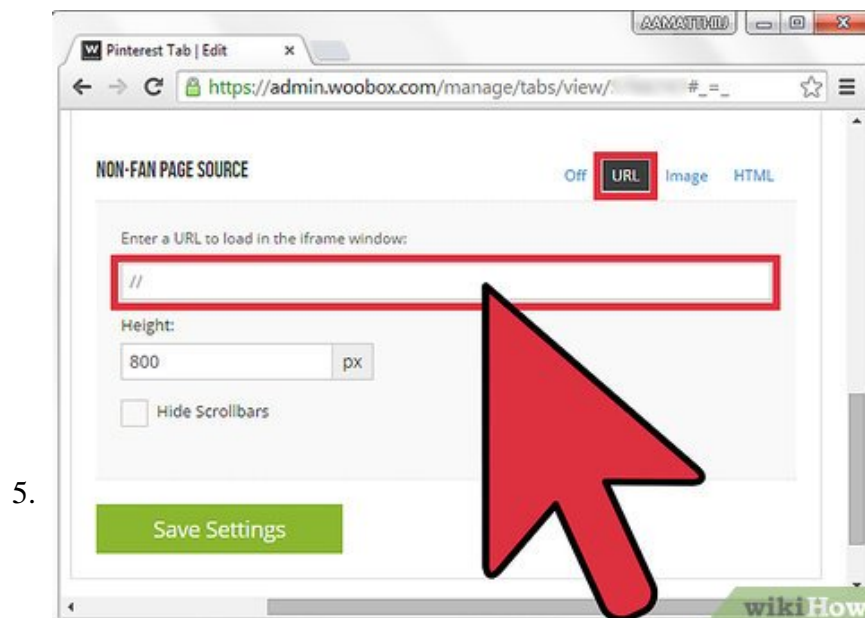

Enter your Pinterest user ID in the required field next to the 'Pinterest Username' title. Remember, just enter the user ID not the entire URL of the Pinterest account.

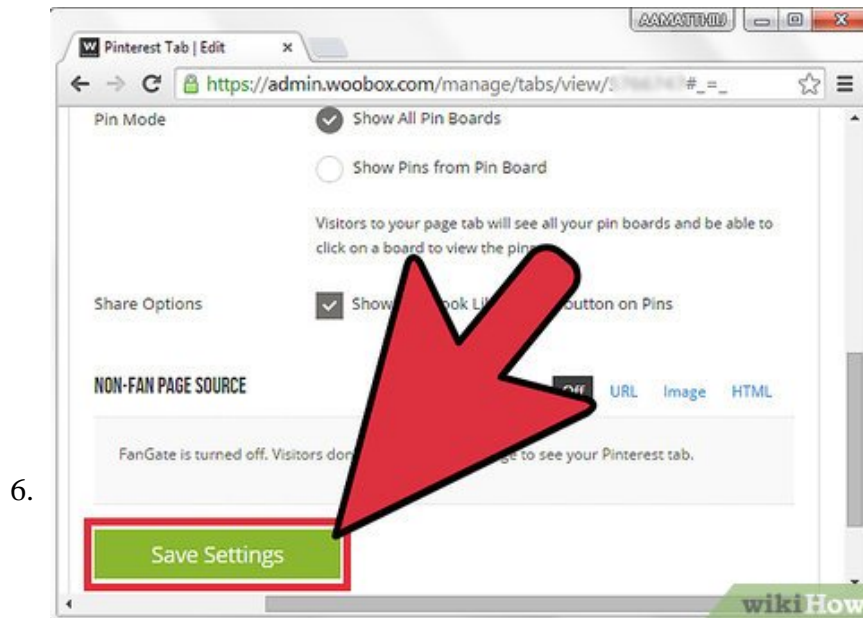

Set the appearance options of your pins. Click on one of the radio button next to the heading 'Pin Mode' to choose the appearance type of your pins or pin boards on the Facebook page. You can select from 'Show All Pin Boards' or 'Show Pins from Pin Board.'

1. The first option will display all the pin boards on your Pinterest account on your Facebook page.
2. The second option allows you to select certain pins from a particular board to be displayed on your Facebook page.
3. If you want to display the 'Facebook Like & Send' button on your pins, check the box under 'Share Options.'

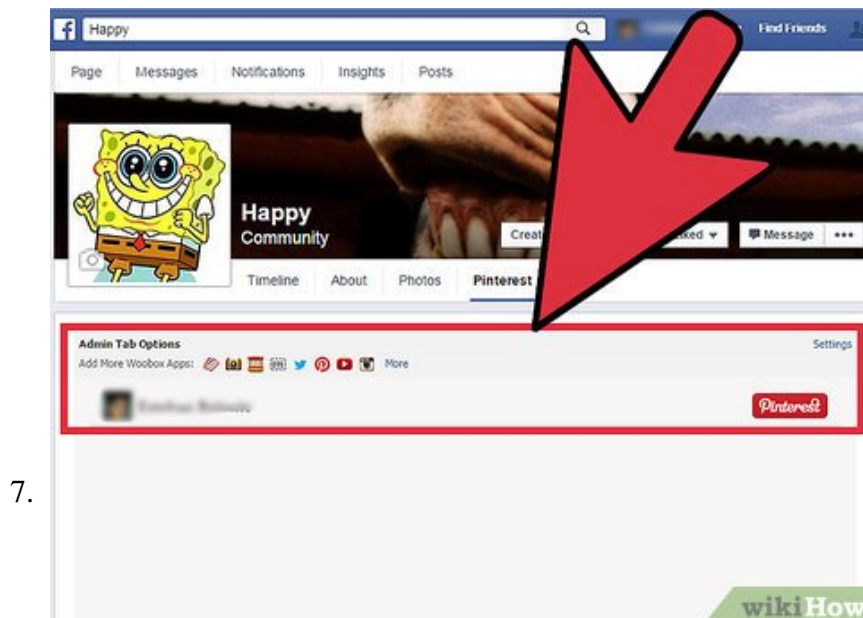

Customize the 'Non-Fan Page Source' options. The first option under this heading is the Fan Gate option. It is an option through which you can set preference on the liking and viewing contents on your page.

1. By choosing the 'Yes' option, your visitors have to like your page before viewing the contents of your Pinterest tab; on the other hand, by choosing the 'Off' option, the visitors are allowed to view the contents of your Pinterest tab without liking your page. The default setting for this should be Off.
2. You can also enter a URL under the 'Non-Fan Page Source' option to load it in the Iframe window. Do this by clicking on 'URL' tab to the right side of the 'Non-Fan Page Source' title.
3. Similarly, you can upload an image or use an HTML code by clicking on 'Image' or 'HTML' tab on right side.

Click on the 'Save Setting' button at the bottom of the page when you are done. Your Facebook page and Pinterest account should be connected, and the tab should load all the pins available under your Pinterest boards.

Check the link between the Facebook page and the Pinterest account. After adding the Pinterest tab on your Facebook page, you should check the tab whether it is working properly or not.

1. Go to your Facebook page and scroll down the page until you find out the App tab on the left side.
2. Click on Pinterest logo under the App tab. Once the next page loads, you will see the Pinterest boards and pins you allowed to be displayed on your Facebook page, under the Pinterest tab.
3. You can also find the Pinterest tab under the More tab at the top of the page.
