

# How to add AirTag to the Find My app on iPhone

Apple's AirTags are small, button-shaped devices designed to attach to items such as keys and wallets to allow these accessories to be tracked by Bluetooth right next to Apple devices in the Find app. My.

If you just got the new AirTag, you'll want to get up and running. Before you do, make sure you have updated your iPhone or iPad to iOS 14.5 or iPadOS 14.5 respectively. You can check your iOS version under **Settings> General> Software Update** .

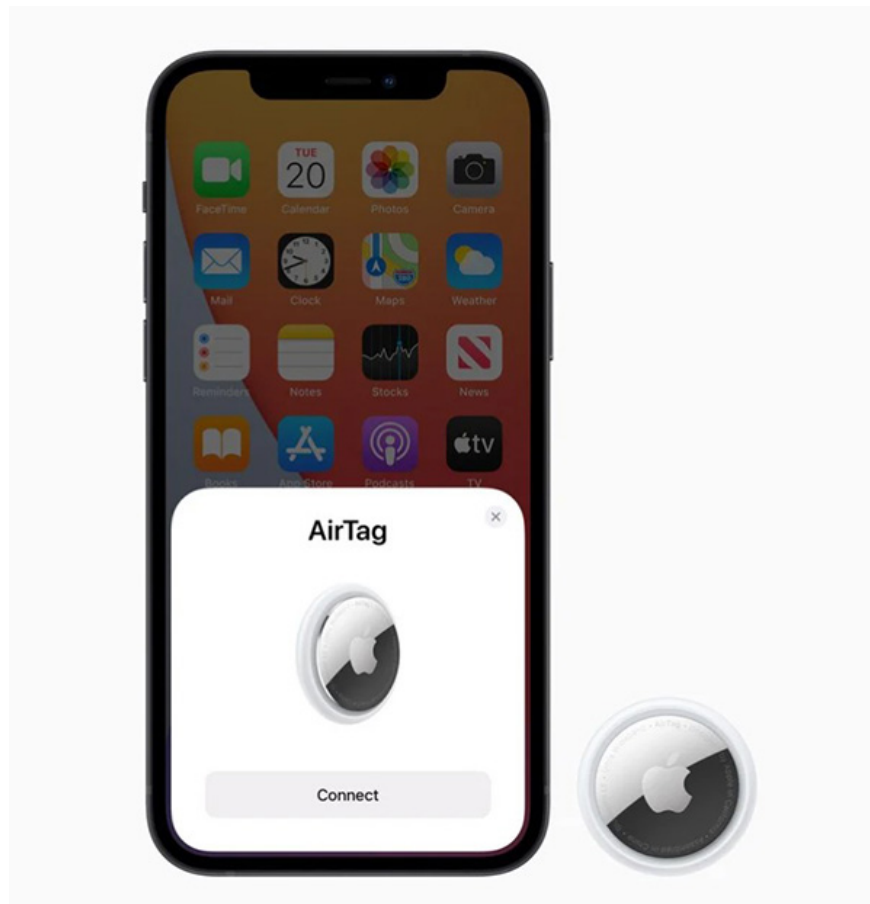

## How to add AirTag to iPhone and iPad

Make sure iPhone is unlocked and showing the home screen.

Remove the battery from the AirTag and reinsert it if you haven't already, then keep the device close to your iPhone.

Click **Connect** appears on the screen.

Select a name from the list, or select **Custom Name** to type a name and select an emoticon, then click **Continue** .

Select **Continue** to register the device with Apple ID, then click **Finish** .

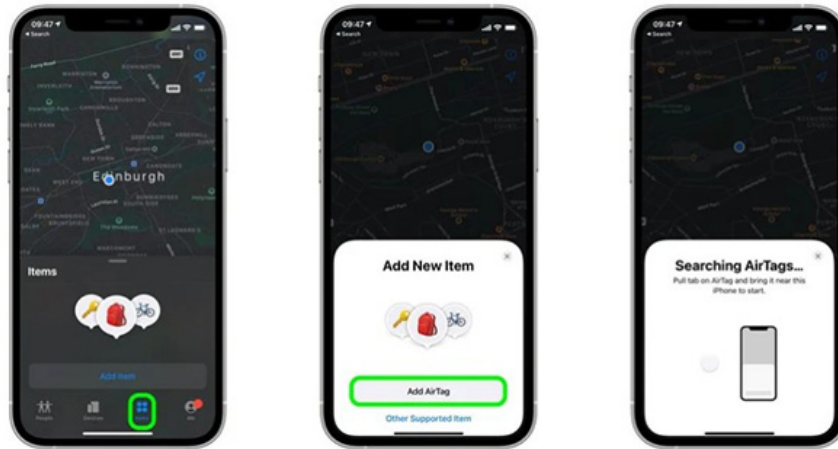

## How to add AirTag to the Find My app

If you want, you can sign up for a new AirTag right in the Find My app.

Open the **Find My** app , choose **Items** .

Scroll down to the bottom of the list of widgets, select **Add New Item** .

Select **Add AirTag** and follow the on-screen instructions.

If the AirTag is registered with someone else's ?Apple ID?, they'll need to unlink it before you can add the device. This can be done in the Find My app on their ?iPhone?.
