

How to Add an Application to the Dashboard on an Apple Computer

So you want to add an application to dashboard on mac. Here is how: Go to Apple's dashboard widget page and find the application (aka widget) you want to install.

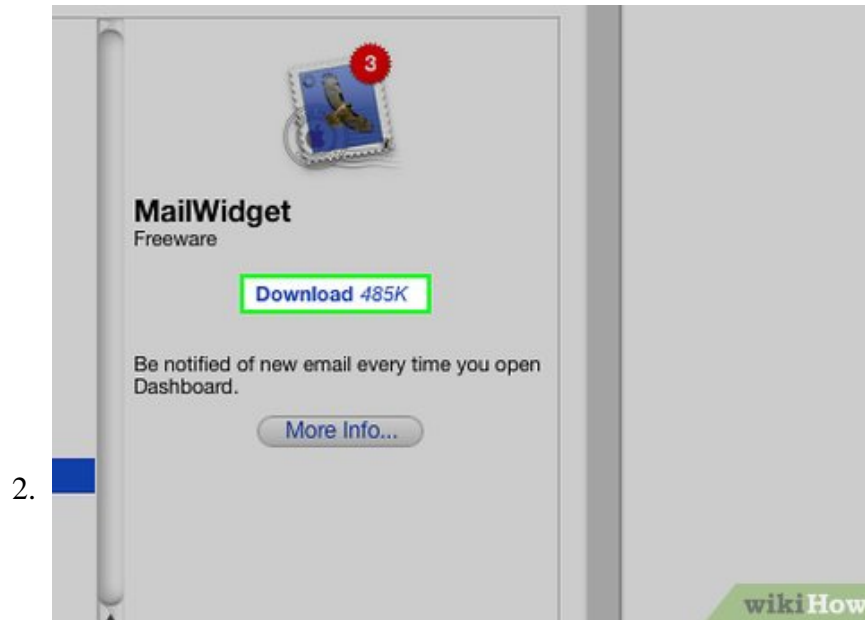

Method 1 of 2:

Installing new dashboard applications.

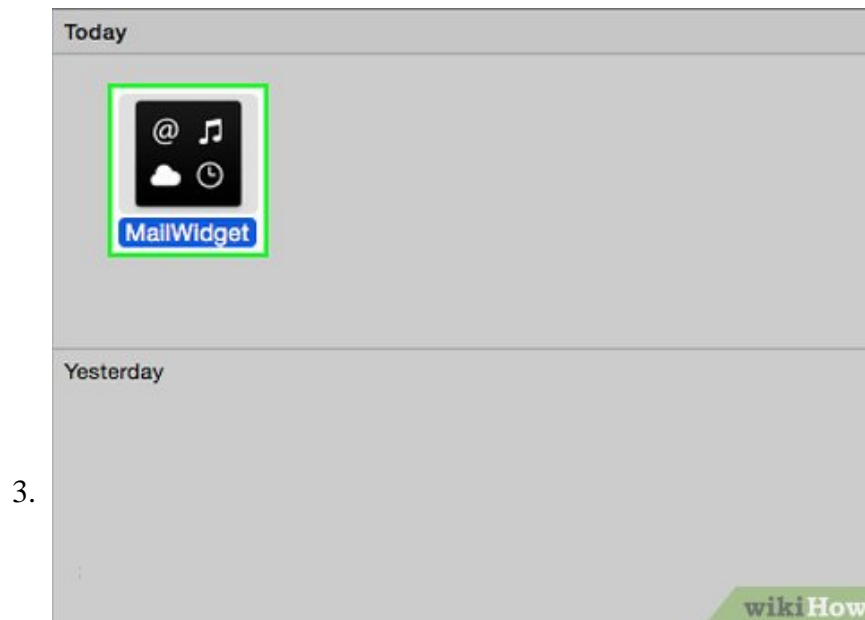

1.

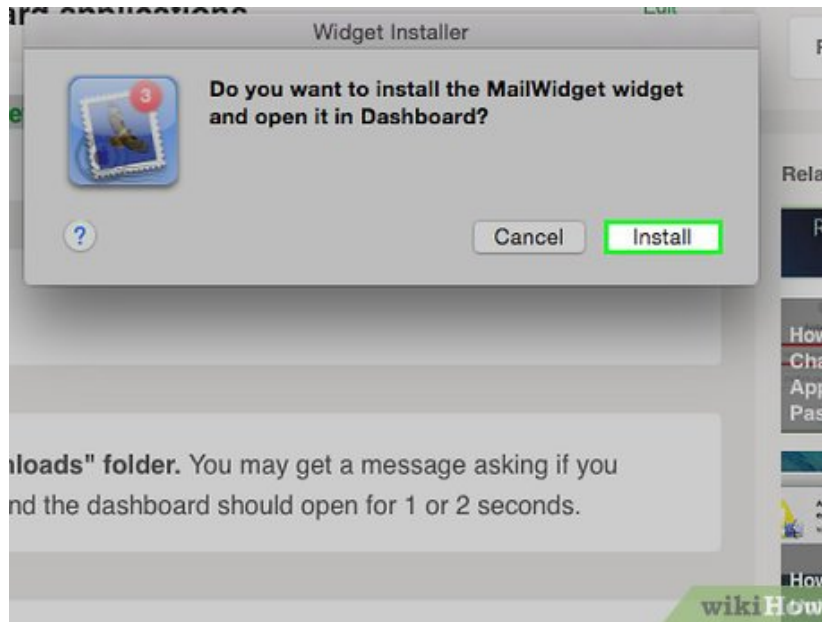

Go to Apple's dashboard widget page and find the application (aka widget) you want to install.

Press download.

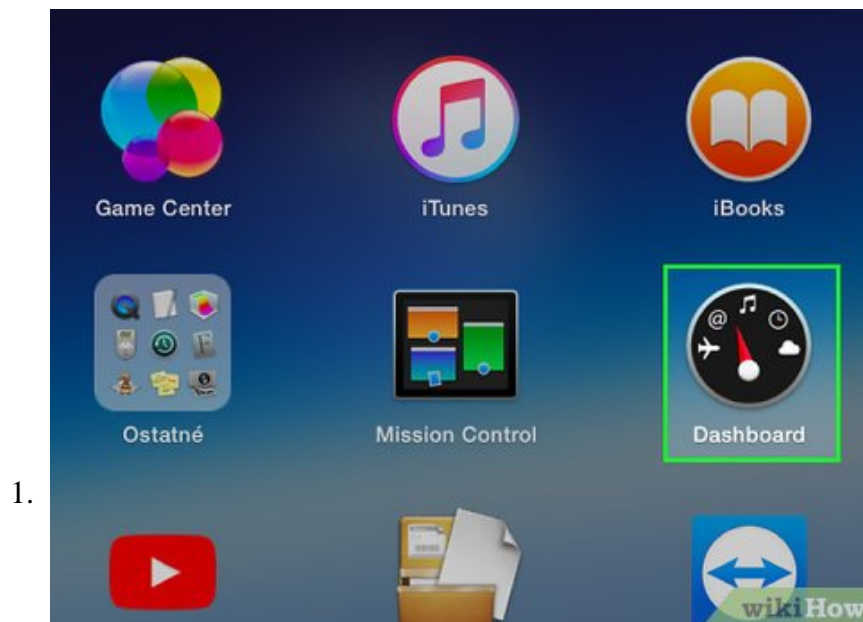

Open the new file in the "Downloads" folder. You may get a message asking if you want to install it. Press "Install" and the dashboard should open for 1 or 2 seconds.

Follow the instructions below for adding an existing application.

Method 2 of 2:

Adding existing applications

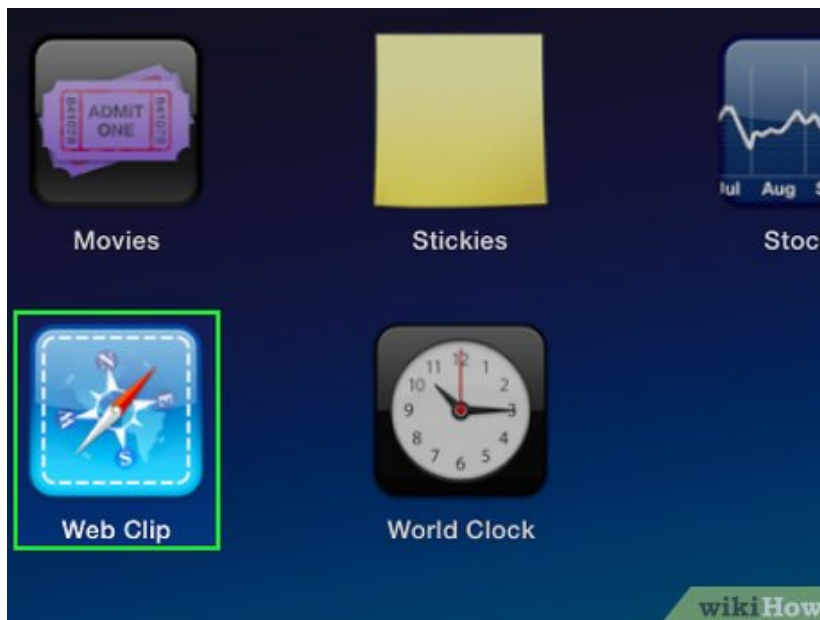

Open the dashboard. This may be done by pushing the key that looks like a speedometer.

2.

Press the + button. A list of dashboard applications should come up.

3.

Select the one you wish to add.

4.

You can make changes to it by pressing the 'i' button in the corner of the widget.
