

How to add any application to the right-click menu in Windows?

In the previous article, we showed you how to quickly open Windows applications through Run commands (link to refer to the end of the article). Today, we will introduce you to another very convenient way, which is to add the application you use often to the right-click menu. Please consult.

In the previous article, we showed you how to quickly open Windows applications through Run commands (link to refer to the end of the article). Today, we will introduce you to another very convenient way, which is to add the application you use often to the right-click menu. Please consult.

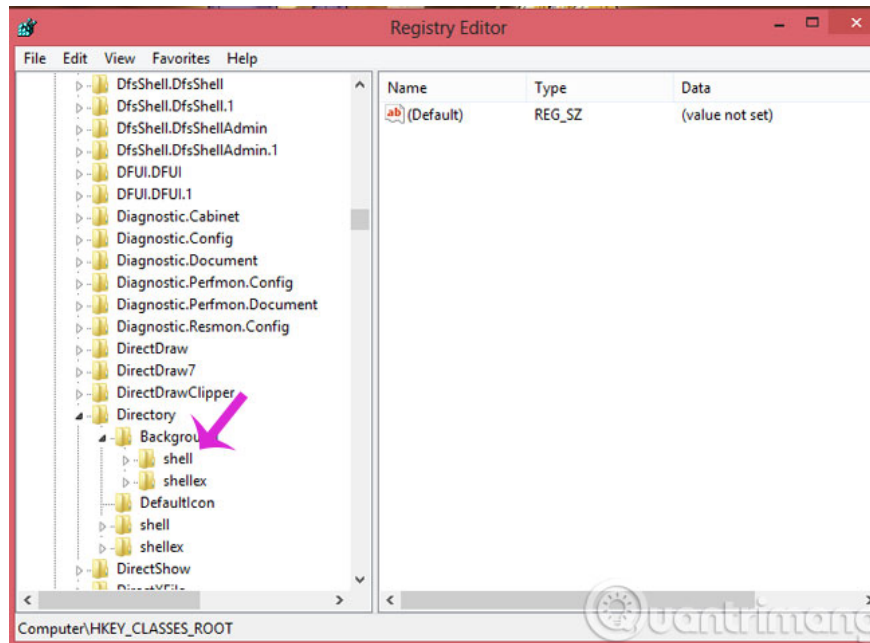

Download Photoshop CS2

Step 1: Press Windows + R to open the Run dialog box and enter Regedit, click OK

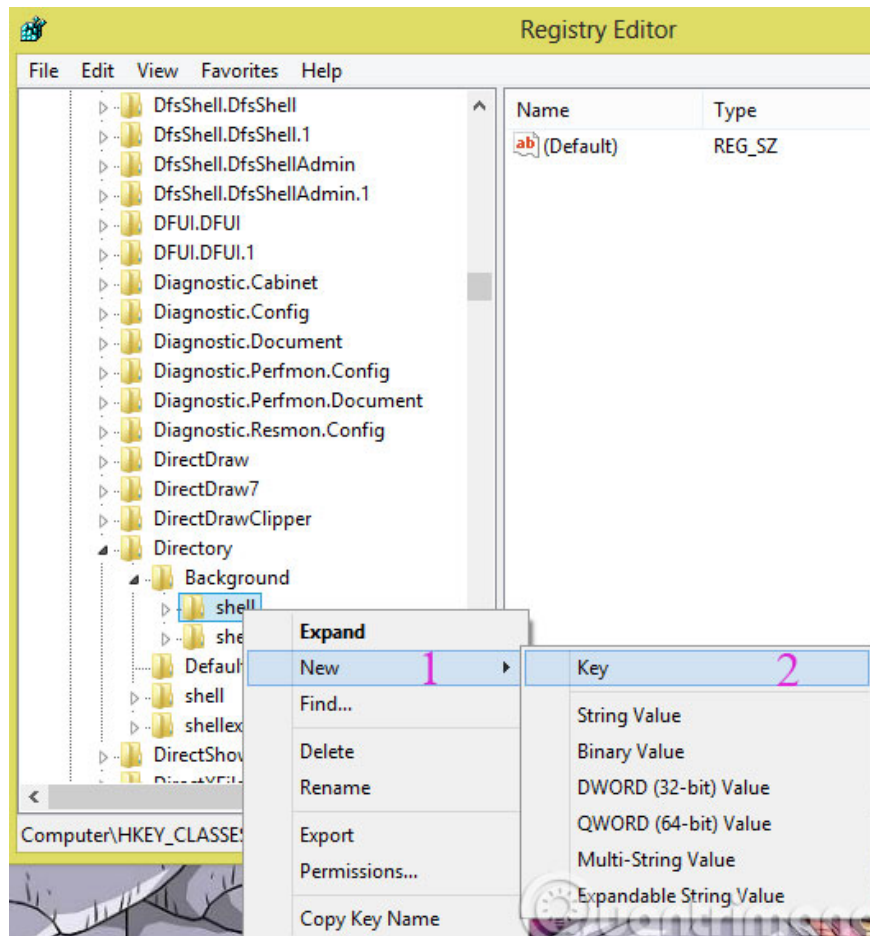

Step 2: In the Registry Editor interface, unlock it with the path

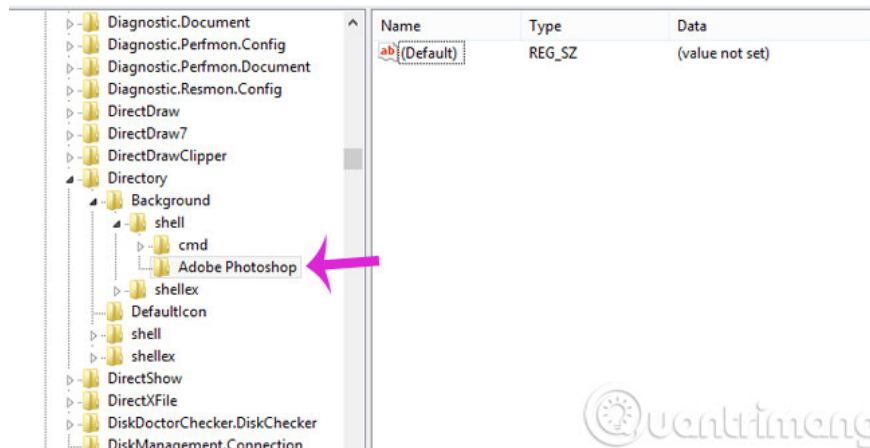

HKEY_CLASSES_ROOT\Directory\Backgroundshell

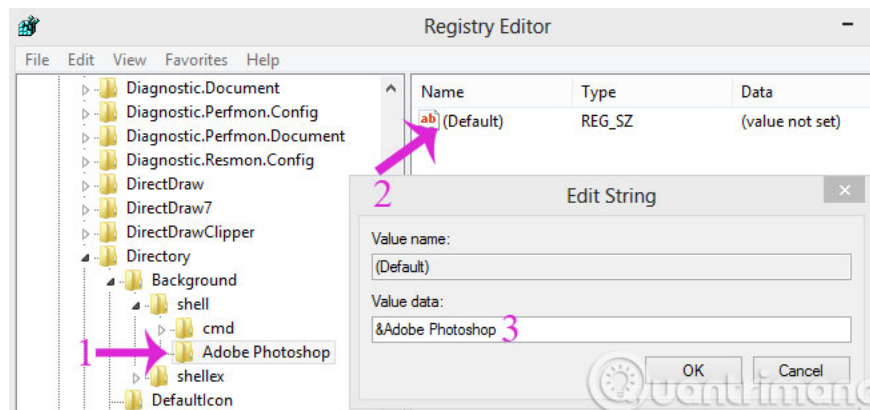

Step 3: Right-click Shell and select New > Key

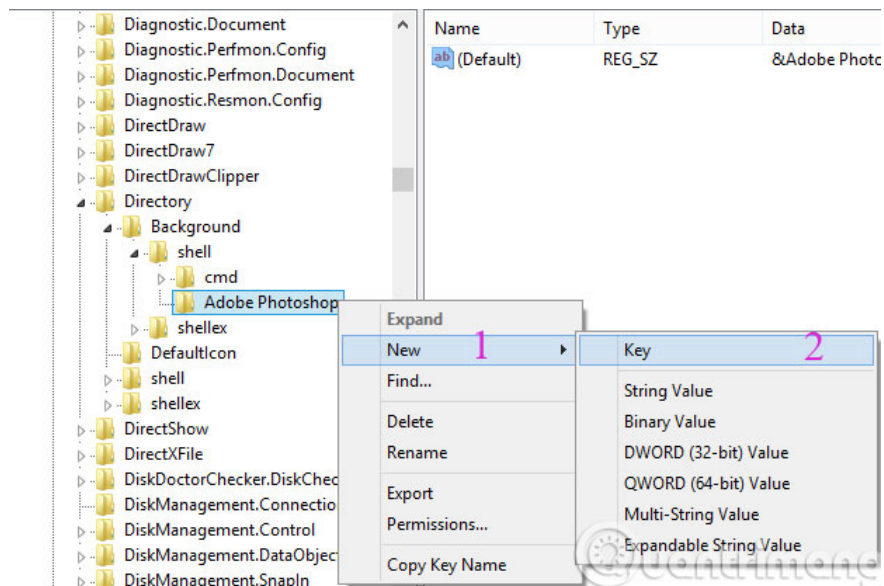

Step 4: Change the name to the application you want to add to the right-click menu (assuming Adobe Photoshop)

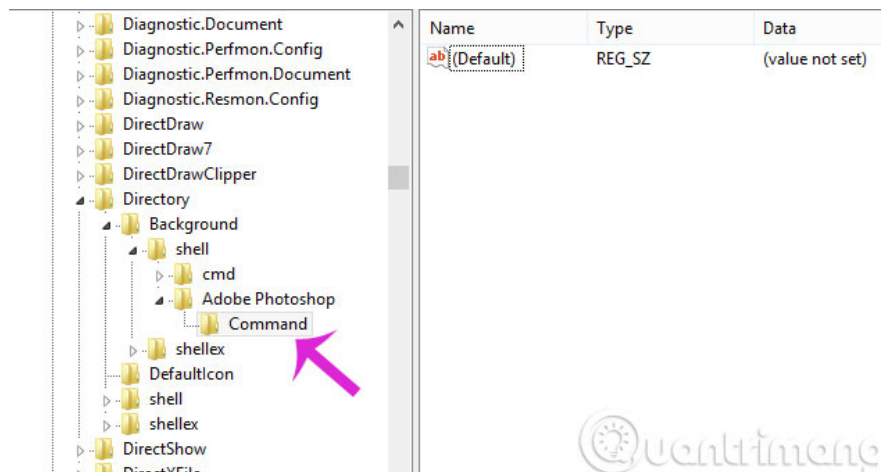

Step 5: Click on Default in the right column and add & Adobe Photoshop to Value data

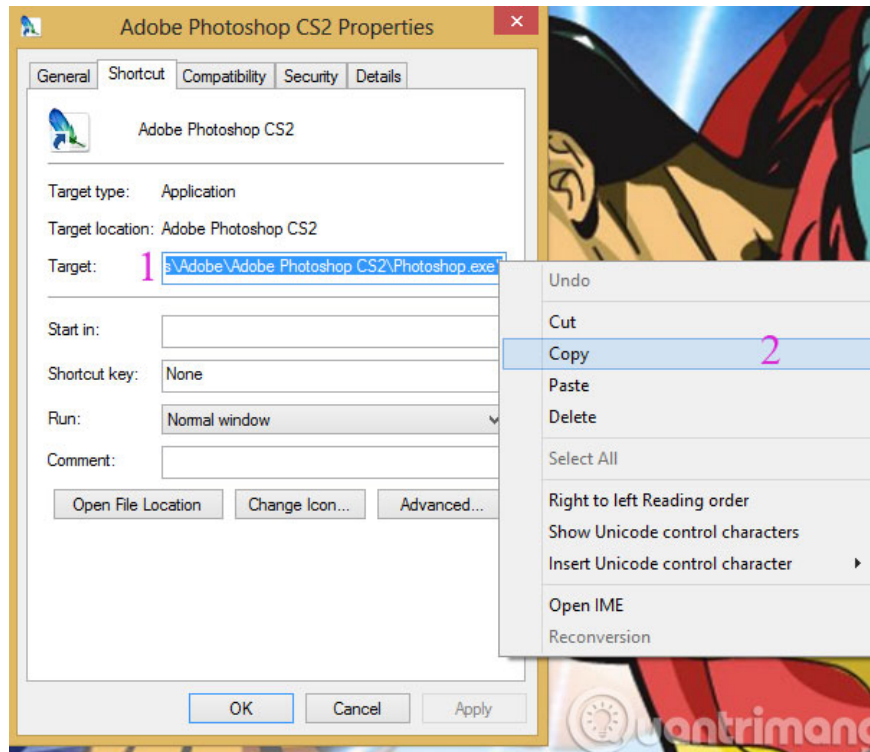

Step 6: Continue right-click on Adobe Photoshop and select New > Key

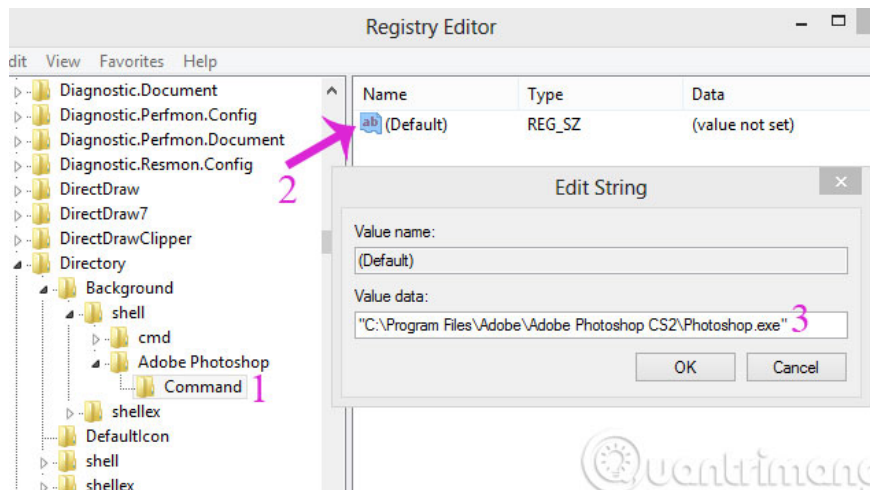

Step 7: Name the new folder Command

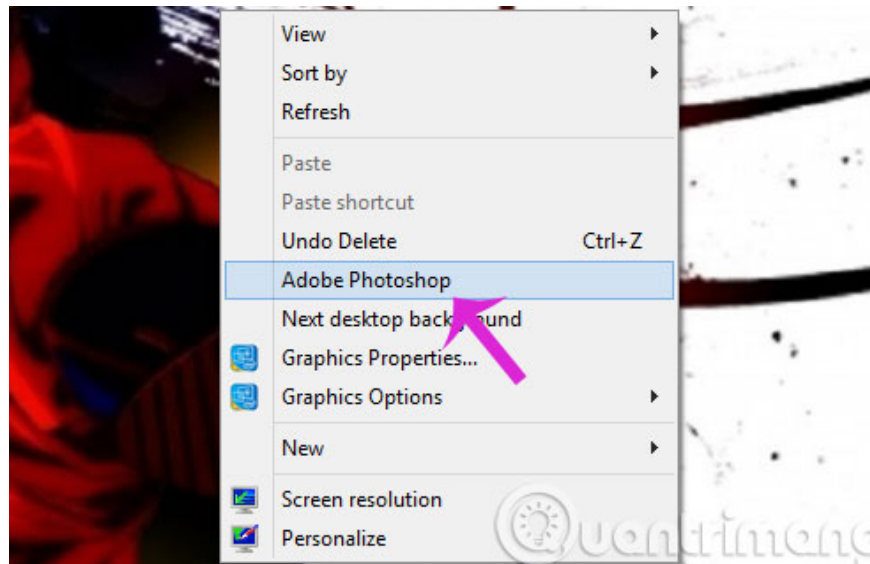

Step 8: Right-click the application you want to add and select Properties. Then copy the link in the Target box

Step 9: Open the Registry again, click on the Command folder and copy the path above into Value data

Step 10: Exit the Desktop, right-click to see the result

1. Instructions for quickly opening Windows applications using the Run command
2. 10 shortcut keys to remember when not using the mouse
3. More than 60 shortcuts can not be unknown to Windows users
