StandBy iPhone mode turns iPhone into a smartwatch, viewing any content on the screen you want. We can add widgets to StandBy iPhone to conveniently monitor when charging, for example adding Apple Music widget to StandBy iPhone. When you add the Apple Music widget to StandBy iPhone, you can listen to music or follow the charts. The article below will guide you on adding Apple Music widgets to StandBy iPhone.

## Instructions for adding Apple Music widget to StandBy iPhone

### Step 1:

After putting the iPhone into StandBy mode, we **press and hold the screen** to make adjustments.

### Step 2:

Next, click on **the plus icon** in the top left corner of the screen to adjust.

Here you will see 2 columns, one side is the application and the other side is the utility of the application installed on the iPhone.

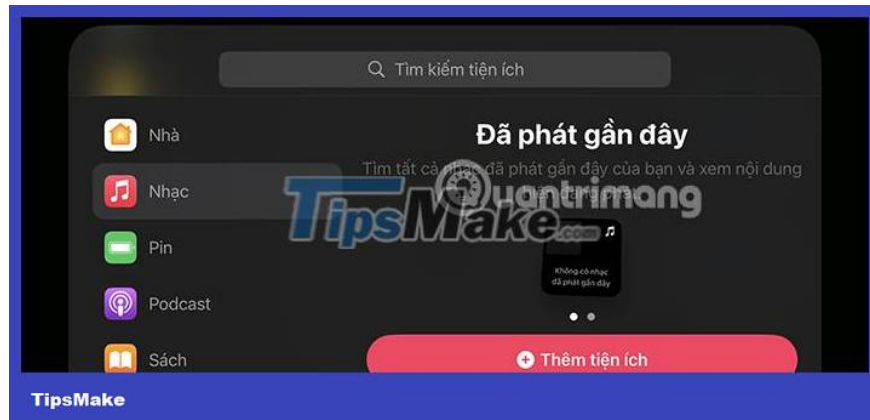

### Step 3:

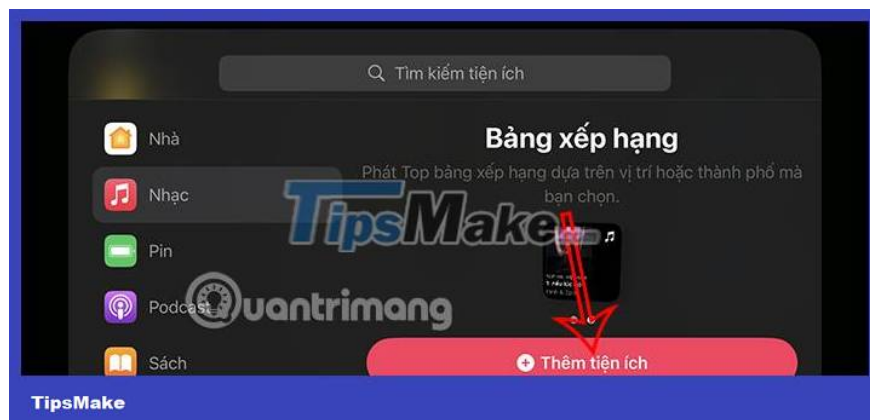

In the application column, we find and **click on the Music application** to see the Apple Music widget displayed for iPhone StandBy mode.

As a result, you will see **the Apple Music widget**, including the recently played songs widget and the Apple Music charts widget.

Select the Apple Music widget you want to add to StandBy iPhone mode and then **click Add widget** below.

#### Step 4:

The Apple Music widget results are displayed on the StandBy iPhone screen as below, click **Done** to save the settings.

So when you activate StandBy iPhone mode, you will see the Apple Music widget as shown below to access and enjoy music when you want.

### Step 5:

To delete the Apple Music widget on this iPhone StandBy screen, hold down the widget and then click the minus icon .

Click **Delete** to agree to delete the Apple Music utility in StandBy iPhone mode.
