

How to add battery charging utility on Xiaomi phones

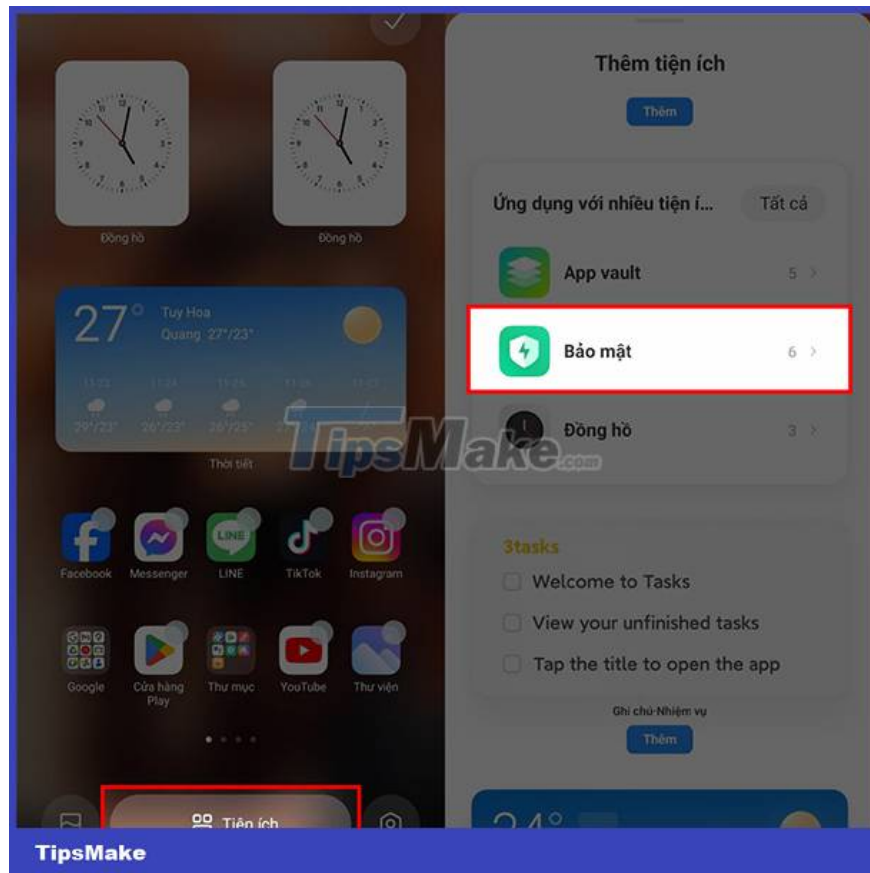

When adding the battery charging utility on the Xiaomi phone screen, users will see how long the battery charge on Xiaomi is left, and how long it takes to fully charge the battery so you can control it as you like.

Xiaomi has now added many types of widgets on the screen to give users more options to use, such as a battery charging widget on the screen for you to use. When adding the battery charging utility on the Xiaomi phone screen, users will see how long the battery charge on Xiaomi is left, and how long it takes to fully charge the battery so you can control it as you like. The article below will guide you to add battery charging utility on Xiaomi phones.

Instructions for adding battery charging utilities on Xiaomi

Step 1:

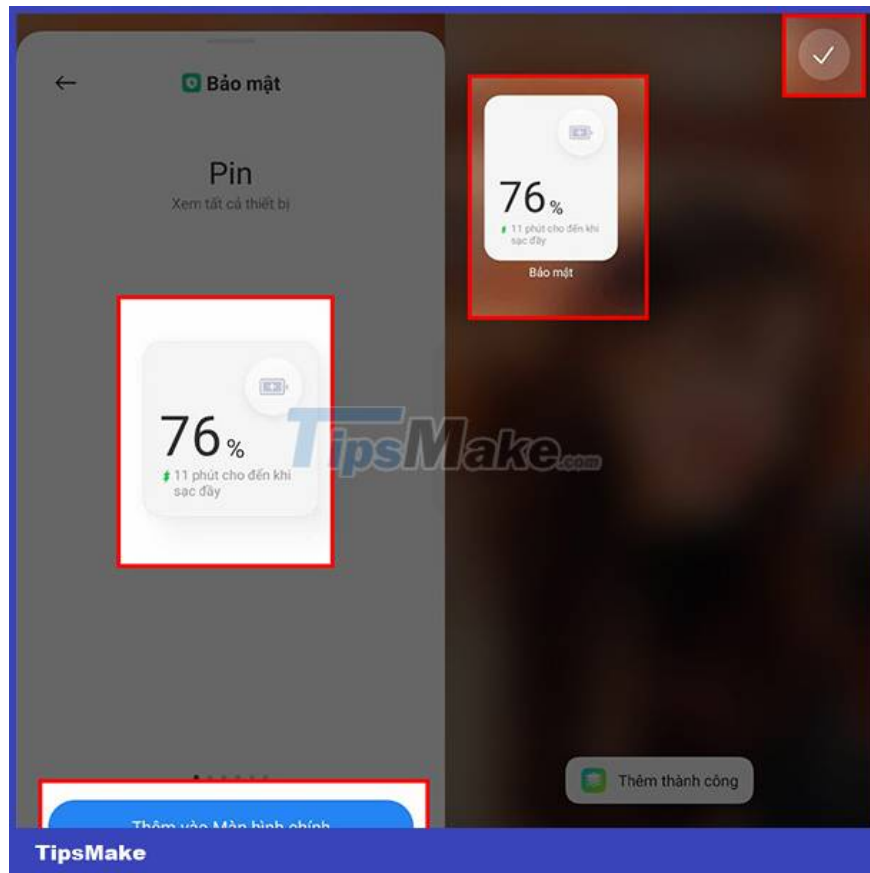

First, users press and hold the phone screen, then **click Widgets** below to add widgets to the phone screen. Now displaying utility options, users click on **the Security group** to add.

Step 2:

Display utilities in the Security section on the phone. Here you find **the Battery utility** to use. Users will then see options to display the battery charging utility interface on different phones.

We find the battery charging utility display style we like, then **click Add to main screen** below. Finally **press the v mark in the top right corner** of the screen to save the new changes.

As a result, you will see the battery charging utility displayed on the Xiaomi phone screen and display the phone's battery status as well as the battery status when we charge the battery.
