

How to add featured Instagram

Highlights on Instagram appear in your personal interface and will not disappear after 24 hours of posting as usual on Instagram.

Highlights on Instagram appear in your personal interface and will not disappear after 24 hours of posting as usual on Instagram. Highlights Instagram can be taken from the news you filmed earlier in the Instagram archive, or we can turn the news into a featured article. Feature articles differ from normal news when you can edit the covers on your personal Instagram interface and change the featured display name. The following article will guide you on how to create featured messages on Instagram.

How to add highlights on your personal Instagram

At the interface in **personal Instagram** , click **the New icon** to access the **archive** we have posted. Here you will see all the previous postings, click on the items you **want to use** and then click Next.

You can then **edit the cover image for the featured** item , add a **title** and click **Add** .

How to create a new featured message on Instagram

Step 1:

To create a new featured story from a new shoot, first **capture the Instagram video** as usual, then **post it to Your News** . Back to Instagram interface, **click on the new record** .

Step 2:

In this interface click on **Highlight** , then you also **enter a title** for the featured item and press Add below. So you've successfully added new highlights to your profile.
