

How to add icons to iPhone status bar

You can add a lot of icons to the iPhone status bar in the near position, the sim column with the instructions in this article

Since iOS does not have many customizations to change the interface. So when you intend to change the interface on iOS, even if only a small change, most users will think of jailbreak.

Because to change the interface on the iPhone, the user is required to jailbreak the device, then can change the motion effect, change the icon shape, change the shape of the sim column .

However, there are some ways to help you change the iPhone interface without having to jailbreak the device. Instructions to add icons to the status bar under this article is an example to help you customize the look of the iPhone without having to jailbreak.

1. How to play Wifi on iPhone, iPad
2. How to add the Live Photo feature to iPhone does not support
3. How to customize the application icon on iPhone

How to add icons to status bar on iPhone

Step 1: To add icons to the iPhone status bar, please download Polarr Photo Editor application on your phone, then go find the icon you want to insert.

You can search for the symbol name and add the "white png" tag for the white or "black png" icon for black. The example below I am looking for the gun icon with the keyword "white gun png". Next, start Polarr Photo Editor and select **Get started with Express** .

Done editing, click on the **V** on the left end. Remember to adjust so that this icon is not inserted into the status bar or the status bar.

When you're done editing, click **Save** to save the edit on that wallpaper, or click **Save copy** to save it as a new image.

Now go out to the photo gallery, find the edited image and set it as your home screen or lock screen.
