

How to add / remove Feedback button in Microsoft Edge Chromium

Microsoft Edge includes a Feedback button on the toolbar used to quickly send feedback to Microsoft. If you don't want the Feedback button on the toolbar in Microsoft Edge, you can delete it.

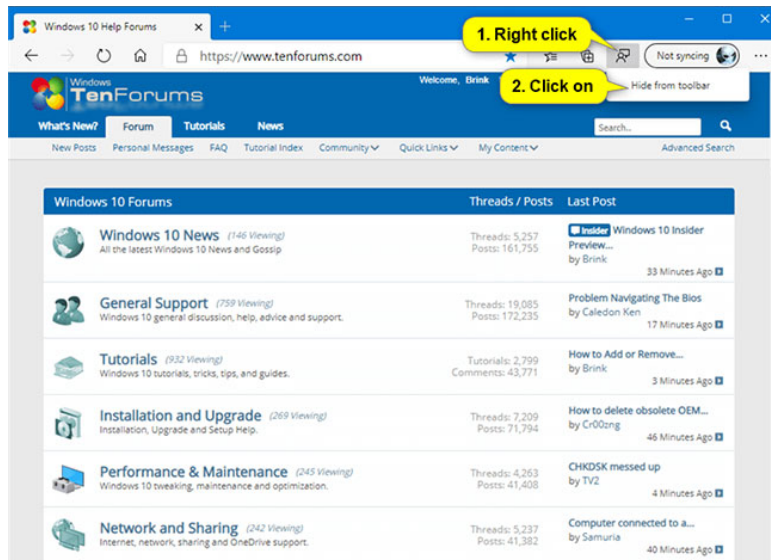

Microsoft Edge includes a Feedback button on the toolbar used to quickly send feedback to Microsoft about the experience or problem with the Microsoft Edge build.

If you don't want the Feedback button on the toolbar in Microsoft Edge, you can delete it.

This guide will show you how to add or remove Feedback buttons on the toolbar in Chromium-based Microsoft Edge.

OPTION 1: Delete from the Feedback button itself in Microsoft Edge

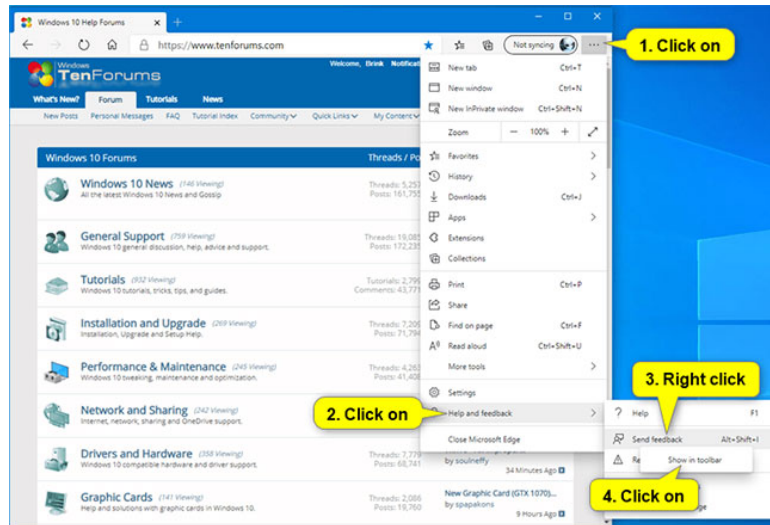

1. Open **Microsoft Edge**.
2. Right-click or press and hold the **Feedback** button on the toolbar, and then click **Hide from toolbar** .

Click Hide from toolbar

OPTION 2: Add or remove the Feedback button in the Settings menu

1. Open **Microsoft Edge**.
2. Click the **Settings and more** button (**Alt + F**) (3 dots).
3. Click **Help and Feedback** , right-click **Send feedback** and click **Hide from toolbar** or **Show in toolbar** depending on the current state of the Feedback button.

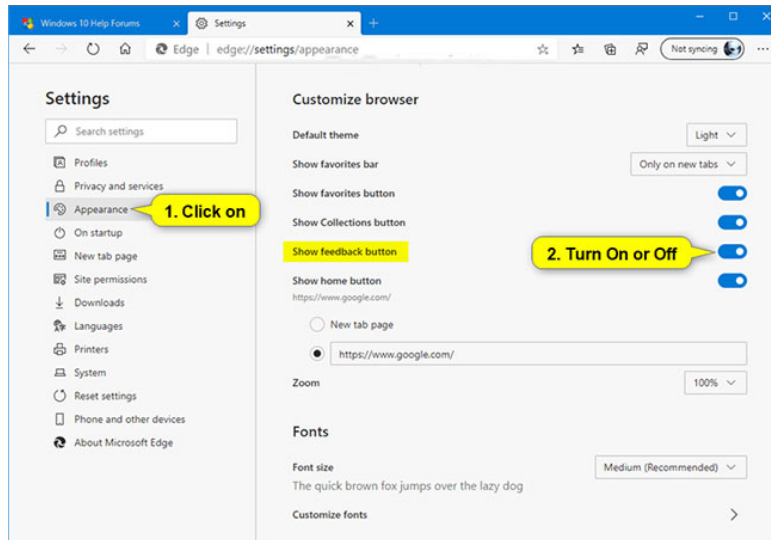

Click Hide from toolbar or Show in toolbar

OPTION 3: Add or remove the Feedback button in the Settings section of Microsoft Edge

1. Open **Microsoft Edge**.
2. Click the **Settings and more** button (**Alt + F**) and click **Settings**.
3. Click **Appearance** on the left and turn it on (default) or turn off the **Show feedback button option** on the right for what you want.

Note : If you don't see the left panel, then press the 3-bar menu button at the top left, or expand the horizontal borders of the Microsoft Edge window until you see the panel.

Click on Appearance on the left

4. You can now close the **Settings** tab if desired.

OPTION 4: Force always add or remove Feedback button in Microsoft Edge Stable for all users

Note : You must be logged in as an administrator to use this option.

This option will not affect Microsoft Edge's Beta, Dev or Canary channels. It will only affect the Microsoft Edge Stable channel.

The downloadable .reg files below will add and modify the DWORD value in the registry:

```
HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Edge
```

1. Follow step 2 (to add), step 3 (to delete), step 4 (default) below for what you want to do.
2. To always force the Feedback button in Microsoft Edge, download this file and go to step 5 below.

Note : This setting will be grayed out and prevents users from using options 1, 2, and 3.

3. Force to remove Feedback button in Microsoft Edge, download this file and go to step 5 below.
4. Default - Allows users to add or remove Feedback buttons in Microsoft Edge. Download this file and go to step 5 below.
5. Save the .reg file to the desktop.
6. Double click on the downloaded .reg file to merge it.
7. When prompted, click **Run> Yes (UAC)> Yes> OK** to approve the merge.

8. If Microsoft Edge is currently open, close and reopen Microsoft Edge to apply the changes.

9. If you like, you can now delete the downloaded .reg file.
