

How to add subtitles and lyrics automatically on CapCut

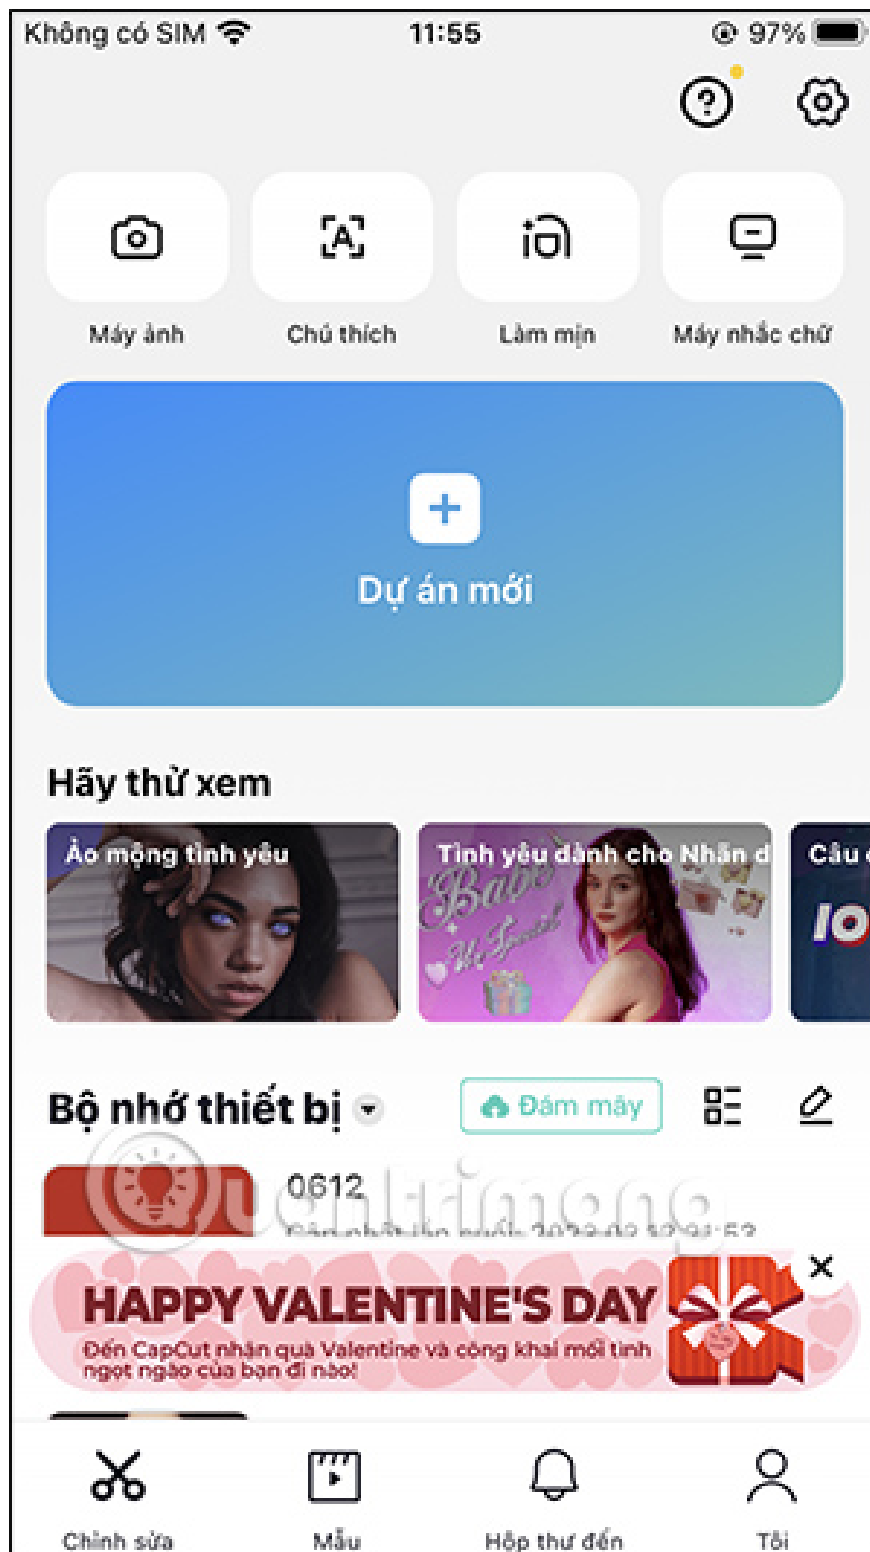

CapCut also has the option to add video subtitles, similar to some popular video subtitling apps. The app automatically detects the audio and speech in the video and then displays it.

CapCut also offers the option to add video subtitles, similar to some popular video subtitling apps . The app automatically detects audio and speech in the video and displays it without the user having to manually enter subtitles or lyrics. You can then edit the subtitle content to your liking. This article will guide you on how to add subtitles and lyrics automatically using CapCut.

Instructions on how to add automatic subtitles to videos using CapCut

Step 1:

In the CapCut interface, we will add the video we want to add subtitles to and begin editing.

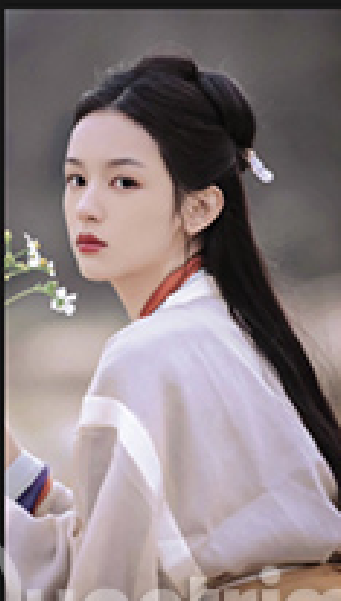

Step 2:

In the video editing interface, you will select the **Text option** and then select **the Automatic Subtitles option** .
