The Dark mode feature helps us minimize eyestrain when surfing the web during the night. If you have not found the way to enable Dark mode on Chrome, Coc Coc, Firefox web browsers, please follow the instructions in the article below.

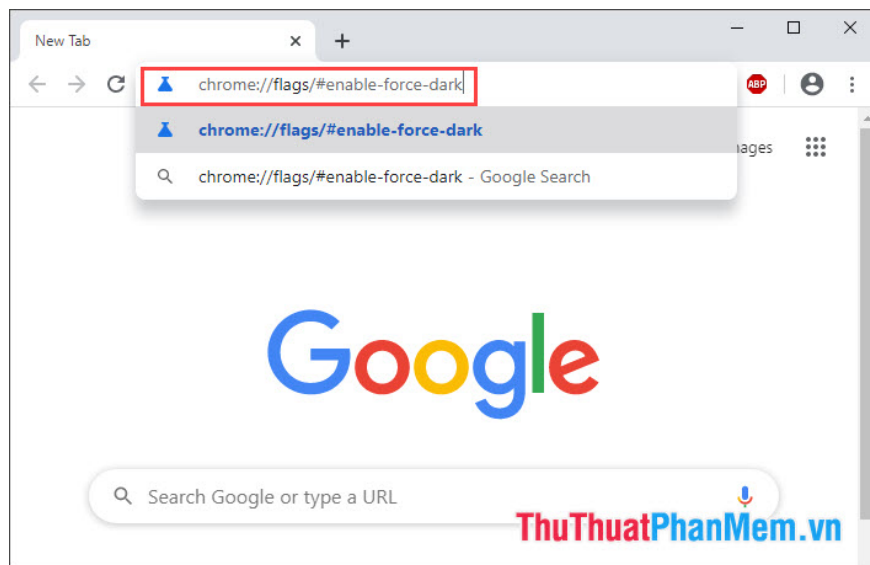

The Dark mode feature helps us minimize eyestrain when surfing the web during the night. If you have not found the way to enable Dark mode on Chrome, Coc Coc, Firefox web browsers, please follow the instructions in the article below.

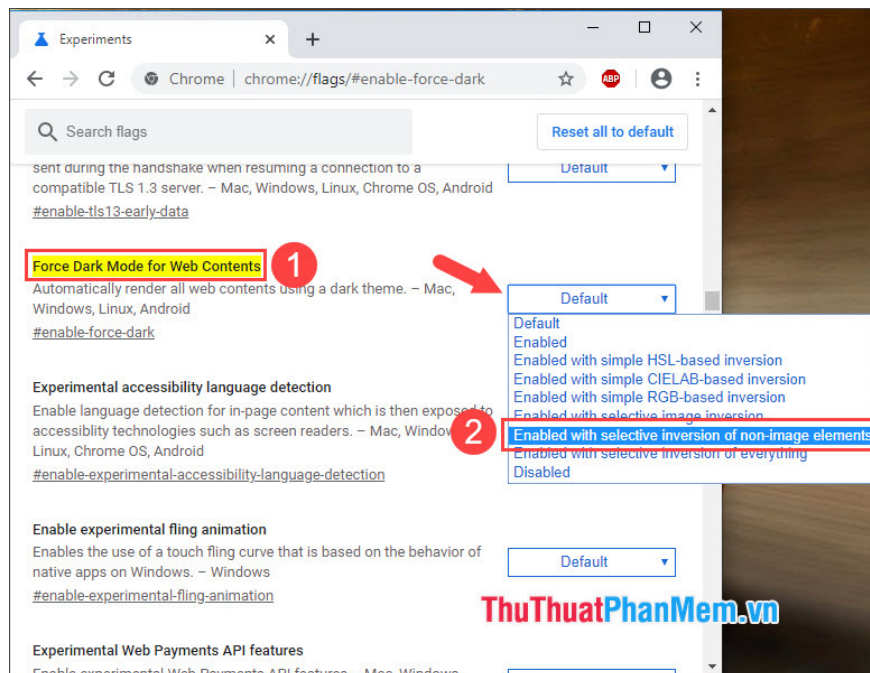

1. On the Chrome browser

First, you need to download the latest version of Chrome browser at the following address: https://www.google.com/intl/en_us/chrome/

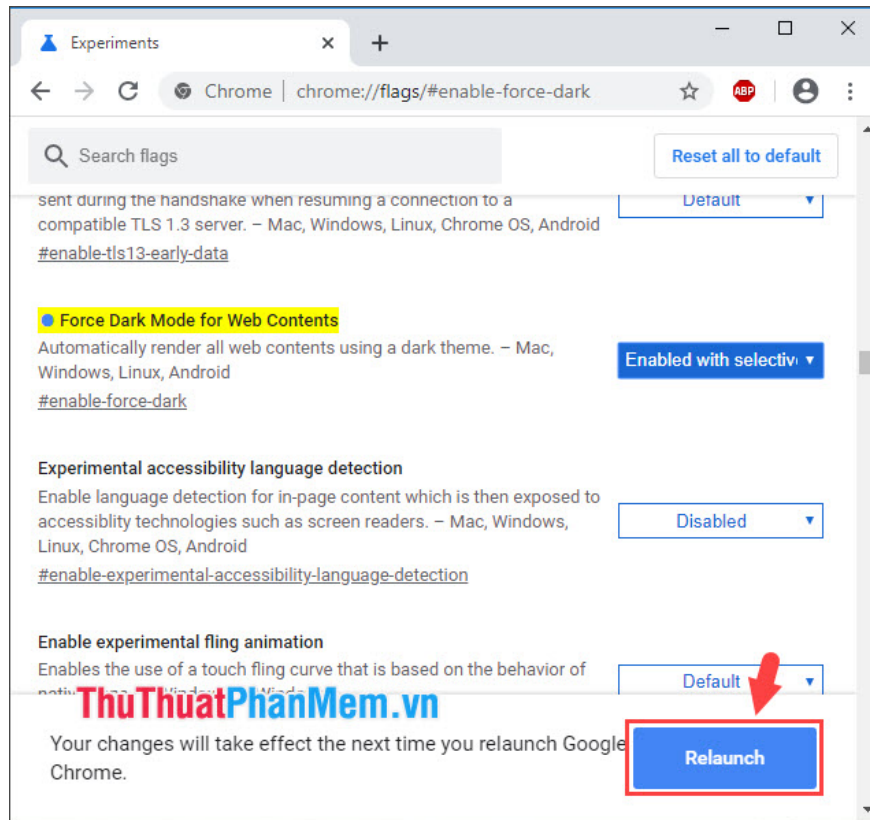

Step 1: Open Chrome and access *chrome://flags/#enable-force-dark*

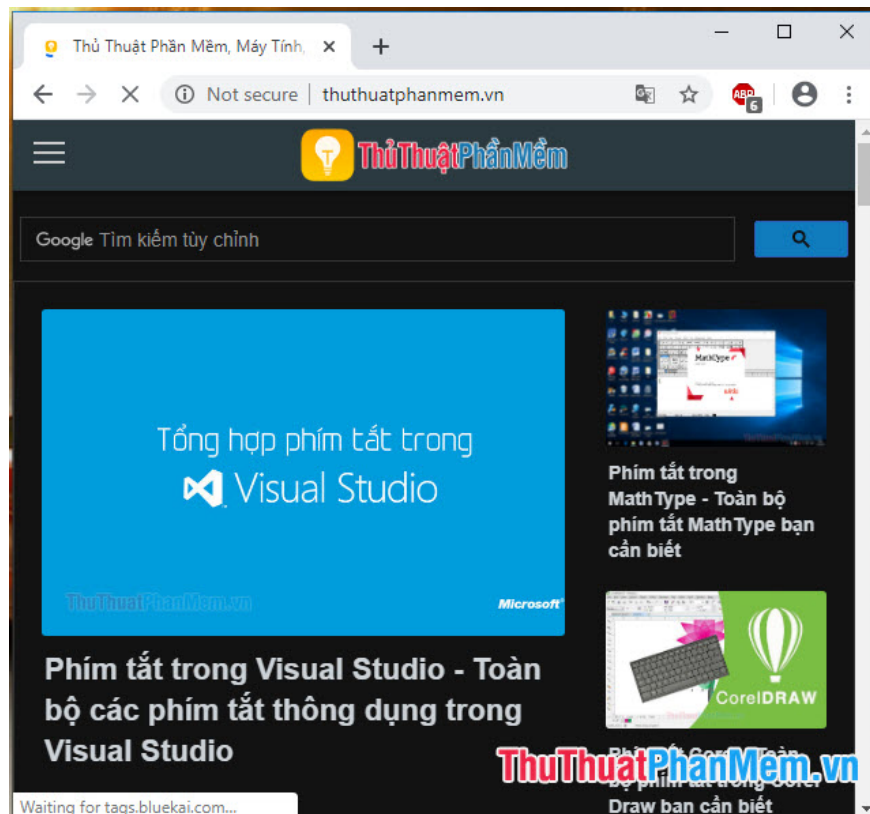

Step 2: Go to the yellow highlighted **Force Dark Mode for Web Contents (1)** and click the option => **Enabled with selective inversion of non-image elements (2)** .

Step 3: Click **Relaunch** to restart Chrome.

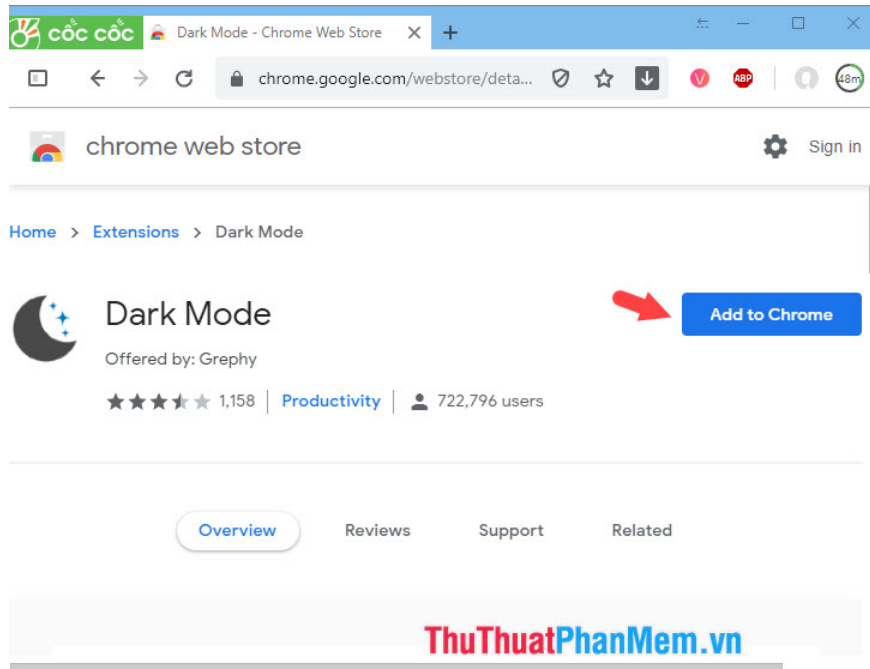

Step 3: Try to visit any website and experience the Dark mode feature on Chrome.

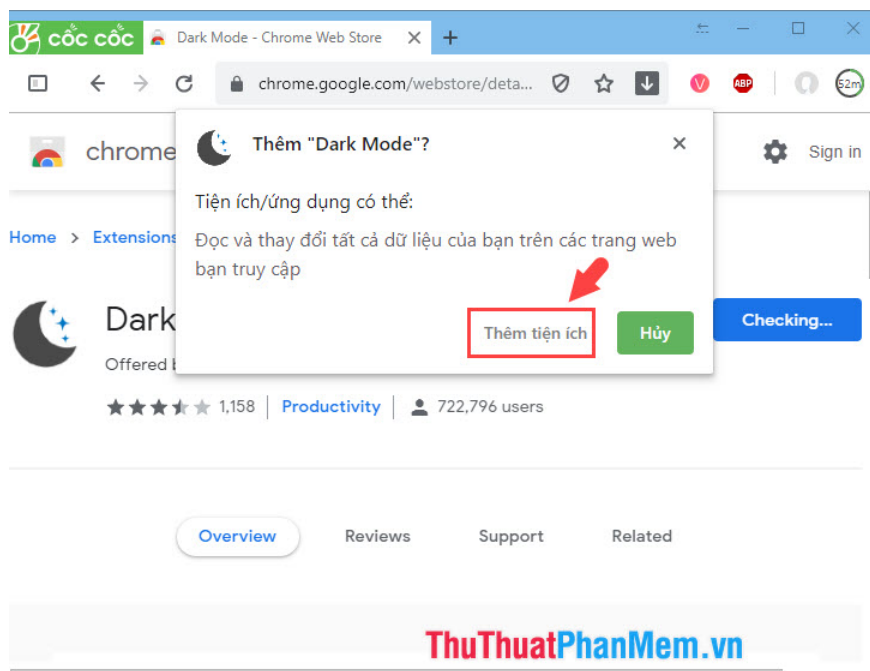

2. On Coc Coc browser

Step 1 : You access the link <https://chrome.google.com/webstore/detail/dmghijelimhndkbpbgldicpogfkcej> and install the extension for Coc Coc.

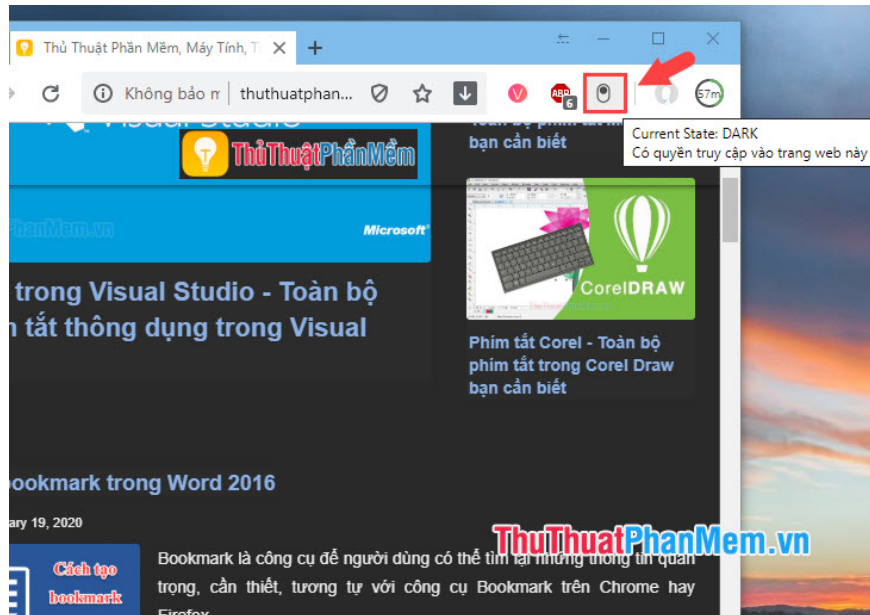

Next, click **Add to Chrome** .

Step 2 : Click on **Add gadget** is finished.

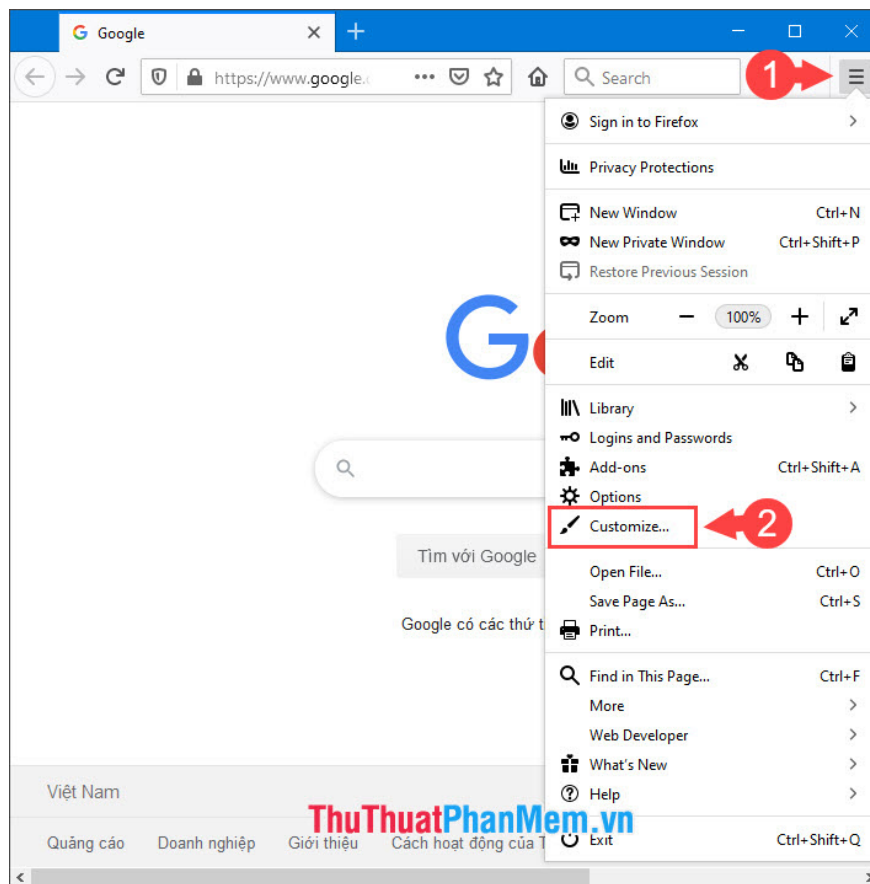

Step 3: After installing the extension, you will see the **Dark mode** icon on Coc Coc browser. To switch to **Dark mode**, left click on the icon and the **Current State: DARK** status will show up. At this point the whole site has gone into **Dark mode** as shown below!

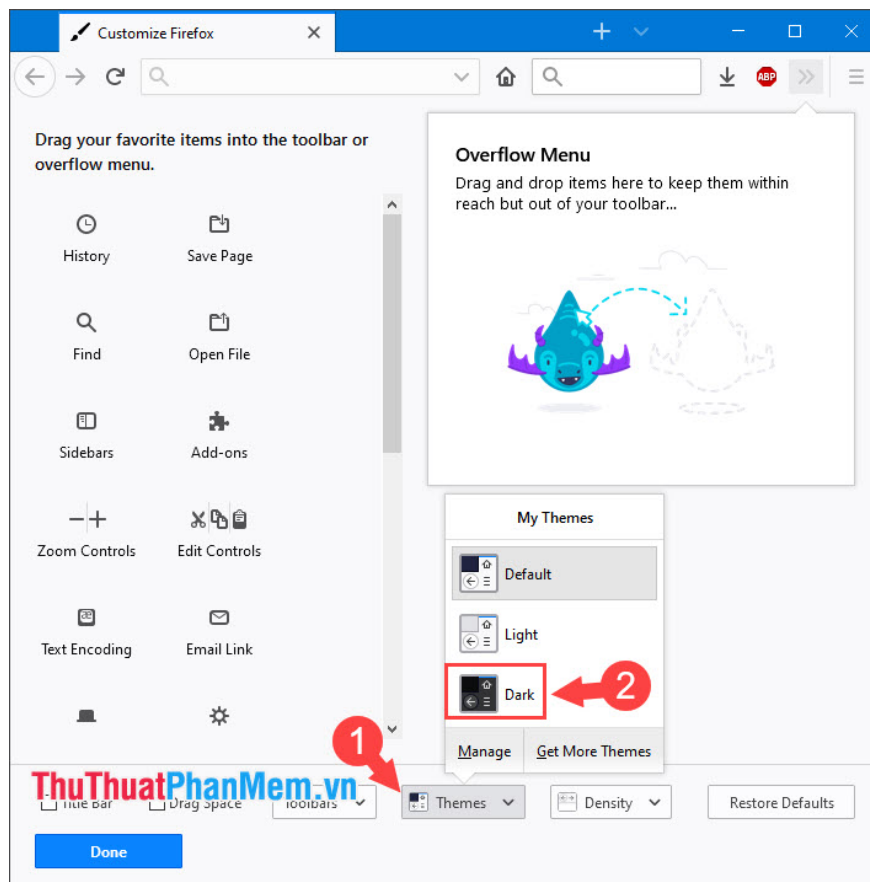

3. On the Firefox browser

First you need to update your Firefox browser to the latest version at the following link:
<https://www.mozilla.org/en/firefox/new/>

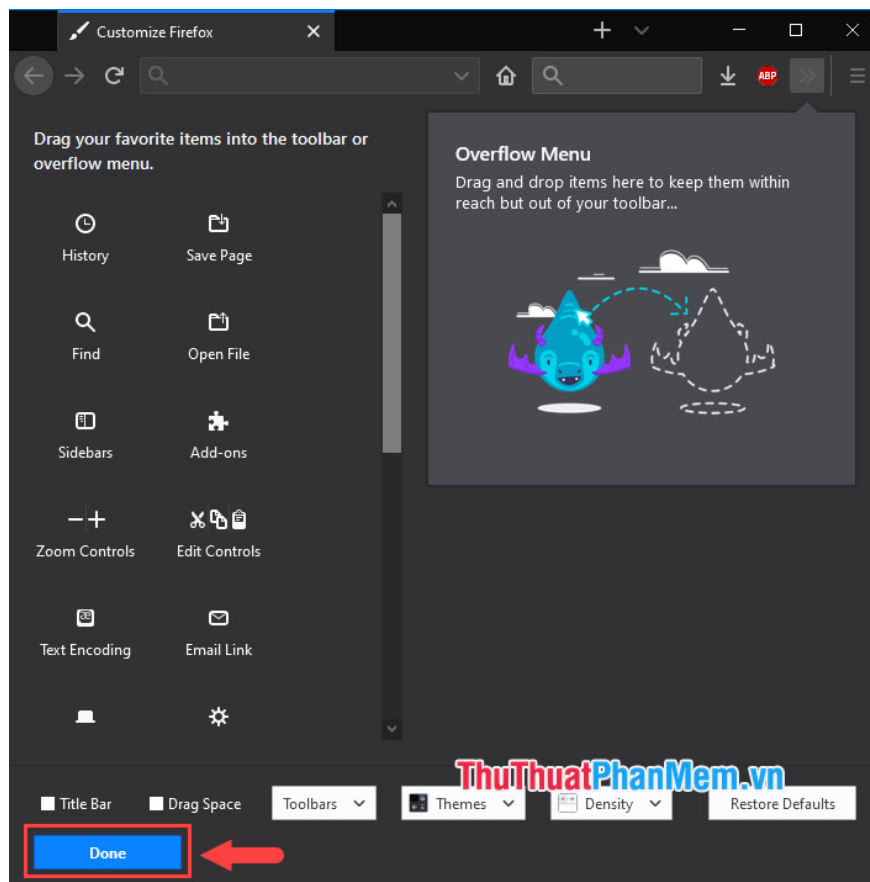

Step 1: Open Firefox and click on the **Options** icon (1) => **Customize** . (2) .

Step 2: Click on **Themes (1)** and select **Dark (2)** .

Step 3: After your Firefox switches to Dark mode as shown below. Click **Done** to save the settings.

With the Dark mode feature in the browser, we can safely surf the night at night without eye strain. Good luck!
