

How to adjust photo color with more than 40 filters on Pixelixe Photo Effects

Pixelixe Photo Effects offers many completely free photo color filters so that we can change the image according to each person's taste.

Image color filter also with effects will help the image become more different than the original image. For some apps, color filters are important, like Instagram and there are also many apps that only provide photo color filters for your use. If you don't want to install photo editing apps or software to get color filters for your photos, you can use Pixelixe Photo Effects, which offers more than 40 filters for free.

The site does not provide other photo editing features, only color correction. So if the user has no requirements other than changing the colors for photos, Pixelixe Photo Effects is an effective choice. The website does not require you to create an account that can be used immediately. Just download the photo and then choose the appropriate color for the image. The following article will guide you how to use Pixelixe Photo Effects.

1. How to quickly blur images online
2. The 16 latest features on Instagram should not be missed
3. How to change the color gamut in Photoshop
4. The color imaging applications on extreme black and white background or you should not ignore

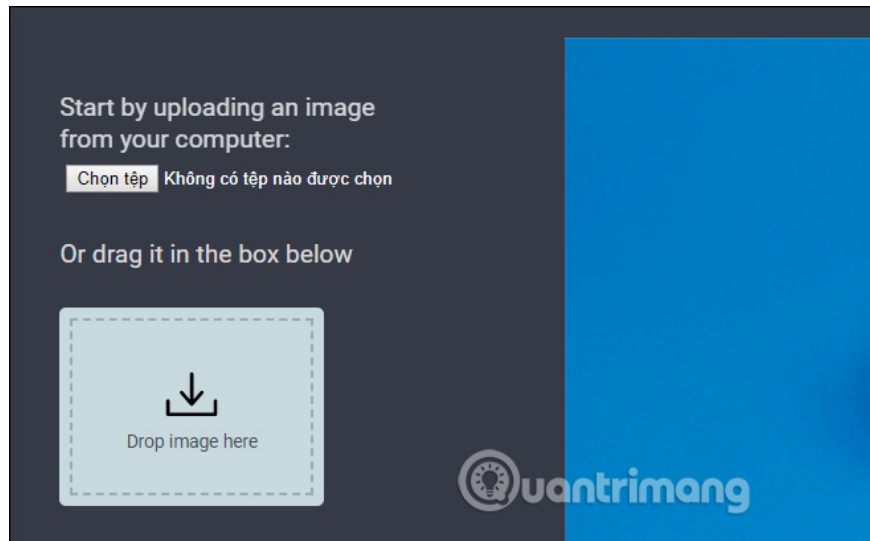

Guidelines for color correction on Pixelixe Photo Effects

Step 1:

Users follow the link below to access the homepage of Pixelixe Photo Effects.

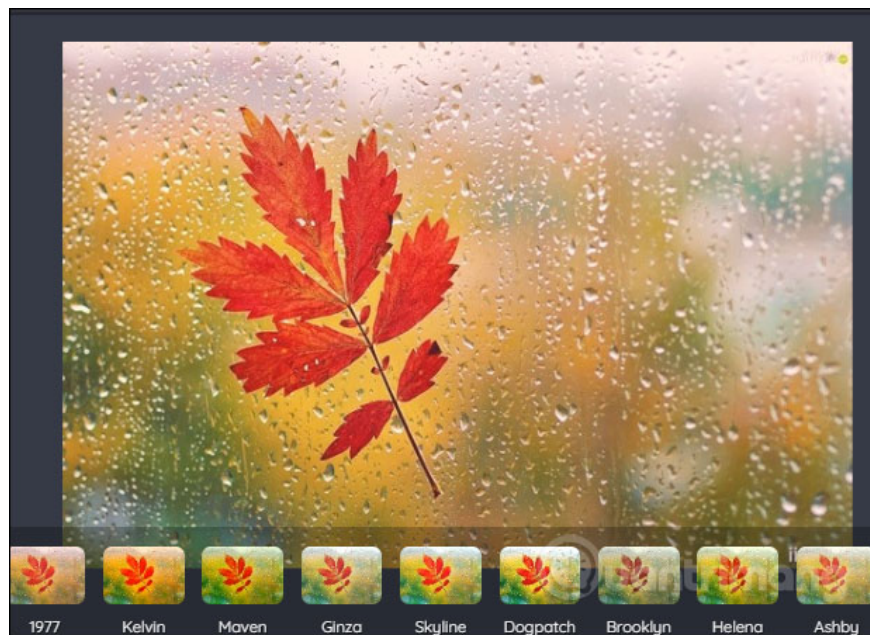

<https://pixelixe.com/instagram-filters/filter-based-photo-effects.html>

Next at the page interface we click **Choose File** to upload images or drag and drop images into the box Drop image here.

Step 2:

Right after that we just **apply color filters to the image** . Each color filter will change your image in different ways. We need to choose the color filter that fits the image.

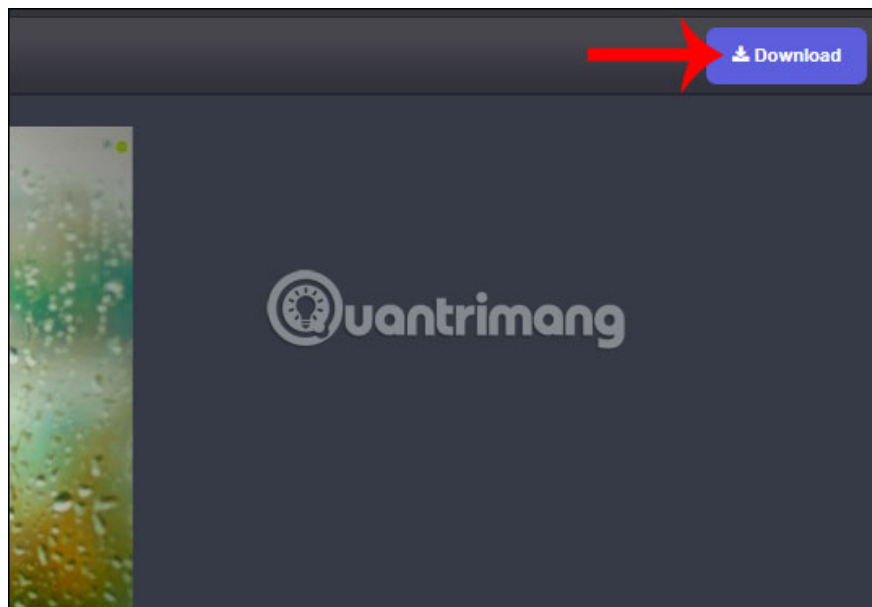

Unfortunately, the site doesn't have a color level adjustment bar for the background, so we can't change the intensity, increase or decrease the color of the image.

Step 3:

After selecting a desired color for the image, users click on **the Download icon** in the top corner of the screen.

How to use Pixelixe Photo Effects is as simple as that. In general, the site also only adjusts image colors in basic form, in addition to providing many filters for you to choose freely.

I wish you successful implementation!
